

Dear Reader:

<https://www.letsGOPublish.com/files/canceled.pdf>

Thank you very much for downloading this free book which I finished in the afternoon of October 29, 2021. I had learned in late September that Amazon was hassling me because a true fact that I used in my book. Nothing more, nothing less.

Most of my books had previously been published on Amazon.

Click below if you would like to donate to help the free book cause:

Enjoy!

Canceled

Amazon: The Biggest Bully in Town Canceled Me!

This big bully blocked 15 books before the end of 2021
by the most published non-fiction author in America

Canceled!

Amazon: The Biggest Bully in Town Canceled Me!

This big bully blocked 15 books before the end of 2021 by the most published non-fiction author in America

Everybody knows that your business will be severely punished if you decide to mess with Amazon, even if you are 100% right. 15 of my books since 2020 were censored because of the same reason this next guy was blocked: I THINK what I "did wrong" was to use what they consider "widely available facts" which are a lot of facts about the topic I was writing about. The creativity I add comes from the presentation not the facts. Here is an analogy I got on the Internet:

"IF YOU WRITE ABOUT THE MONA LISA YOU WILL ALSO NEED WIDELY AVAILABLE PICTURES BECAUSE THOSE ARE THE ONLY ONES AVAILABLE AT ALL!!! THE LOUVRE WILL NOT ALLOW YOU TO TAKE YOUR OWN PICTURES, THUS NO BOOKS ABOUT THE MONA LISA???"

Try dealing with an Amazon reviewer who must have a quota for rejected (blocked-censored) manuscripts. Amazon reviewers are like the brownshirts of the publishing industry. They are very matter of fact, uncaring, and unhelpful. They will not tell you specifically what is wrong with your submission. Then, you make an argument and if they respond at all, they do not address the points you make. Instead they tell you that the book will be blocked in five days after their evaluation. On September 15 this year, Amazon took their final punitive step—they canceled me. They call it terminated.

They terminated my account and kept my files and no longer sell my books. I contested, threatened to sue but they chose not to respond and my books are all censored now. See what happens when you complain. I am canceled by Amazon.

Some authors like me publish their books only on Amazon. After 15 books being blocked this year alone because I dared write about the COVID-19, I'm asking: is it possible for me to publish my books without using Amazon at all? Well, maybe! But the point is Amazon has no right to seize my business or not market my books.

Amazon told me I was bad because I used facts that were also on the Internet but they would not give page or chapter references. This is a free Speech violation by a monopoly. Ask others why they use a monopoly—not many choices is the answer.

Am I ideologically censored? They give no phone number. They ignore emails. Then poof, they canceled me. But like the Highwaymen, I am still alive. Should I go to court or report them to the FTC? Hmmm! This cannot stand

Dedication

I dedicate this book to my wonderful wife Patricia; our three wonderful children Brian, Mike and Katie; and our friendly friends—Ben our always very happy dog, who recently became an Angel, and Buddy, our always cheerful Catholic cat who now lives in Cat Heaven.

Thank You All!

Acknowledgments

I appreciate all the help that I have received in putting this book together as well as all of my other 292 other published books.

My printed acknowledgments had become so large that book readers "complained" about going through too many pages to get to page one of the text.

And, so to permit me more flexibility, I put my acknowledgment list online, and it continues to grow. Believe it or not, it once cost about a dollar more to print each book.

Thank you and God bless you all for your help.

Please check out www.letsGOPublish.com to read the latest version of my heartfelt acknowledgments updated for this book. FYI, Wily Ky Eyely, my wonderful one-time basketball playing "niece," loves this book and recommends it to all. She wants "Uncle Brian" to be our next Congressman or US Senator and he is thinking about running.

Click the bottom of the Main menu on Lets Go Publish! to see the big acknowledgments!

Thank you all!

Preface

Why did Brian W. Kelly write this book?

Quite frankly I got sick of Amazon pushing me around and since I am a thousandaire and Amazon Owner Jeff Bezos is a billionaire, I am trying to use Jeff Bezos's billions against him.

I would promise to cancel this book if Bezos promised Amazon would begin to behave well at least regarding non-fiction authors.

I hope you enjoy this book and I hope that it inspires you to consider that Amazon does not have to be your prime vendor. You can do better than Amazon and do business with businesses who appreciate your business.

I wish you the best.

Subject: Please Take my case v Amazon and
be a co-author for a new book titled **Canceled**

Attorney Alan Dershowitz
c/o Harvard University Law School
1575 Massachusetts Ave.
Cambridge, MA 02138

Dear Attorney Dershowitz

Amazon terminated my account on September 15, 2021. Prior to this, I had written 290 books published mostly by Amazon. I published them through my small one man shop, called Lets Go Publish!—letsGOPublish.com

I just bought your new book, *Case Against the New Censorship: Protecting Free Speech from Big Tech, Progressives, and Universities*. I have seen you in action when you defended the President during his impeachment troubles as well as a guest on many Network Talk shows. I know you and your firm would be the best lawyers to take my case against Amazon

From my perspective Amazon seized my business when they terminated my account. In essence, they canceled me. They no longer answer my emails. They have all of my book files which I cannot access since I cannot sign on. Though they cited a problem with one book in this latest round of censorship, they stopped the sales of all 290 books and so my company no longer has a source of income.

At over \$130,000 per book average lifetime earnings, both my paperback and Kindle books damages come to about \$77 million. A book as you know is an annuity. I always assured my wife that my

book sales upon my death would be better for her than a normal insurance policy. As you can imagine it would be an awful lot of work to recreate all of these ready to go print-on-demand books. At 73 years of age, I am not sure I am up to that task. Right now, I would like to right this wrong. Amazon had no right to shut down my business.

They do not like free speech. They blocked 15 of my books before they terminated my account. Amazon.com/author/brianwkelly is the URL for my Amazon author profile. You can read about me and my books by taking the link. At one time, you could buy books right from the profile. It needs a little more work to be fully accurate. Here is the reason for their blocking my first book titled *Coronavirus: the Cause; the Cure* . On Friday, April 17, 2020, Kindle Direct wrote the following:

Due to the rapidly changing nature of information around the COVID-19 virus, we are referring customers to official sources for health information about the virus. As a result we are not offering your book for sale. Amazon reserves the right to determine what content we offer according to our content guidelines. You can find our content guidelines on the KDP website: <https://kdp.amazon.com/help/topic/G200672390>

I smelled a rat and I was right. Amazon had no right to censor one of my books for any reason. So, believing that their reason was made up on the fly, I changed the title and changed less than a paragraph of the book to make it match the title. The book already contained information about Hydroxychloroquine. The new title became *Hydroxychloroquine: The Game Changer*. This was before liberal progressives had a war against therapeutic drugs such as hydroxychloroquine.

This past summer, a year and half after *Hydroxychloroquine The Game Changer* sold about 300 copies, I wanted to update it and I refreshed about 30% of it and released a new book titled as follows:

HYDROXYCHLOROQUINE Much-Maligned- Super Drug
 From the author of the best-selling book
Hydroxychloroquine: the Game Changer

Amazon held it up for review immediately. By then hydroxychloroquine was something that could not be embraced in the printed word. The liberal progressives were against it because Trump had recommended it. They claimed that the words for the

book came from material freely available on the Internet. I cautioned them that it was a second edition of The Game Changer book. 70% of the new book had already sold over 300 copies on Amazon and this was just an update.

The book sold for about two years by Amazon was titled Hydroxychloroquine: The Game Changer. After a long back and forth, they censored the update and in what was an unprecedented move, they went back and censored (blocked) the original book for future sales. Then just a few days later, they terminated my account and now all of my 290 titles have no home.

After they blocked the “Much Maligned Super Drug” book, I released another version called

288 Hydroxychloroquine Worthless! Worthless! Worthless!
Do they swear by it? Do they say it is pure hokum?

Because this title appeared to be anti-hydroxychloroquine, Amazon approved it. *288 Hydroxychloroquine Worthless! Worthless! Worthless!* Do they swear by it? Do they say it is pure hokum?

My complete catalog of titles is listed at letsGOPublish.com, my small publishing company. Take the URL and check them out when you have time. The titles are listed in the lead article on the site. I have to update it but it is pretty accurate.

I respect your abilities to the utmost and would love it if you would take my case.

I have just about finished a book about my case. When I finish it in a few days, I would love to send it to you. I think I will title the new book Canceled:

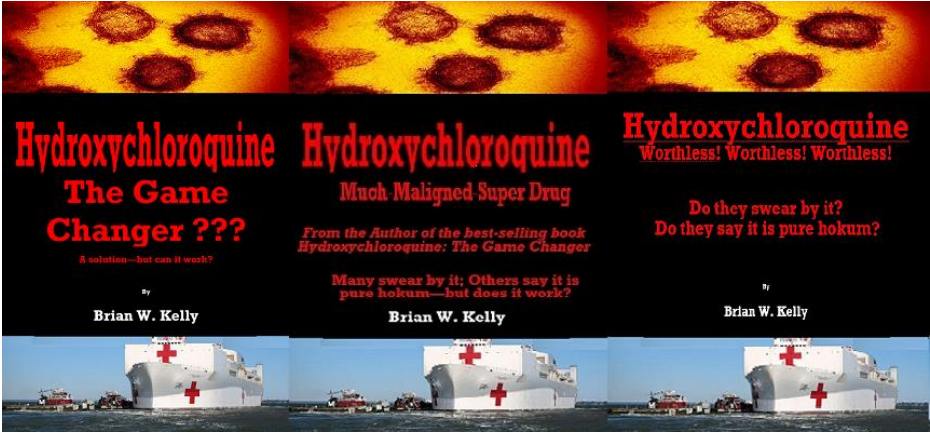

Canceled!

Amazon: The Biggest Bully in Town Canceled Me!

This big bully blocked 15 books before the end of 2021 by the most published non-fiction author in America

I would appreciate it immensely if you would consider being co-author of this book with me? It is almost completed. You could have your team check the contents and change whatever you think is appropriate. I would be pleased to make you the major partner and you would receive the bulk of the proceeds.

Here are the covers of the three Hydroxychloroquine books

As noted above, the second book was supposed to be an update but they censored it and then went back and censored the first book. The third book was approved. Amazon is both incompetent and nasty.

Please accept me as a client and as a co-author. You can change the book in whatever way you feel is appropriate. I trust you implicitly.

Thank you for your consideration

Sincerely,

Brian W. Kelly

About the Author

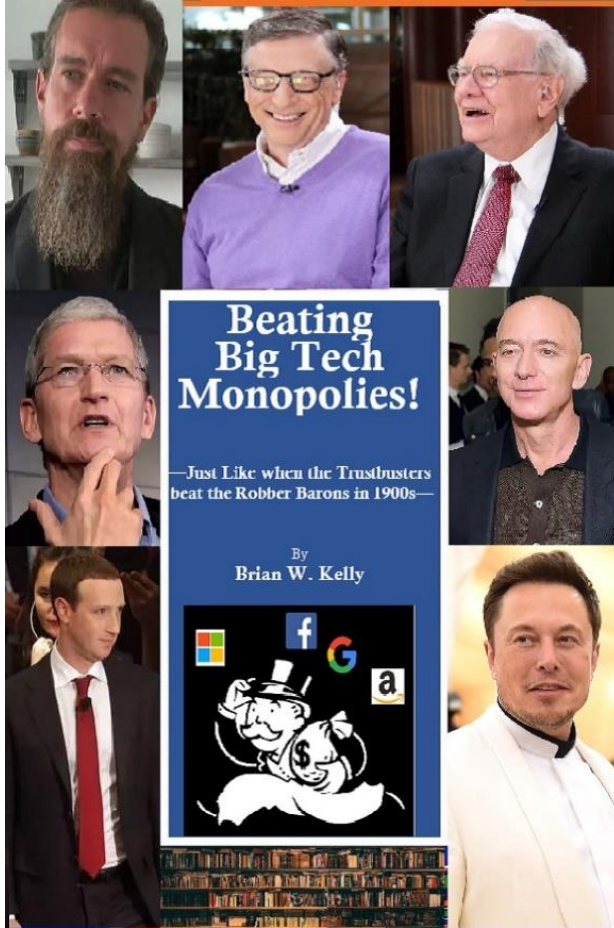

Brian W. Kelly retired as an Assistant Professor in the Business Information Technology (BIT) program at Marywood University, where he also served as the IBM i and Midrange Systems Technical Advisor to the IT Faculty. Kelly designed, developed, and taught many college and professional courses. He continues as a contributing technical editor to a number of IT industry magazines, including "The Four Hundred" and "Four Hundred Guru," published by IT Jungle.

Kelly is a former IBM Senior Systems Engineer and IBM Mid Atlantic Area Specialist. His specialty was designing applications for customers as well as implementing advanced IBM operating systems and software facilities on their machines.

He has an active information technology consultancy. He is the author of 293 books and numerous technical articles. Kelly has been a frequent speaker at COMMON, IBM conferences, and other technical conferences.

Brian was a candidate for US Congress from Pennsylvania in 2010 and he brings a lot of experience to his writing endeavors.

Chapter 1 Big Tech Likes to Cancel People!

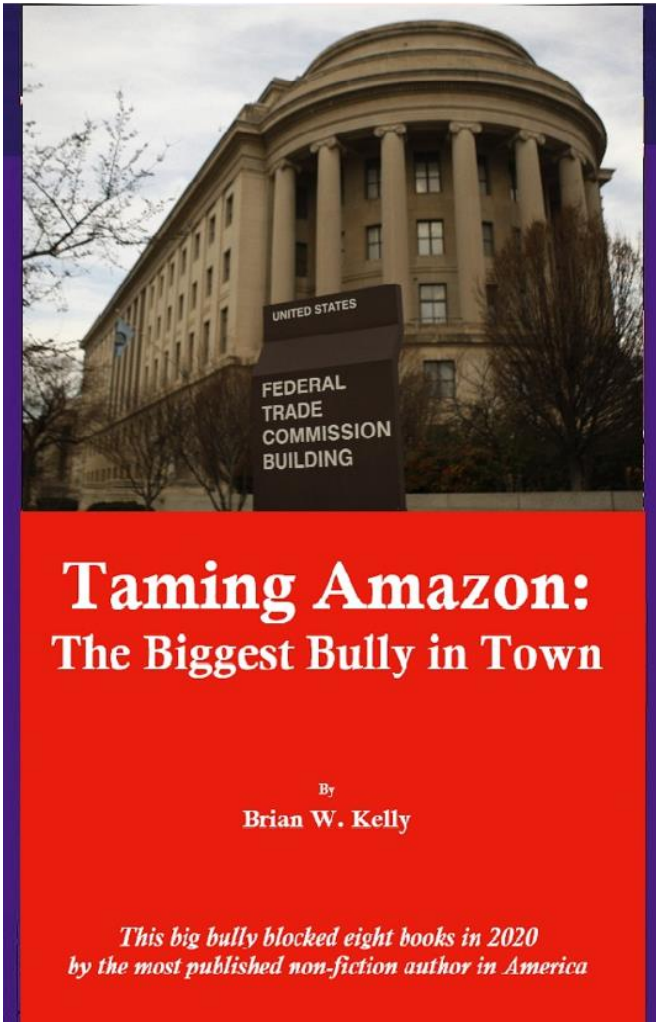

Amazon is one of the big tech oligarchs that you have already heard about. They are one of the biggest if not the biggest. Before they canceled my account for the second time in September 2021, and they burned me by getting rid of my books for sale, you were able to buy a Brian W. Kelly book about Big Tech, published by Amazon. Yes, they published it. The book takes on Big Tech and it shows how bad it is with Big Tech.

It did not take too long for Amazon to show me who was boss. Like their Big Tech cohorts, they love canceling innocuous things like one man shops such as mine and my little publishing business named

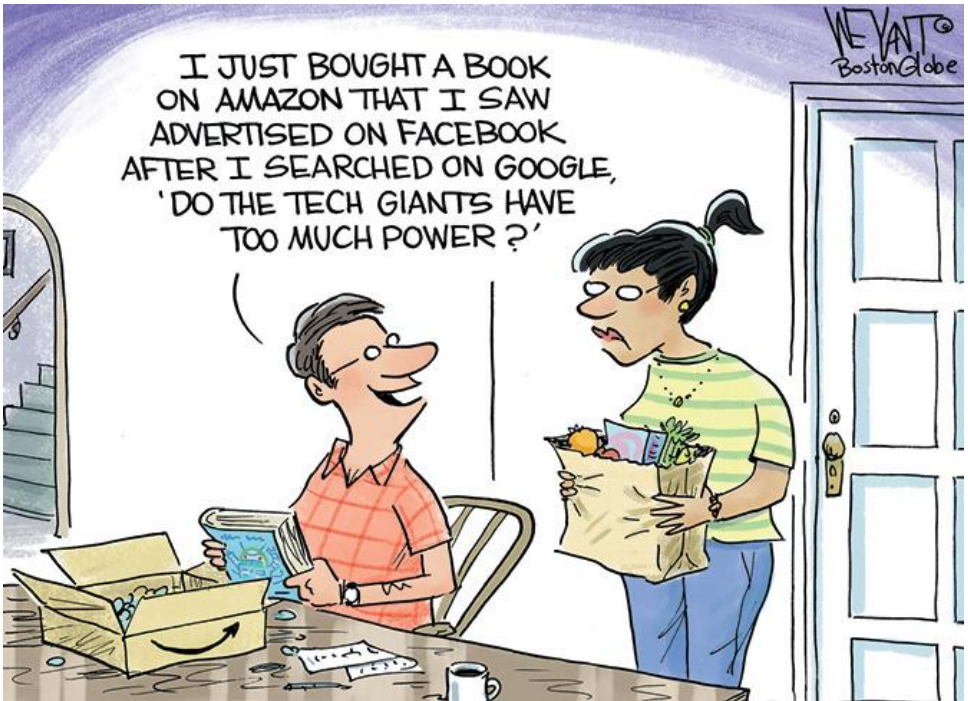

letsGOPublish.com Here are some of Amazon's cohorts plus the Big cheese Jeff Bezos--second guy on the right in case you missed him. See all the big tech oligarchs on the cover of the below book. Elon Musk does not belong on the cover but he makes a nice picture.

I think you can trust Elon Musk. He's a billionaire but he is grounded in reality. The others are haughty snobs that want to rule the world. Even before I wrote *Beating Big tech Monopolies* featuring Amazon et al. big behemoth Amazon had begun its war against Brian W. Kelly. In response, I wrote this book shown below:

Most folks who see this book for the first time cannot believe that it was a Lets Go Publish! Book that Amazon's content reviewers missed. They never tried to block it which was strange. It tells the first story of Amazon the Big Tech Behemoth Bully. I wrote a bunch after this – four about the iterations I used to present my case to the Federal Trade Commission (FTC)

Chapter 1 in the Big Tech book that I wrote, shown a few pages ago starts with this handsome cartoon

Courtesy of upfrontscholastic.com

Yes, Virginia, the Tech Giants do have too much power. They can squash one man shops like mine like as if my company was a little big

So everybody knows—I like Elon Musk as a human being. I explain after this cartoon why Musk is on the Big Tech Book cover. Here is what I wrote. I still feel this way and Elon Musk does not like the monopolistic oligarchies either.

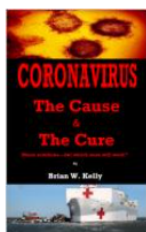

For the record, I do not see Elon Musk as a monopolist at all. In fact, he is one of the good guys in Big Tech and it was unfair of me to put his handsome picture on the cover of this book. But, he does add a bit of charm to the motley lot on the cover. I could not find any women at the top and I looked.

Not only is Elon Musk not one of the big tech bad guys but he knows how bad they are. The Tesla and SpaceX CEO Elon Musk is calling for Amazon to be broken up.

Here are his words: “Time to break up Amazon. Monopolies are wrong!” Musk tweeted.

Folks, for the record, I agree

*Musk’s tweet was in response to former New York Times journalist Alex Berenson, who tweeted a screenshot showing that his upcoming book about COVID-19 doesn’t meet Amazon guidelines for sale. Berenson and I were in the same boat on that. Amazon censored my first virus book titled *Coronavirus: the Cause & the Cure*. Pretty good title. I would have been rich like Berenson but Elon Musk did not know about my plight so my book remains blocked to this day. Here is a snapshot of the book from my Amazon dashboard back when I had an account which enabled me to access my stuff on Amazon.*

Amazon later said that the Berenson’s book in question had been blocked in error and was now available in an e-reader edition for Amazon Kindle. Amazon said that the availability of the book was not due to Musk’s tweet, according to Reuters. Ahem!

Both Musk and Berenson and Kelly for that matter (me) have been critical of coronavirus-related shutdowns. The DOJ announced an antitrust review into tech companies in July 2019. In September, the House Judiciary Committee requested documents from Amazon, Apple, Facebook and Google's parent company, Alphabet. Maybe this will be solved when nobody would want to buy my book. Just thinking out loud. Anyway, Elon Musk is not a bad guy.

Here are a few additional facts on the matter:

The Big Tech oligopoly technically refers to the state of limited competition guarded by 5 tech market dominators. These are Facebook, Amazon, Google, Apple and Microsoft. Additionally, Twitter and relative newcomer- Netflix are also big tech contenders, providing social and streaming alternatives. If Big Tech is not colluding with Big Tech, we would all be surprised. They sure are colluding with the Democrat Party and have become one of the enforcement arms of the Dems. They operate like e-brownshirts.

During the 2020 election, Facebook CEO Mark Zuckerberg decided he could affect the presidential election by assuring that Joe Biden became the president. His plan technically worked. Whether it was all cause and effect is debatable but the plan achieved its objectives. Biden is the president.

Zuckerberg was the top spender by far of all the tech oligarchs. His total was \$419 million dollars which was higher than just about every organization on the planet. Our guy from Amazon Jeff Bezos spent heavily but not in comparison to Zuck. Bezos' total contribution was \$8.9 million and his favorite recipient, Joe Biden won. Yes, this e-commerce oligarch snuck in his \$8.9 million through individual and PAC donations to federal candidates, mostly Biden. Zuckerberg really outdid himself. He did not steal the 2020 election as some have suggested. No folks, he bought it and paid handsomely for the privilege.

Zuck funded a targeted, private takeover of government election operations by otherwise nonpartisan — but demonstrably ideological — nonprofit organizations. He was smart but if the Dems did not win and he had done this to Republicans, he might be doing time in the Big House now.

Analysts suggest that this major money supply increased Joe Biden's vote margin in key swing states. In places like Georgia, for example where Joe Biden won by 12,000 votes, and in Arizona, where he won by 10,000, it was Zuck's spending that more than likely put Biden over the top. It may not be fair but nobody in a Democrat regime is going to go after a generous Democrat—legal or illegal – fair or unfair.

It was unprecedented. It was the first true merger of public election offices with private resources and personnel and quite frankly it is scary to believe that rich people can buy the presidency. It is an acute threat to our republic and it must be the focus of electoral reform efforts moving forward. God help us all if we can't stop the big tech oligarchs. Would it not be nice if we could locate an honest politician. But, that has become an oxymoron. Too bad—we can really need some good guys today!

Unfortunately, the term “honest politician” has become a greater oxymoron than the famous “military intelligence.” Today, it is the firm and honest belief of more people than you can count that there is no such thing as an honest politician or a politician who truly represents his or her constituency. If we are not doomed yet, that fact is enough to sink the Good Ship America

Nonetheless, big bucks from oligarchs worked for the Democrats and the oligarchs gained favor with them. So who is going to complain and who will be authorized to investigate. It is scarily funny that in a world in which school children's parents are fighting with school boards for justice and that constitutional right may get them all sent to the pokey, an oligarch with lots of bucks can simply buy an election and still sun on his yacht without risking incarceration. .

To repeat, the 2020 election wasn't necessarily stolen. However, it was likely bought by one of the world's wealthiest and most powerful men by pouring his money through legal loopholes. This is an America that nobody ever imagined—especially the founders.

Amazon, Google, Facebook and Twitter have come under increasing scrutiny from conservatives who claim that the platforms discriminate against them and their politics. The companies have in recent months taken steps to crack down on the Democrats' notion of hate speech and white supremacist content, adding to previous efforts to limit the spread of anti-Democrat news which they label as misinformation.

How did all this money get used up? Two organizations namely, The Center for Technology and Civic Life (CTCL) and the Center for Election Innovation and Research (CEIR) slipped through a staggering

\$419.5 million of Zuckerberg's money (that's a lot more than Terry Bradshaw puts up for football games.) into local government elections offices, but it wasn't free. It came with strings attached.

Every CTCL and CEIR grant spelled out in great detail the conditions under which the grant money was to be used. Can it be legal? Democrats have learned that legal or illegal they have the power so it makes no difference. What difference does it make? Who cares?

This is not a matter of Democrats outspending Republicans. Private funding of election administration was virtually unknown in the American political system before the 2020 election. Will our Congress make it right. Get out your designer BARF bag.

What happened was the money permitted the financing of the infiltration of election offices at the city and county level by left-wing activists and using those offices as a platform *to implement preferred administrative practices, voting methods and data-sharing agreements, as well as to launch intensive outreach campaigns* in areas heavy with Democratic voters. The Democrats with a lot of help from Big Tech were able to fix the 2020 elections.

That's a lot of words to describe a process that was anything but Kosher. Maybe in addition to being bought, the election was also stolen by overzealous Democrats. Even with that, Reuters says that Joe Biden narrowly won the 2020 presidential election. Zuck's money did make a big difference for sure.

It sure seems that there is so much "stuff" in America today that it is simply upside down and the normal processes from the past have not worked to naturally straighten them out. Many people, and more each day, have stopped being shocked at the behavior of politicians and their outright disdain for traditional American values.

With the press, Big Tech, and the Democrats allied like lost brothers, if you don't play by their rules, you are simply canceled from the game, or so it seems. Brian W. Kelly a virtual unknown before September 2021 was spotted as a one man publishing shop by the Democrat Thought Police and his disposition was turned over to the strong arm of Big Tech. Amazon handled the case and they first

censored objectionable material such as Hydroxychloroquine, and then when Kelly appeared impervious to the attacks, Amazon simply canceled him. Kelly of course is fighting but without funding who knows how far his comeback will go.

For America to last another couple hundred more years, it will have to go back to the founding principles. But this does not seem to be what those who have de facto taken over the country want to happen. They are very happy with the chaos as it puts them ahead of everybody else.

Whether you like them or not, these well-funded organizations are having an impact. For example, the CTCL/CEIR funded what they call vote navigators whose job was to “assist” voters, sometimes at their front doors, to answer questions, to assist them in ballot curing ... and also to witness absentee ballot signatures.”

How about a temporary staffing agency called Happy Faces, all answering to Stacey Abrams being assigned the job of counting the votes amid the election night chaos in Fulton County, Georgia. Sounds copacetic, right? If there appears to be something rotting in the state of Denmark, or perhaps even Georgia. It is because there is—it is democracy!

Here is a link for you to read as much as you would like about the bought and paid for election in the New York Post. *Zuckerberg’s election spending was ‘carefully orchestrated’ to influence 2020 vote: ex-FEC member*

<https://nypost.com/2021/10/14/zuckerberg-election-spending-was-orchestrated-to-influence-2020-vote/>

Your humble author is not the only one who feels that I have awakened inside of an episode of a Soap Opera named “*As the Stomach Turns.*”

Every now and then, I admit that I am so fed up with the new status quo that I am motivated to write a short editorial in the local papers. The local media knows that I am conservative so they skip many of

my submissions. Here is one I submitted just today. You may find it one day and then again, you might not. :

Why solving 2020 election "anomalies" is very important!

Are they just anomalies or a new formula for assured Democrat success?

Liz Shew, a spokesperson for the former president, told Newsweek recently that failing to fix the problems Trump claimed plagued the 2020 election and holding "those who broke the rules" accountable will foster the belief among Republicans / Conservatives that their votes don't matter.

Republican leaders seem to care less. Stolen election or not--machs nichts! Republican leaders are not fighters and accept second place very nicely as long as they are simply permitted in the game. Republican leaders are cowards and wimps. Democrats for all of their faults, and they are legion, would cheat and fight you for the last piece of bacon in a Sunday Brunch.

There are a lot of conservatives - Democrats and Republicans alike, who will punish Republicans for inaction if that is all they can get, rather than waste their time voting in what they perceive to be a flawed, fraudulent, unstoppable, rigged election process that Republican leaders won't fight to win. Not talking about the successful past Democrat caper and the probability of another crooked, stolen election feeds conservative resentment. Of course Democrats don't want to talk about it. They owned the last game and they will own all future election games if Republicans remain silent and accepting. If 2020 goes by uncontested, with no Democrats sent to the Big House, so will 2022 and 2024 and the rest. Think about it. Will a one party system work well for America?

Chapter 2 Boss Bezos et al vs. Boss Tweed

Question: What is the difference between Boss Bezos and Boss Tweed?

Answer: Who said there is a difference?

More than Elon Musk cheered when. He came through on his promise to send Jeff Bezos a silver medal -- the Tesla CEO surpassed the Amazon founder to become the world's richest person—over \$200 Billion.. People actually like Elon Musk. As for Jeff Bezos and Amazon...

Jeff Bezos avoids being able to be blamed. How does he do that you might ask. In his huge company, He makes up all the rules, legal or illegal. If you argue with him he will say you can't play anymore. That is what happened to me. He canceled me (Amazon calls it terminated) after I had written 293 books and had most of them printed by Amazon. Boss Bezos does not care about anybody but # 1. At Amazon, he is king of the hill and you can't argue with him or he'll take your ball and take it home with him.

I would call it corruption but then again, if you own the biggest company anyway, you make all the rules and you can make people dance who have never done a *two-step*. Even people who never agreed

to your rules will follow them, or they get terminated—O U-T! You can take away their right to participate by canceling their membership in the unpublished Amazon Club.

There is no question that Bezos and the other Tech Oligarchs are the greatest threats to free speech since King George. Just yesterday, YouTube canceled a podcast from Steve Hilton of Fox. He appealed and lost. The Google/YouTube reviewers upheld that Hilton's podcast contained *medical misinformation*. But then, miraculously, after YouTube (owned by Google) learned the issue would be on Fox News the next night, they claimed it was a mistake. What's a little lie when you are a Big Tech Oligarch?

Yet, Amazon and its story is not so obviously corrupt enough to beat hands-down the most egregious, corruption true story ever told. I think. But if you read the many tales of little guys in the publishing or product creation business who have been burned by Jeff Bezos's company, you might disagree. Bezos and his crew hurt regular people really bad as a matter of policy not by accident.

Either way, Bezos is no friend of competition and he will make the rules in his favor so that nobody else can win unless you have lunched every day in the colluding Oligarch's club. Check the many "*Amazon hurt me*" stories on the Internet and you will see.

Each of the stories you find are bad and after you read our story of my Amazon cancellation and my censorship in this book, you may agree it actually tops those cited. It is happening every day.

There is only 1 #1 corrupt politician in American History. If it is Boss Tweed, and not Jeff Bezos, Jeffrey B is a close #2—another silver medal—and don't think for a minute he is not a politician. We give you the story of *Boss Tweed* below to whet your appetite to understand just how corrupt Bezos' corruption can be and is.

This story is not from our time and is limited to the geography of just one city—the Big Apple. However, corruption is corruption and though this story takes us back many years, those who evaluate stories of corruption have slotted the story of *Boss Tweed* as the #1 corruption

story of all-time—hands down. But they may never have met Jeff Bezos and his Amazonians.

To put Bezos and company in perspective, please let us share with you some of the *Boss Tweed* story. You'll enjoy the story and I think you'll agree with the conclusion. Tweed is a humorous character unless you are from 1860 and find yourself pitted against him.

Going back a lot further in time we eventually find the most corrupt politician who ever lived before Jeff Bezos. That folks would be his BOSSINESS himself, the one and only BOSS TWEED. The best part of this story is that Boss Tweed was never a CEO of a huge money hoarding company though he had a hankering for cash in his dealings with the public just like Mr. Bezos, Mr. Zuckerberg, et al. You can't trace cash.

Unlike Bezos as of today, the 1st Boss Man eventually met his fate. That's not to say that Jeff Bezos will escape his own fate either in this world or the next. It is to say—just not yet. Bezos has also not put any time in the Big House—yet—and unlike BOSS Tweed has not yet etched his name permanently on a prison wall. The old time BOSS MAN was a phenomenon and a phenomenally greedy politician. Bezos' history is not completely written yet, nor is Zuck's, nor Dorsey's nor Gates' nor any of the other oligarchs. Will any of them fare better in time?

The famous Caricaturist and Editorial Cartoonist Thomas Nast's drawings for Harper's Weekly were instrumental in the downfall of Boss Tweed, the powerful Tammany Hall leader. See the pic on the next page. I hope that like Thomas Nast and the Harper's weekly I will be able to call attention to the foibles and the poor business choices of Mr. Bezos and his crew of charlatans so that one day Boss Tweed from his home with the damned could offer his conjecture on the fate of the CEOs and the other principals of Amazon. Maybe God will cancel them and they will know how their own medicine tastes.

Nast depicts the Tweed Ring: "Who stole the people's money?" / "Twas him." From left to right: William Tweed, Peter B. Sweeny, Richard B. Connolly, and Oakey Hall. To the left of Tweed in the background are James H. Ingersoll and Andrew Garvey, city contractors involved with much of the city construction.

Ladies and Gentlemen of the Jury, the undisputed poster child for graft and greed in American politics so far is not Boss Bezos, but then again he keeps out of sight. So far history has Boss Tweed as the most corrupt.

Yet, even the Amazon story is not so obviously corrupt enough to beat hands-down the most egregious, corruption true story ever told. Each of the stories are bad and after you read our story of my cancellation in this book, you may agree it almost tops those cited. Maybe it's not that bad but if your income goes to zero overnight, that is not good.

The undisputed one and only poster child for graft and greed in American politics may not yet be declared. Boss Bezos, the Amazon Chair, President & CEO, is certainly a candidate. It is not Boss Jassy, the President, and Chief Executive Officer & Director of Amazon.com, Inc. Perhaps it will be one of the other Amazon organizational bosses such as Boss Cooper, Boss Brian, Boss Stonesifer, or Bass Jake—not yet, anyway. There are pages and pages

of bosses at Amazon to pick from but the money collector is still Boss even though the claims to be retired is Boss Bezos..

Despite how low these Amazon boss's may have had to go to maintain their lofty positions in the "organization," and of course to punish those such as myself, simply for doing business with Amazon, historians so far say that they never even came close to the one and only BOSS MAN from New York—at least yet. Having felt the sting of these sub-oligarchs, after being canceled by the brood, I am not sure that I agree 100%. I am almost resurrected from my sting as of today but the final decision has not come in yet from the Amazon lawyers.

Bezos could not have gotten away with his avarice without his many cohorts pulling their own weight and more in the major sleaze period during Amazon's growth. They were rewarded for sure and they were heralded as the best Bezos could get and they believed it themselves and they believed in themselves.

Others such as innocent customers like me paid the price. But history still says the Amazon troopers never reached the Boss Man's dirty prowess. Nope! It was none other than William "Boss" Tweed, who was the best at his trade. He raised corruption to an art form. Silver medalist Bezos may not have his eye on the Boss Tweed corruption prize but he may get it any way.

As a member of New York's Tammany Hall, Tweed and his cronies, including Mayor Fernando Wood, ran New York during the Civil War era in the late 1800's, as if it were their own private money factory. That's not to say the team from Amazon would not have admired BOSS Tweed despite his being deplorable and despicable.

My best example of his obvious penchant for corruption is that Tweed once used personal funds to buy 300 benches for \$5 each, then he sold them to the city for \$600 a pop. And that's just the tip of it. Tweed had no authors in his stable of dependents or so we are told. Most of the politicians and public officials that Tweed bullied were as grimy as he was. They were all sleazes. Many in Amazon are sleazes also so there is that element of commonality to consider. Many sleazes are needed to overwhelm loyal customers with Amazon rules and regulations.

The back then pundits characterized the building of New York City Hall as a clinic itself in graft: What will history write of the story of the building of Amazon? NY City paid the highest potential price for every item purchased—such as being charged \$7500 for every thermometer, \$41,190 for each broom, and \$5.7 million for furniture and carpets. One carpenter even received almost \$361,000 for a single month's work. Remember the value of a dollar in the 1860's. Suffice it to say, kickbacks and corruption were the order of the day—and of course a lot of sucking up to the Boss Man to remain in good standing.

To wrap up the Boss Tweed story, the NY Times minced no words: “Tweed was the third-largest landowner in the city, director of the Erie Railway, the Tenth National Bank, and the New-York Printing Company, proprietor of the Metropolitan Hotel, and president of the Americus Club. He owned two steam-powered yachts, a Fifth Avenue mansion, an estate in Greenwich, Connecticut, and a shirtfront diamond pin valued at over \$15,000 (\$300,000 in today's money). Still, he gloried as friend to the poor, champion of immigrants, builder of a greater New York, and arbiter of influence and patronage. And he stole ... on a massive scale.”

The whole story of Boss Tweed is fascinating. Unlike Boss Bezos and many of the other Big tech Oligarchs, the poor and the destitute actually liked the Boss Man and prayed for him when he was in prison. See <https://www.nytimes.com/2005/03/27/books/chapters/boss-tweed.html>

And although he was crooked as a dog's hind leg, Tweed does get a bit of credit from some historians for undertaking many important projects that improved life in New York (albeit at enormous financial gain to himself). Tweed's illicit profits were said to be in the range of \$200 million, and that was in the 1860s! The law eventually caught up with the Boss, though, and he died in prison in 1878. If anybody can come up with anything positive on Bezos and his team, I'll save a few lines for the next book, which of course will not be printed or marketed by Amazon.

To get you thinking of corruption and graft regarding Amazon, I would advise you to read more about the company. Amazon likes to say that facts in a fact based book such as I write are freely available on the Internet. Such statements apply to Amazon the company as well.

Try to find a positive word on the Internet about Amazon and that, my friends will be a big challenge. They people who write about Amazon and Jeff Bezos on the Internet have an axe to grind because Amazon probably tried to use an axe to try to cut their business to bits.

In the next chapter, we provide a random sampling of various anonymous writings that overall tell a bleak story about the love affair small businesses have with Jeff Bezos and his Amazon Brown Shirt Storm Troopers. It makes the point but it is not funny because Bezos has hurt a lot of good people and put a lot of good businesses out of business. He plays dirty. Remember, he is no Boss Tweed. He may be worse.

Check out the random ramblings next chapter in no priority:

Chapter 3 Amazon Random Ramblings – None Positive

“Jeff Bezos' Amazon is listed as the No. 1 evil tech company. The company started out as an online bookstore, but even back in the day, it was criticized for putting real-world bookstores out of business”

“Amazon is an arch tax avoider and is the subject of a global boycott call by Ethical Consumer. The world's biggest online retailer is generating huge revenues in the UK but paying very little corporation tax. It does this by funneling money through its holding company in the notorious tax haven of Luxembourg.”

“Amazon has a goal to get rid of a certain number of employees each year, which is called unregretted attrition. Some managers at the company told an interviewer they felt so much pressure to meet the target that they hire people who they intend to fire within a year.”

“Some Amazon managers say they 'hire to fire' people just to meet the internal turnover goal every year.”

“There's been a rash of lawsuits filed against Amazon alleging gender and racial bias. In May, 20XX, five current and former female

employees sued the company Amazon, claiming "abusive mistreatment by primarily white male managers."

"Amazon Prime employees say women get few promotions and there's a culture of aggressive male-dominated management."

"Earlier this year, a US lawmaker tweeted that Amazon workers have to pee in bottles. The company denied this, but multiple drivers confirmed it was part of the job. Amazon later apologized and said drivers have trouble finding restrooms because of traffic and being on rural routes, adding that the issue has been exacerbated by closed public bathrooms during the pandemic."

"Amazon always has an excuse."

"Amazon is a destructive force in the world of bookselling. Their business practices undermine the ability of independent bookstores—and therefore access to independent, progressive, and multicultural literature—to survive. Additionally, Amazon is harmful to local economies, labor, and the publishing world."

"Amazon makes no apologies as they move otherwise companies to accept their perdition"

"Behind the rising stock prices, however, is a much darker reality. The company's success has been built on exploiting workers, unfair competition, disregarding environmental responsibility, violating user privacy, and "aggressive" tax avoidance."

"While the Covid-19 pandemic has resulted in mass business closures the world over, widespread national lockdowns have only amplified the growth and profits of the US tech giant. At the end of October, the company reported a record 37 per cent increase in year-on-year quarterly sales, racking up US\$96.1 billion in revenue as housebound customers flocked to Amazon's various online services."

"When consumers and small businesses find a good company to replace Amazon, sooner or later they find that Amazon bought the company and they are again subject to Amazon's harsh rules and regulations. If they don't play strictly by Amazon's rules, Amazon fires

them, cancels them, suspends them, eliminates them, takes away their Amazon privileges, and of course their favorite, terminates their account.”

“There are many, many reasons why consumers and customers hate Amazon. A major reason consumers hate Amazon is that they are increasing the chances of small and locally owned businesses shutting down. Amazon terminated me and my uploaded 290 books were no longer for sale. Try to get your stuff back. Consumers are particularly concerned about independent bookstores being run out of business due to Amazon's large foot in the door of the book industry. It is tough to deal with a monopoly who enjoys being mean to everybody.”

“Meanwhile, the pandemic put Amazon’s workers under huge pressure. At the beginning of the coronavirus outbreak, when extra workers in the warehouses meant that social distancing was impossible, staff were working longer hours to meet surging demand, and workers were not provided with protective personal equipment like face masks.”

“Amazon is a notoriously bad employer,” says Ron Knox, a senior researcher at the Institute for Local Self-Reliance, a US advocacy group. “It has a record of mistreating employees...and [there’s] disturbing evidence of Amazon ignoring and flouting safety protocols during the pandemic.”

“A call for antitrust action: This has led to Amazon making moves that would have been unthinkable even a few years ago, such as implementing a US\$15 hourly wage for all US workers. But on key issues, such as union representation and collective bargaining rights for its workers, Amazon remains unmoved. “

“By contrast, the vast majority of Amazon’s wealth still flows into the pockets of just one person (Bezos owns an 11.2 per cent stake in Amazon), to an increasingly absurd level. “Bezos’ personal wealth increased [so much this year] that he could pay all of his 875,000 workers US\$105,000 each, and he would still have the same wealth he had pre-pandemic,” says Hoffman.”

“Amazon’s unprecedented power, and its lack of accountability when it comes to workers’ rights, wage equality, sustainability and safety, has led many to believe that the ultimate solution lies in the hands of governments, which must regulate the e-commerce and technology sectors for unfair competition.”

“There’s even potential for antitrust action in Amazon’s home market. In early October, the US House of Representatives’ Judiciary Antitrust Subcommittee released a report as part of a 15-month inquiry into the tech industry – and recommended that Amazon be subject to being split up, or other anti-monopoly measures.” Citizens would do well to see how much Amazon has donated to the campaigns of its Congress persons. Are they bought and paid for?”

“A report that came out of the subcommittee could not have been clearer in describing the harms that Amazon has caused rival businesses, consumers, workers and the economy as a whole,” says Knox. “The fact that that report was so strong gives me hope that the new Congress will take up the findings and pass legislation that would make a lot of its recommendations happen, and embolden the antitrust agencies to take more aggressive actions against Amazon and other tech companies. Does Congress have the guts to take on Amazon? “

“Many lawyers are afraid to take their huge legal team on in court.”

“If not the US, government action could come from other jurisdictions. Canada’s Competition Bureau has opened up an investigation, as has the European Commission, the latter of which could result in fines of up to 10 per cent of Amazon’s global profits. Some countries have already acted; in September, Japan’s Fair Trade Commission forced Amazon to accept penalties for violating domestic antitrust laws.”

“Due to the coronavirus pandemic, 2020 might be considered the year that Amazon ‘won the internet’, but if governments commit to take decisive action, 2021 could be the year when workers, consumers and communities reclaim their power from a tech behemoth. I think the whole world would cheer! Amazon sure behaves like a major bad egg.”

“Amazon has a lot of cash available for all reasons and can pay off anybody including your lawyer if he or she will take the money. Cash is a drop in the bucket to the behemoth.”

“When the US Consumer Product Safety Commission (CPSC) filed a complaint against Amazon over the sale of hundreds of thousands of hazardous products, including carbon monoxide detectors that fail to detect carbon monoxide, hair dryers without required protection from shock and electrocution, and flammable sleepwear meant for children.”

“The CPSC wants Amazon to take more responsibility for dangerous products offered by third parties under the Fulfilled by Amazon (FBA) program, in which Amazon stores products in its warehouses and ships them to customers while taking a cut of the proceeds. As the CPSC noted, people "who purchase FBA consumer products on Amazon.com may reasonably believe they are purchasing the products from Amazon." The CPSC said Amazon has a big stake in the game.’

“Amazon always plays hardball. Opponents tempers are flaring. Dave Cullen, one of the authors affected by some recent actions, recently tweeted, "God, how I hate Amazon, now more than ever, as they screw my book."

“Is Amazon a bad company? Why not ask if flies have wings? Same answer! CSRHub, an organization that rates the corporate responsibility of over 17,000 companies, gives Amazon a score of 48 out of 100. That's a pretty mediocre score, just one-point shy of an acceptable rating (over 50) and well short of good one (60-79) or a great one (80-100).”

“People who hate Amazon and there are a lot of them suggest that people shop someplace else Amazon's retail store rivals include Target, Walmart, Best Buy, and Costco. For subscription services, Amazon competes with Netflix, Apple, and Google. “

“In the web services category, Amazon has several rivals such as Oracle, Microsoft, and IBM.” One of Amazon’s biggest worries is that they treat people so bad that with their high attrition rate, they may run out of people. Shop someplace else if you are worried”

“Who's cheaper Walmart or Amazon? As for the lowest prices and everyday value, pricing is competitive between Walmart and Amazon. But Walmart wins. ... They found that if a customer was to purchase identical items from both retailers, Amazon was 10.37% more expensive than Walmart. As of Jun 8, 2021”

“Is Amazon mean to popular writers? You bet they are. They include some of the biggest literary names on the planet, among them Stephen King, Donna Tartt, Paul Auster, James Patterson and John Grisham; a Pulitzer prize winner in Jennifer Egan; and four from this year's Man Booker longlist, Joshua Ferris, Karen Joy Fowler, Siri Hustvedt and Joseph O'Neill. “

“Then there are first-time writers, historians, biographers – all of them part of an unprecedented campaign against the world's biggest books retailer, Amazon. The company deserves the negative attention.”

Heck, they terminated my account for no real reason.

To wrap up this chapter of random ramblings. I thought I would try to conjure up something Dickens might write about the ghost of Amazon Future. Check this out?

Some say Jeff Bezos may become the poster child for how to not run a customer service department. Can the picture on the next page be the Ghost of Boss Bezos Future. The “gentleman” in the picture on the following page describes Boss Bezos without many words. Do you recognize him with his hat on?

Who 'dat?

Chapter 4 Amazon Terminated Me for No Reason for the Second Time.

What's wrong with amazon n

Author Dennis Lehane knows and he writes the following in his hit book, *Amazons business practices are scorched-earth capitalism*.

Amazon is a destructive force in the world of bookselling. Their business practices undermine the ability of independent bookstores and therefore access to independent, progressive, and multicultural literature to survive. Additionally, Amazon is harmful to local economies, labor, and the publishing world.

Here is the link:

<https://socialjusticebooks.org/about/why-boycott-amazon/>

This time my termination (cancellation) came without warning.

I sent this note back to Amazon Content Review as soon as I became aware of it. By this time, I had been spending almost as much time fighting Amazon than on my business of writing books:

Dear Amazon KDP

I was preparing to upload my 291st book titled *The Colt Raised by Goats* on 9/27/2021 when I received a 404 message and the URL changed to terminate.

I thought there was a mistake so, since I could no longer sign on to my account I called an Amazon number and spoke with somebody from

Prime of which I am a customer. He could not help and connected me to KDP (Kindle Direct Publishing). I held for 15 minutes and gave up. Then I went back through my emails and found this message from 9/15/2021. It was the only message I had received about this particular matter. Here it is. Since I can no longer run my business, it looks like it is all yours. I have calculated my expected payment after your note below:

At 11:02 AM 9/15/2021, you wrote:

Hello,

We are terminating your account effective immediately because you submitted titles containing content that is freely available on the web, which is a violation of our Content Guidelines.

You can see the violations reflected in the following title(s):

Should We cancel Student Debt ??? : Americans owe \$1.7 trillion in student debt What should the Biden Administration do about i ;
ASIN:B09DW7DQSR

As part of the termination process:

We will close your account

You'll receive any unpaid royalties you have earned

You'll no longer have access to your accounts. This includes, editing your titles, viewing your reports and accessing any other information within your account

All of your published titles will be removed from sale on Amazon. Additionally, as per our Terms and Conditions, you aren't allowed to open any new KDP accounts.

You can find our Terms and Conditions, here:
<https://kdp.amazon.com/terms-and-conditions>

If you have questions, please reply to this message.

Regards,
Amazon KDP

Please send this response to Amazon's Legal Department.

These are my terms for the confiscation of my business and its assets. My assertion is that by closing down my account unlawfully, Amazon closed my business. Amazon is the only one today in the whole world who can operate my business as it should be run. Your company refuses to permit me even sign on to my Amazon account. Does that mean we have no affiliation at this point?

What you Amazon have in effect done is seized my business named Lets Go Publish! Publishing unlawfully and from September 15, as far as I know, since you have taken all account access from me, you are now operating my business completely and illegally without my permission. Since I do not know what you have done with this absolute control, I expect that you have in essence taken over ownership of my business. After payment, Amazon will be the new owner of my company and you will operate all aspects of the business in the future. I have calculated how much you owe me for this seizure of my publishing assets.

The amount as you can see below is \$76,356,524.40 This is your cost for putting me out of business or stealing my business whichever is the proper terminology. I expect that you will use the same method of deposit that you supply my commissions every month to pay for the business operation which you stole from me.

Michael Connolly, President of Ballinger Publishing a Division of Harper Collins, in 1984 negotiated with me for my first book, The Personal Computer Buyers Guide, which Ballinger subsequently published. Mike was happy to tell me that for each published book at the time, an author could expect a boost in lifetime earnings of \$50,000.

That amount in 2021 dollars is \$131,649.18. Since Amazon confiscated a business with assets per book worth an average of \$131,649.18, the amount due for 290 paperback books from Amazon to Brian W. Kelly of Lets Go Publish! is \$38,178,262.20. Likewise, the amount due for 290 Kindle books from Amazon to Brian W. Kelly

of Lets Go Publish! is \$38,178,262.20. The total due Brian W. Kelly from Amazon for the assets of Lets Go Publish! is \$76,356,524.40. Amazon already controls all of the assets lock, stock and barrel. Amazon will own all of the assets when the funds are deposited in the same account Amazon used to pay for business transactions until it took over my company.

For your information. I signed no contract with Amazon ever and never agreed to your unfavorable business terms. I was a CreateSpace Customer, which Amazon purchased several years ago. Nobody in their right mind would agree to Amazon's oppressive terms. I know that I did not. You treated me fine until the beginning of 2020 when you began censoring my books. The first book was about COVID and then there were eleven others at the time.

The monopoly power you exercise with small shops such as my one-man company is unlawful. Your company is a big bully and you should pay the price for that. By the way, Lets Go Publish! publishes books for other authors such as a prestigious surgeon in Allentown. Dr. Thomas Meade and his writing collaborator in California. I don't think Dr. Meade will be very happy that you cut his book from Amazon future sales. He won't be happy about ho statements either. You may face a lawsuit from him also but that would be up to the doctor.

I send Dr. Meade a statement of his book sales each month. His title is **The Ten Commandments of Calipered Kinematically Aligned Total Knee Arthroplasty: A Primer for the Orthopedic Surgeon and an Introduction for the Discerning Patient.** Amazon used to offer this book in paperback color, paperback black/white, and Kindle. That is three different ISBNs.

Please consider this Brian W. Kelly's letter of intention to sue for payment / damages. At the present time, Lets Go Publish is seeking counsel for the action we plan to commence shortly. So far we have discussed the case with two firms and plan to discuss it with at least two others before deciding on which counsel will represent us. We do not anticipate that this will be a very lengthy process. Of course, prompt payment of the amount due will be the one course of action Amazon may take to avoid litigation.

Sincerely ,
Brian W. Kelly

How does Amazon get away with treating its customers so poorly?

Before I move on to explain my own situation, please know that Amazon account termination is very common and most of the people you read about online are surprised and bewildered that Amazon would terminate an account. Eventually the way they treat their customers, one might expect that Amazon will one day run out of customers. But the fact is there are too many people in the world for that to happen any time soon.

I found the typical surprise, “you’re terminated” story on kboards.com just this morning. They are all sad and all sound hopeless because Amazon is a bully. Here is the first on kboards.com

Hi there,

I woke this morning to find an email telling me that my KDP account has been terminated. I was given no explanation other than there had been suspicious activity on my account.

I am truly baffled by this as I have not really used my account this year at all, I ran a five day promo through select in early summer and that's about it. I haven't sold any books this year as I have not advertised. I have been working on my new novel and had planned to relaunch my other three alongside my new one in January next year.

I have not sold a lot of books to date and am really still learning the craft, so this has come as a huge blow. I have read the violations many times and cannot see anything that I may have done.

I have tried to contact KDP through my account and any message I attempt to send is greeted with a 404 error meaning I cannot send a message! I cannot find an alternative email address to contact them and at this moment I'm literally stuck, they have no way of contacting them by phone and I can't send a message because my account is terminated, don't know why it's terminated and can't rectify the situation because I can't get in touch!

Can anyone help me in any way?

Much appreciated and thanks for taking the time to read this.

In another post a good Samaritan trying to help, wrote in a post in the same kboards.Com thread the following helpful message:

“If there is an error, and it hasn't been corrected by now, the only recourse is the Jeff at amazon dot com email. A team will get the message, not Bezos, and they can look into it, see into accounts and everything. If there was an error, they're the ones to fix it. If not, then the account is gone, whether the OP knows why or not (they would have gotten an email, likely a week or so ago, about account issues, then one terminating the account”.

I tried the Bezos thing but it did not work. Maybe Jeff regrets trying to help people he has harmed. I don't know.

Business Insider magazine interviewed Amazon executives and this is what they had to say:

"Customer trust is one of Amazon's top priorities," an Amazon spokesperson told Business Insider. "To protect that trust, we take a number of actions, including closing accounts that have violated our policies. If a customer has a question about their account, we recommend they contact customer service so we can investigate and take appropriate action."

I called Amazon 24/7 customer service

I spoke with a wonderful representative who tried to connect me to KDP which is the area she said was responsible. She came back and informed me that they have no direct line but she would help me contact them. She said I would have to sign on to KDP. I told her my sign on had been revoked. She was puzzled and told me she would send me a link that I could use.

Message From Customer Service

Hello,

If you'd like to contact Kindle Direct Publishing, please click on the link below:

<https://kdp.amazon.com/contact-us>

Best regards,
Tdeha B

Amazon.com

I changed her name so she would not be punished.
I could not sign on.

She stayed with me and kept trying and finally had to admit there was no way to get me through to KDP Customer Service, apparently a protected entity at Amazon

Message From Customer Service

Hello Brian,

This is XXXXX, the Amazon Agent you spoke with earlier.

It was my pleasure assisting you today.

Thanks for your warm and friendly approach throughout our phone

conversation.

I hope my efforts to resolve this issue has been satisfactory, if there is still something that I missed to mention or I could still do to assist you with this issue, please let me know.

We look forward to seeing you again soon and hope you have an amazing day.

We'd appreciate your feedback. Please use the buttons below to vote about your experience today.

Best regards,

TXXXXX B

Amazon.com

Nothing she did could get me closer to a resolution. I gave her good grades on the customer service post call evaluation for she tried her hardest but had no tools given to her by Amazon to resolve my issue. Amazon does not apparently care about customer service. Or perhaps my sins, which have not been told to me even yet, are so severe that I needed to be canceled and Amazon was the judge and jury even though I never signed a contract with Amazon. I was a CreateSpace customer and Amazon bought CreateSpace.

What I have learned is that in every facet of its business, Amazon has little regard for customers and has no problem destroying small businesses across the world (at least the US) for small infractions of their tons of regulations. Or perhaps if that is not the case, Amazon has no regulations and they lie and lie again to get their way. I think that is more like it.

Let me recap the customer service call because it says a lot about whether Amazon cares at all:

I started by calling a 24 hr. a day Amazon customer service number.

Can I talk to anyone at Amazon?

When you access the “Contact Us” page, you can chat with Amazon's customer service chat bot or a representative to discuss the issue. You can also call **Amazon customer service at 1-888-280-4331** if you live in the US.

10/6 nice person named XXXXX answered and I asked to talk to Kindle Direct Publishing (KDP). She called them and talked with them and came back to me and said that the kindle people told her that there was no direct line to kindle. They told her to have me sign on to Kindle and take it from there. I told her that was the problem. I am trying to talk to somebody about my account being terminated and since it is terminated, I cannot sign on.

She said I had to sign on to kindle to talk to them. I said I can't sign on because they terminated my account and she said she can't put me through. So I asked her if she could give me the Kindle mailing address in Pennsylvania or any warehouse of Amazon's in Pennsylvania. I have been holding 9:39 AM or five minutes. She came back about 9:43.

She tried talking to Kindle but could not get anybody for me. No help from kindle according to customer support.

She could not find a kindle address in Pennsylvania or a warehouse address in Pennsylvania

She said there is no direct line to kindle. She asked me to go to Google and look up Amazon.com. I did and it told me to sign on to KDP at the bottom of the screen. It was different than my normal KDP sign on. But when I tried, it said I was terminated. Amazing! I would not run my business this way.

Amazon should be ashamed but they are not. They are simply bullies—who for many customers, they simply take their ball and go home. That may work for kids but they should treat adults with some level of respect.

Chapter 5 Facts for Amazon Sellers. Attorney

I wrote this document to my attorney for the preparation of the case against Amazon

I used Amazon Sellers.Attorney to consult regarding my reactivation et al.

They are very knowledgeable in how Amazon operates and were most helpful to me. I agreed to the demands they made on my behalf. I submitted them last Monday. We are waiting right now for an Amazon response.

I began the process by taking a first cut at my demand for justice from Amazon. The first document is (below). It is what I felt I needed besides account reactivation

Information for Lawyers

I would like to propose a resolution to our conflict short of Amazon paying me \$77 million which I calculated in the last chapter for all of my titles and for taking-over (seizing--stealing) my business. Right now, the remuneration of \$77 million for the fact that Amazon has seized my company's operations is my best bet at finding equity to my unfair treatment. But I would prefer a more expeditious path to resolve our differences.

Since this is my second time in the penalty box with Amazon, one of my top demands is that this agreement be structured so that I never have to go through this cancellation / termination process again My business has been out of business for no reason at all going on two months now, simply because Amazon said I used information available on the Internet in my newest book. More on this later.

My recommended solution is partly based on the fact that Amazon does not like free speech—especially conservative thought such as Trump books and COVID therapeutics as the company has blocked / censored these books in the past. To assure that we are never in conflict again if we can reconcile to account reactivation, I would agree to no longer publish any books with Amazon KDP or any other company owned by Amazon.

I might suspect that Amazon would be happy not having me as a customer because of my past titles such as *"Taming Amazon: The Biggest Bully in Town --This big bully blocked eight books in 2020 by the most published non-fiction author in America.* Ironically, Amazon Content Reviewers found nothing wrong with this book and marketed it for about six months before recently terminating my account.

As an aside, I never agreed to Amazon reviewing my content. As far as I am concerned that no other printer including Bertelsmann (Offset paperback) demanded that to print my books they had to be able to approve of the content.

CreateSpace, the company that Amazon bought out would accept my manuscripts, provide me with a cover creation and print my books

when ordered. There was never a hassle. Amazon did not change my CreateSpace Contract when it bought out CreateSpace. I am the publisher. My company is Lets Go Publish! Publishers and I do not need Amazon editors or any other service such as the typical things that my company as an independent publisher provide for my books and others that I publish. In other words, I am the Publisher—Not Amazon. Amazon is not and never has been the publisher of my books. They print them, market them, and distribute and they are the only services I authorize.

For me to end this termination right now, I would need a number of assurances:

1. Immediate reactivation of my account. Open my account. I agree to not add/modify book files.
2. Amazon agrees that if I stop publishing with Amazon, it will never shut down any title or shut down (terminate my account) again. This should never happen again with any other title which currently exists in my files. I will add no more titles.
3. I would need reimbursement for the revenue lost from censored books. Best estimate. There are 12 to 15 books that have been censored
4. Amazon must provide compensation and damages since my books have not been marketed for almost a month. I would start the numbers for five weeks from September 15 to October 19 at \$750.00
5. All blocked (censored) books for any reason should be reinstated and immediately made available for sale.
6. I would suggest some punitive compensation, though nothing close to the millions it will cost you otherwise for putting me through this ordeal. If we can resolve this case soon, I will not make this demand.

This is what I will give up.

I will give up the demand for \$77 million for your temporary seizure of my business. I will not publish another book with Amazon. I will not update a book in Amazon.

This should resolve any concern you may have for the type of books I write as no new books of mine will be marketed by Amazon. I will not seek damages for free speech violations. It would also resolve the

problem of my using facts available on the Internet within my books since no more books would be published by me through Amazon.

This agreement would return all parties back to where we were before my unlawful account termination and should require no additional technical work on Amazon's part once the terms of the agreement are accomplished.

Thank you for your attention to this matter

End of recommended settlement

One of my last notes to Amazon follows. They stopped responding

After this note, I have placed a summary of what I would like in addition to reactivation and then other information

Dear Amazon Customer Service

This is also a reminder of requests for contract copy and for the name, address, etc. of Amazon Legal counsel, and other such requests.

I have some things I would like to say on my own behalf before I make an offer that would be acceptable to me and hopefully will be acceptable to Amazon.

You realize I am sure of the impact you are having on a one man shop—my small business, which I call *Lets Go Publish!* From my perspective, your company has seized my ability to continue as a business by blocking all access to my manuscripts and other information, and by not giving me an easy egress to another platform.

It took well over thirty years to have written more than 290 books and as a sole proprietorship all of the sweat from my efforts from my perspective had been worth it until now. There is no reasonably easy way for me to continue other than to start over and at 73 years old, that really is not an option for me.

You can go out to my web site, letsgopublish.com to see in the lead article each of the 290 + books I have published and I ask you to imagine the work that it has taken to amass such a catalog. There are technical books that I wrote and rewrote since the 1980's as well as 75 sports books from Notre Dame to Penn State, to Alabama, to Clemson to the Philadelphia Eagles to the Pittsburgh Steelers, to the world champion Kansas City Chiefs and the current Super Bowl Champion Tampa Bay Buccaneers and many others. My books are first class.

Over the years, I have also written human interest books and political books and books about COVID etc. I have an extensive library as you will notice. I have instructed Amazon over the years to send paid copies of author books to coach Brian Kelly from Notre Dame, Coach Nick Saban from Alabama, Coach Andy Reid from Philadelphia and Kansas City, Coach Bruce Arians of Tampa Bay and to some special players such as Tom Brady of the Tampa Bay Buccaneers. and many others.

One of my personal favorite books is *Katie Kelly and Her Miracle Voice* which I wrote about my highly talented daughter. After giving a bunch of authors' copies away, I now have just one left and cannot reorder because of account termination. The day Amazon was to replenish my supply with ten copies of this book, instead, you terminated my account and canceled my order.

Another favorite of my home town is *Wilkes-Barre PA: Return to Glory* and another *Christmas Wings for Brian* is about a special gift, and another favorite book, *No Tree, No Toys, No Toot Toot*, is an endearing book about my first son, Brian, and another tear jerker is titled *Four Dollars and Sixty-Two Cents: A Christmas Story that will Melt your Heart*.

Additionally, in my files, I have a color version, a Kindle version, and a black and white version of a book that I produced with Dr. Thomas Meade & Dr. Stephen Howell, titled **The Ten Commandments of Calipered Kinematically Aligned Total Knee Arthroplasty: A Primer for the Orthopedic Surgeon and an Introduction for the Discerning Patient. When Amazon shut down my ability to sign on, it also shut off the ability to order this book.**

I have spoken with four lawyers and they all say the case may have to go to arbitration which is in Amazon's contract. I disagree with that contention. That is not how I do business. It may be how Amazon normally does business but not with Lets Go Publish! As I signed no contract with Amazon ever.

My position is that I signed no contract with Amazon and that your company has treated me as an indentured servant thinking that your company has a right to do so. The termination of my account for no real violation is proof of that.

After using Bertelsmann, Offset Paperback for years, I was convinced by a friend to begin using CreateSpace. I do not recall what I did to sign up with CreateSpace but it was very easy. When Amazon bought CreateSpace, I was not asked to resign any contracts. I just continued as I had with CreateSpace. Their work was much better than Amazon's.

Instead of buying fifty to several hundred books before selling any as I did with Offset Paperback, CreateSpace developed a way to print books when ordered and they charged me nothing if books were not sold. They printed one at a time and paid me my portion for each sale.

Amazon bought CreateSpace and got rid of their cover creators and their whole book production system.

They replaced it with something run by KDP.

On their own, Amazon converted my stuff a few years ago to KDP format from CreateSpace format. .

I recall signing no agreement with Amazon giving them editing or review authority to any of my books. I have asked Amazon to produce a signed contract and so far the company has not sent it because there is none.

A reasonable, prudent person would say that it is harsh treatment to cancel 290 books because some information (facts) in one book's submission (the last book) was/were also available on the Web. If I were to write a history book and noted that George Washington was

the first president or I simply included that phrase in another book, Amazon claims they have a right according to their termination rationale to block/censor my book and also terminate my account and all of the books it represents--in my case, 290 book titles. No judge in a court of law would permit this travesty.

I obviously contest this and I hope to resolve it. I think Amazon does not like some of my titles (books) such as *Stolen Election* and they think I am too conservative for Amazon to publish. I did not give up free speech by joining CreateSpace, nor would I have under any circumstances.

Yet, I contend that Amazon has no rights over my book content other than to print, market, and distribute. I am not a rookie. In fact, I am the most published non-fiction living book author in the USA. Why would Amazon not fight to gain such a person in their stable of writers?

They can't believe I am that rogue if rogue at all. Consider that I have very few returns on my statements and typically for a hundred or so books a month, I have zero returns. Somebody likes what I am doing. I hope I do not have to rely on the court system to find justice and fairness but if we can't agree, we will see.

I would like to propose a resolution to our conflict short of your paying me \$77 million for all of my titles and for taking / over (seizing--stealing) my business.

Right now, the remuneration of \$77 million for the fact that Amazon has seized my company's operations is my best bet at finding equity to my unfair treatment. But I would prefer a more expeditious path to resolve our differences.

My solution is partly based on the fact that Amazon does not like conservative thought such as Trump books and COVID therapeutics as you have blocked / censored these books in the past. So, I might suspect that Amazon would be happy not having me as a customer because of my past titles such as *"Taming Amazon: The Biggest Bully in Town --This big bully blocked eight books in 2020 by the most published non-fiction author in America.*

So here is a summary of my proposal For me to end this action right now, I would need a number of assurances:

1. Immediate reactivation of my account. Open my account. I agree to not add/modify book files.
2. Amazon agrees that if I stop publishing with Amazon, it will never shut down any title or shut down (terminate my account) again. This should never happen again with any other title which currently exists in my files. I will add no more titles.
3. I would need reimbursement for the revenue lost from censored books. Best estimate. There are 12 to 15 books that have been censored
4. Amazon must provide compensation and damages since my books have not been marketed for almost a month. I would start the numbers for five weeks from September 15 to October 19 at \$750.00
5. All blocked (censored) books for any reason should be reinstated and immediately made available for sale.
6. I would suggest some punitive compensation, though nothing close to the millions it will cost you otherwise for putting me through this ordeal. If we can resolve this case soon, I will not make this demand.

This is what I will give up with Amazon's agreement to my proposal.

I will give up the demand for \$77 million for your seizure of my business. I will not publish another book with Amazon. I will not update a book in Amazon. It would also resolve the problem of my using facts available on the Internet within my books as no more books will be published by Amazon.

This would return all parties back to where we were before my unlawful account termination and should require no additional technical work on your part once the terms of the agreement are accomplished.

I would like both parties to be able to make small amendments (agreed to by both parties) to the agreement prior to its full acceptance without harming what has been accomplished.

Thank you for your attention to this matter

Sincerely,

Brian W. Kelly

Chapter 6 After I Realized I Was Terminated

Author J.A. Cipriano above has self-published nearly 90 books through Kindle Direct Publishing. Source: J.A. Cipriano

Finance.Yahoo.com published a great article titled: *“Amazon self-published authors: Our books were banned for no reason.”* Your author Brian W. Kelly would recommend that you read this article and other great articles and books so you can fully believe the sleaze operation run by Amazon. Ask Elon Musk a first rate billionaire who bequeathed Bezos the Silver Medal of billionaires while he plainly captured the # 1 prize, hands down. Elon Musk’s thoughts on Amazon are pithy and succinct. He thinks they should be broken up.

To help you complete your perspective on a sleaze company, Amazon is run by millionaires and billionaires for millionaires and billionaires and to hell with everybody else. Elon Musk would mix in well with regular people. Too many know Jeff Bezos, aka Boss Bezos as the scum that he is.

His company hurts the little guys like me. Just in recent weeks, Amazon (AMZN) has taken down e-books written by at least six self-published novelists who like me, say they did nothing wrong and like

me depend on the platform to make their living. Those six novelists told Yahoo Finance a tale worth repeating to a public that ought to know Amazon the Sleaze if they do not already!.

These six of many authors “screwed” by Amazon published many of their books through Amazon’s online self-publishing platform called Kindle Direct Publishing Select, and they felt and then expressed their shock and frustration over losing their livelihoods without understanding why. I felt the same and that is why I did something about it but I too need an honest courts system to hear grievances of small vs humongous. I count on it.

Amazon terminated me in September—the 15th for the second time and I did not even know it at the time because my inbox is littered with Amazon emails. I have received 9 488 emails from Amazon. So, I missed the one that canceled me. I was not expecting a problem with Amazon so I was not looking for my account termination when it arrived.

What kind of company screws you and then lets you find out through other means? I guess it must be a Bezos company not an Elon Musk company. It helps to be someone God loves and JB, the oligarch will never learn that lesson.

To help you know what Amazon customers face when doing battle with the behemoth, it all comes from the Bezos philosophy. He was married 25 years and played around with another man’s wife. Sweet. The part that is hard to understand is why no prenup as the faux pas may cost Bezos a cool half of his fortune. Could not have happened to a nicer guy. Humph!

I encourage a read of some of the best books about Amazon and Jeff Bezos. The first is the Everything store and the second is just as smarting. It is sold by Amazon, really. Brad Stone has not had his account terminated.

Here are some quotes from Stone that give you a feel for why Jeff Bezos is not God’s favorite child – IMHO.

1. "I'm sorry, did I take my stupid pills today?"
2. "Are you lazy or just incompetent?"
3. "I trust you to run world-class operations and this is another example of how you are letting me down."
4. "If I hear that idea again, I'm gonna have to kill myself."
5. "Why are you ruining my life?"

This is from the Amazon site which advertises both books. This blurb is on Amazon from the New York Times

NEW YORK TIMES BESTSELLER

Amazon Unbound: Jeff Bezos and the Invention of a Global Empire

"A masterful book." —Marc Levinson, *The Washington Post*

"A juicy tour of the company Bezos built."—*The New York Times Book Review*

From the bestselling author of *The Everything Store*, an unvarnished picture of Amazon's unprecedented growth and its billionaire founder, Jeff Bezos, revealing the most important business story of our time.

Almost ten years ago, *Bloomberg* journalist Brad Stone captured the rise of Amazon in his bestseller *The Everything Store*. Since then, Amazon has expanded exponentially, inventing novel products like Alexa and disrupting countless industries, while its workforce has quintupled in size and its valuation has soared to well over a trillion dollars. Jeff Bezos's empire, once housed in a garage, now spans the globe. Between services like Whole Foods, Prime Video, and Amazon's cloud computing unit, AWS, plus Bezos's ownership of *The Washington Post*, it's impossible to go a day without encountering its impact. We live in a world run, supplied, and controlled by Amazon and its iconoclast founder.

In *Amazon Unbound*, Brad Stone presents a deeply reported, vividly drawn portrait of how a retail upstart became one of the most powerful and feared entities in the global economy. Stone also probes the evolution of Bezos himself—who started as a geeky technologist totally devoted to building Amazon, but who transformed to become a fit, disciplined billionaire with global ambitions; who ruled Amazon with an iron fist, even as he found his personal life splashed over the tabloids.

Definitive, timely, and revelatory, Stone has provided an unvarnished portrait of a man and company that we couldn't imagine modern life without.

A great free read on the Internet that good be called the Good, The Bad, & the Ugly on Amazon is available for your reading pleasure on Wikipedia.

https://en.wikipedia.org/wiki/Criticism_of_Amazon g about the

By the way, Wikipedia outdid itself on this expose on Amazon. FYI, Wikipedia in its own words is a free content, multilingual online encyclopedia written and maintained by a community of volunteers through a model of open collaboration, using a wiki-based editing system. Individual contributors, also called editors, are known as Wikipedians. It is the largest and most-read reference work in history, and consistently one of the 15 most popular websites ranked by Amazon's Alexa; as of 2021. One might say this story about Amazon came right from the horse's mouth.

Besides this and the Brad Stone books, there are many other books and articles about Amazon. The behemoth has as many good stories as the Naked City. Hopefully the book you are reading is one of them.

Termination is not a big deal for Bezos

For the thousands of Amazon customers / clients who receive their cancellation notice from Amazon telling them they are no longer welcome, it is a big deal. For some, it is earth shattering as writing books for example or selling products with an Amazon account in many cases has become their life.

I would bet that a number of writers have taken the pipe after losing their Amazon account for no apparent reason. For example, I would bet there are a lot of unreleased headlines like the one that says:

Family blames Amazon for man's death in \$6.5M suit

Trying to find such accounts I had little luck I admit but I know the pain of losing my Amazon account after I had believed it was a

permanent thing and that being a good writer was all that was needed to keep it. I was wrong. Amazon is that bad.

This email from me to Amazon was my first in this termination debacle. It also contains the notice of termination from 11:02 AM on 9/15/2021. Not having any issues with Amazon in September, and receiving a lot of order notices from Prime and solicitations from various parts of Amazon, I missed the termination notice and did not know I was terminated until I was uploading my new Book “*The Colt Raised by Goats*.” I could not upload the new book because my sign-on had been deleted by Amazon’s Content Review Team. The book is still not published because I am working through account reactivation and I am contemplating a major lawsuit against Amazon.

This is my second termination. The first time came because Amazon did not like the arguments I had put forth when they blocked one of my books. Blocked is an Amazon euphemism for censored. I went through a few sincere *mea culpa*’s and I got my account back. It is over a month on this second termination and as of today, my account is still terminated.

This time, as noted the termination came without warning. Nobody from Amazon took the time to call me or to assure that I had received their message. For something so serious, I would have handled it differently.

I sent this note back as soon as I was convinced that the termination was not done by mistake after I first became aware of my termination. I regret that recently it seems that I am spending almost as much time fighting Amazon than writing the kind of books I enjoy.

Dear Amazon KDP

I was preparing to upload my 291st book titled *The Colt Raised by Goats* on 9/27/2021 when I received a 404 message and the URL changed to terminate.

I thought there was a mistake so I called an Amazon number and spoke with somebody from Prime of which I am a customer. He could not help and connected me to KDP. I held for 15 minutes and gave up. Then I went back through my emails and found this message from 9/15/2021. It

was the only message I had received about this particular matter. Here it is. Since I can no longer run my business, it looks like it is all yours. I have calculated my expected payment after your note shown below:

At 11:02 AM 9/15/2021, you wrote:

Hello,

We are terminating your account effective immediately because you submitted titles containing content that is freely available on the web, which is a violation of our Content Guidelines.

You can see the violations reflected in the following title(s):

Should We cancel Student Debt ??? : Americans owe \$1.7 trillion in student debt What should the Biden Administration do about i ; ASIN:B09DW7DQSR

As part of the termination process:

We will close your account

You'll receive any unpaid royalties you have earned

You'll no longer have access to your accounts. This includes, editing your titles, viewing your reports and accessing any other information within your account

All of your published titles will be removed from sale on Amazon

Additionally, as per our Terms and Conditions, you aren't allowed to open any new KDP accounts.

You can find our Terms and Conditions, here:

<https://kdp.amazon.com/terms-and-conditions>

If you have questions, please reply to this message.

**Regards,
Amazon KDP**

Please send this response to Amazon's Legal Department.

These are my terms for the confiscation of my business and its assets.

What you have in effect done is seized my business named Lets Go Publish! Publishing unlawfully and from September 15, as far as I know, since you have taken all account access from me, you are now

operating my business completely and illegally without my permission. Since I do not know what you have done with this absolute control, I expect that you have in essence taken over ownership of my business -- After payment, Amazon will be the new owner of the company and you will operate all aspects of the business in the future. I have calculated how much you owe me for this seizure of my publishing assets, the amount as you can see below is \$76,356,524.40.

This is your cost for putting me out of business or stealing my business whichever is the proper terminology. I expect that you will use the same method of deposit that you supply my commissions every month to pay for the business operation which you stole from me.

Michael Connolly, President of Ballinger Publishing, a Division of Harper Collins, in 1984 negotiated with me for my first book, The Personal Computer Buyers Guide which Ballinger subsequently published. Mike was happy to tell me that for each published book at the time, an author could expect a boost in lifetime earnings of \$50,000. That amount in 2021 dollars is \$131,649.18

Since Amazon confiscated a business with assets per book of an average of \$131,649.18, the amount due for 290 paperback books from Amazon to Brian W. Kelly of Lets Go Publish! is 38,178,262.20.

Likewise, the amount due for 290 Kindle books from Amazon to Brian W. Kelly of Lets Go Publish! is 38,178,262.20. The total due Brian W. Kelly from Amazon for the assets of Lets Go Publish! is \$76,356,524.40.

Amazon already controls all of the assets lock, stock and barrel. Amazon will own all of the assets when the funds are deposited in the same account Amazon used to pay for business transactions until it took over my company.

For your information. I signed no contract with Amazon ever and never agreed to your unfavorable business terms. I was a CreateSpace Customer, which Amazon purchased several years ago. Nobody in their right mind would agree to Amazon's oppressive terms. I know that I did not. You treated me fine until the beginning of 2020 when

you began censoring my books. The first book was about COVID and then there were eleven others. Recently there have been three more.

The monopoly power you exercise with small shops such as my one-man company is unlawful. Your company is a big bully and you should pay the price for that. By the way, my small company, Lets Go Publish! publishes books for other authors such as a prestigious surgeon in Allentown. Dr. Thomas Meade and his writing collaborator in California. I don't think Dr. Meade will be very happy that you cut his book from Amazon future sales. He won't be happy about no statements either. You may face a lawsuit from him also but that would be up to the doctor.

I send him a statement of his book sales each month. His book title is **The Ten Commandments of Calipered Kinematically Aligned Total Knee Arthroplasty: A Primer for the Orthopedic Surgeon and an Introduction for the Discerning Patient**. Amazon used to offer this book in paperback color, paperback black/white, and Kindle.

Please consider this Brian W. Kelly's letter of intention to sue for payment / damages.

Lets Go Publish! is seeking counsel for the action we plan to commence shortly. So far we have discussed the case with two firms and plan to discuss it with at least two others before deciding on which counsel will represent us. We do not anticipate that this will be a very lengthy process. Of course, prompt payment of the amount due will be the one course of action Amazon may take to avoid litigation.

Sincerely

Brian W. Kelly

Response Amazon Second Email this time the email came from Amazon customer service

Date: Wed, 29 Sep 2021 11:54:08 -0400

To: KDP Customer Support

<support+5003n00002UWycCAAT@kdp-support.amazon.com>

From: "Brian W. Kelly" <bkelly@ptd.net>
Subject: Re: KDP Case #09398676 Correspondence

Thank you for your communication.

Have you sent my response to your legal department? I want this matter resolved as soon as possible as it is very disruptive to my business.

If you have not turned the original note and now this one over to legal counsel, please give me a name and address to whom I can send using either email or USPS.

What a shame that Amazon would treat its #1 non-fiction book author in such a deplorable way.

I believe this action on your part had nothing to do with my content which always sold well on Amazon and Barnes & Noble and wherever your marketing took it.

I do not know why I have been singled out but I see it as a free speech issue among other potential non grievous reasons. You may know from reading my books that I am a Democrat with conservative views and they are reflected in some of my writing. Not all of my books are political.

For example 75 books are about sports topics. My Notre Dame Books for example had been sold at the Notre Dame Book Store for years. People enjoy them. These sports books have no ideological leanings yet they too have been banned for sale with the unlawful termination of my account.

Since the beginning of 2020 when I began to write about the COVID-19 and the value of therapeutics such as hydroxychloroquine, you have censored fifteen of my books. Most people do not write fifteen books in such a time period but I wrote more and my books always sold well with no complaints from readers.

One of the attorney's with whom I spoke read your termination notice and he said that the rationale for termination could have been

exercised at any time as facts that are in non-fiction books are indisputable and would be the same regardless of whether I used a fact in my book and then another author used the same fact in his book.

Perhaps you can share with me how you would know who first put the fact in print, though I do not think it matters. You terminated me not because I was a poor writer but because I wrote content of which you did not approve. As a monopoly, you violated my free speech by blocking / censoring my books.

The lawyer on his own said that if I wrote that George Washington was the first president of the United States, your statement of reasons technically would give you the right to terminate me because surely *George Washington was the first president* is a fact that exists someplace on the Web (Internet). That is the nature of facts. Plagiarism on the other hand is not something that I engage in nor have engaged in and none of my books have been plagiarized as I cite in place as necessary.

In my memo to your legal counsel that I sent yesterday, I noted that I have no contract with Amazon. I signed up for CreateSpace to use that company to print and distribute my books. Prior to using CreateSpace I used Bertelsmann's Offset Paperback POD Division in Dallas and Laflin PA to print my books. The method CreateSpace deployed enabled me to write many more books in a time period because I did not have to buy 100 or 200 books at a time for an economical print quantity and wait for orders and then ship them.

When Amazon took over, I did not sign any new contracts and I never authorized Amazon to check or edit my content as my company, Lets Go Publish! is a publisher and we do that part of the job. We never needed Amazon for that purpose.

As far as I am concerned Amazon merely continued the book formatting, cover designer tools, and the one-at-a-time distribution that made our partnership with CreateSpace a success. My problems with Amazon began when your company decided to edit my material and over about an 18 month period, you eventually found fault with fifteen books and censored them.

In essence you “blocked” fifteen completed books from being available for sale. I was not happy but it was still easier for me to use your services so, though I complained, and argued my point, I did not switch vendors, Amazon cost me a lot of money by censoring my books in an unauthorized fashion.

I humbly request your company to send me a copy of any contract I may have signed that you claim gives you the rights that you assumed you had after you bought the CreateSpace business. I do not believe you will find such a contract with my signature because only a fool would sign up for such a creativity stifling service.

Because I had not studied Amazon and its dealings with writers, I believed that if I appeared reasonable and helpful to the Amazon company, it would be easier for us to come to an agreement over what has become an impasse. As a gesture of good will, since the word on the street is that Amazon offers poor customer service, which my company itself has experienced, as a former professor of Business Information Technology at Marywood University, with a number of undergraduate and graduate courses in Business Administration, I felt if I offered you some free advice it would be helpful to the resolution of this matter.

And so, in this email I included this section headlined as:

Customer Relationships with Amazon

Your company apparently does not care about the customer relationship. I was not a bad customer of yours. I just happen to have a different sense of what is right and wrong than your company does and I do not appreciate being bullied and coerced to follow guidelines to which I never agreed.

Businesses bring the most value when they build an entire **relationship**, rather than just a product or service, around creating value. Generally speaking, the more ways you can bring value, the more loyal customers are to your team, and the greater the sustainable growth your business can achieve over time.

From my observations, Amazon could use a long course in how to achieve and maintain good customer relationships. For example, I did not deserve the poor treatment your team gave to me.

You should already understand the meaning of customer relationships but you choose not to practice it because of your market position in a monopoly status.

You should understand, first of all, the top three most important things to accomplish in a customer relationship. From my perspective, Amazon management missed this lesson on how to conduct business with real customers.

I will take the time below to instruct your company, Amazon, how it should behave when dealing with its customers. I hope you take the time to read it. It may help you in future dealings with your customer base. I would also recommend a public I'm sorry message to your customers, if you decide to change your policies to be more customer-friendly

Most other companies understand that relationship marketing dominates the business world. Other successful businesses know they need ongoing relationships with customers instead of treating them as one-time buyers or treating them like the customer is always wrong.

Though it does not seem so, even Amazon lives or dies based on its customer relationships. For Amazon to make it in the long haul, you must examine what a relationship with a customer entails and emphasize the most important goals for establishing and maintaining positive customer relations.

Here are the three points that make or break companies that are not in a position to bully or strong-arm their customers as Amazon generally does.

1.Trust, 2. Loyalty, 3. Understanding Customer Problems

TRUST: The first element is Trust. Have you treated Lets Go Publish!, my company in a way that we should trust you? Your secret regulation book certainly does not foster trust. Yet, over time,

customers must trust you for you to maintain your success . From advertising to delivery of your product or service, demonstrate trustworthiness and transparency in all of your dealings.

Even if you make mistakes, be transparent about those and show how far you will go to rectify those mistakes. Once customers trust you to be honest and diligent, you have a firm foundation for a customer relationship. Terminating a long-term arrangement even without a contract for a "dubious infraction" surely does not engender trust. It seems that the strong arm approach has worked for Amazon but your abuse of the customer relationship will eventually catch up with your company.

Business Insider recently reported that Amazon burns through workers so quickly that your executives are worried you will run out of people to employ, according to a new report. Though I see our relationship as one of a customer and a service supplier, theoretically because I produce the raw material book cover and manuscript, our relationship, without being employer / employee does have some of the same characteristics. Business Insider might advise Amazon that you might run out of contractor / clients such as Lets Go Publish! who are willing to produce or make available products to your organization. Think about that. Then what?

LOYALTY: By showing loyalty to your customers, it stands to reason that they will develop loyalty for your business. Right now if you read Internet articles about independent authors, you will learn that most are looking to jump ship from Amazon because of poor experience as customers. They hope to exit as soon as a good enough deal comes along.

From my experience, Amazon does nothing but intimidate rather than engendering loyalty. Gaining loyalty is a long-term solution for your company. It should be one of the main accomplishments you strive for in your customer relationships. But, you choose not to do so now. I am an example of how poor your customer concern is.

This will bite your company in the end. You should reward customers for continuing loyalty instead of punishing a company that has produced 290 books with no problems other than disputed regulations.

You should notify customers such as Lets Go Publish! regularly, of new offers, products, services as well as upgrades to previous offerings. This constant communication will remind customers such as my company of the satisfaction they may have found in dealing with you in the past.

Surely, you know if Lets Go Publish! were to receive a customer opinion survey, your grades would be failing in both trust and loyalty at this time--unfortunately the same goes for most of your customer base. You can do lots better.

UNDERSTANDING CUSTOMER PROBLEMS: As bad a job Amazon does in giving a reason for trust and fostering loyalty, there is no lower grade than your marks for how concerned you are about your customers' problems. You do not care to solve problems for customers. You create additional problems.

Customers such as Lets Go Publish! come to you to satisfy needs, resolve difficulties or find new ways to do things for themselves. Your basic services provide most of this fine but your customer contact is atrocious. Your lack of caring for customer problems is the first thing your customers notice. You seem to focus exclusively on what customers can do for you or better yet, must do for you based on your rule book of oppressive regulations, by buying service from you.

Instead, you would be a far better company if you took the time to understand customer problems. How would you like it for example, if when you signed on to your Amazon account on a given day with the purpose being to give Amazon more business--to provide another order (in my case a new book) and then you learned that your sign-on had been revoked without notice. Worse than that, for such an important action—termination, Amazon did not respect you enough to call or to notify you in some other way. You quickly realize you cannot sign on but there is no reason given. So, what do you do?

You might choose to go back through all of your USPS mail and your electronic correspondence. In my case, this resulted in my finding that twelve days prior, I had received a short seemingly innocuous note from Amazon. Since I buy from Amazon Prime all the time, and Amazon is always soliciting my purchasing account for deals, my in-

basket is always littered with notes that are solicitous and information bearing. Nothing in this particular note called my attention to it so I did not take the time to delve into that particular note because I was in crescendo writing my next book.

The note you sent was terse and non-descript with minimal headings. It basically said that you are no longer a customer and it did not do a good job of even explaining why? How would that make you feel--like a valued customer? Customer relationships are about good feelings--not about creating insurmountable issues for your customers.

Your notice offered no help in the form of a product or service that could readily solve the problem presented. Just a note that basically said this is your third strike and “hah hah!,” you're out. “You're outta here.” Yes, your note seemed to express glee that a long-time loyal customer had just been eliminated. Who does such form of communication benefit?

Based on this and other actions I have experienced from your censoring of thirteen titles (now 15) in less than two years, I certainly do not think that Amazon cares about my problems. And, now, having two-hundred ninety book titles the most non-fiction titles from an author in all of America, that one day were for sale and that the next day they were not for sale.

Moreover, your note basically informed me that my books never would again be for sale where customers can readily find them. Your message was clear and there was no I'm sorry attached because the writer of the note clearly was not sorry.

Why did Amazon do this? Beats me! If I ran Amazon I would like to have every author be my best author in terms of sales. That makes business sense. I can only guess--but I think in my case it is because Amazon does not like how I think and their thought police decided I had to go (be eliminated from the Amazon author fold) even though in terms of titles, I bet you I am Amazon's most successful (in terms of # of titles) non-fiction author in America.

Since this is the case, as a monopoly, working on behalf of the Democrat Party and the Democrat controlled US federal government,

you have violated my free speech rights as stated in the First Amendment to the Constitution.

Please prove to me I am wrong or write on that. Please. Amazon management should know that customers who perceive that you care about their problems will form lasting relationships with you and your business. You fail miserably and consistently and your customers know it because you show it to them every day.

In fact, your customers such as Lets Go Publish! feel that you tell them every day "Frankly My Dear, I Don't Give a Damn" That, dear Amazon is not how to run a company that prides itself in its customer relationship.

End of Section Customer Relationships with Amazon

I wrote all this to show you I am a caring person. I am simply getting a raw deal from Amazon but I will fight it tooth and nail because I am in the right. I expect a judge in Luzerne County will rule in my favor soon and he or she will award me the full rate per title that I outlined in my prior note. That is about \$77million.

Despite the high amount of the proceeds, I do not want to go through this. It certainly does not serve Amazon well either, and in my judgment is that it will cost you more millions the longer you wait to make this right for me.

For me to end this action right now, I would need a number of assurances:

1. Immediate reactivation of my account. Open my account. I agree to not add/modify book files.
2. Amazon agrees that if I stop publishing with Amazon, it will never shut down any title or shut down (terminate my account) again. This should never happen again with any other title which currently exists in my files. I will add no more titles.

3. I would need reimbursement for the revenue lost from censored books. Best estimate. There are 12 to 15 books that have been censored
4. Amazon must provide compensation and damages since my books have not been marketed for almost a month. I would start the numbers for five weeks from September 15 to October 19 at \$750.00
5. All blocked (censored) books for any reason should be reinstated and immediately made available for sale.
6. I would suggest some punitive compensation, though nothing close to the millions it will cost you otherwise for putting me through this ordeal. If we can resolve this case soon, I will not make this demand.

This is what I will give up.

I will give up the demand for \$77 million for your temporary seizure of my business. I will not publish another book with Amazon. I will not update a book in Amazon.

This should resolve any concern you may have for the type of books I write as no new books of mine will be marketed by Amazon. I will not seek damages for free speech violations. It would also resolve the problem of my using facts available on the Internet within my books since no more books would be published by me through Amazon.

This agreement would return all parties back to where we were before my unlawful account termination and should require no additional technical work on Amazon's part once the terms of the agreement are accomplished.

Thank you for your attention to this matter

Additional Information

I have no other earned income other than that which comes from Amazon for writing books for a living. I don't want to have to prove that a fact that is on the Internet is not on the Internet because as good as I am even I cannot do that.

Finally, I would like a letter of apology.
I previously made the following request.

Please give me the name, address, and phone number of the Amazon counsel (s) to whom you forward this note and the first email I sent for resolution.

Also, as requested, previously, please send the signed contract under which you are operating. I do not believe there is a contract between my company and Amazon.

Also, if you would like to make a counter offer, first reinstate my account and then use this as an opportunity to do so.

Thank you very much

Brian W. Kelly

Chapter 7 My History Writing Books

I am not the first and I will not be the last person to have a book banned by Amazon unless the company changes its ways in a big way. Amazon has banned books in the past. Those works mostly focused on conspiracy theories and debunking the Holocaust. The Amazon web services also recently banned conservative website Parler from its services, and has de-platformed other conservative websites. Amazon does not think it is necessary to respect America's free speech rights.

This Dershowitz best seller presents the Case Against the New Censorship: Protecting Free Speech from Big Tech, Progressives, and Universities Hardcover – April 20, 2021

Ironically, the book by Alan Dershowitz is available on Amazon.Com though he uses the book to slam Boss Bezos's organization.

thDeseretNews did a recent expose written by Jennifer Graham @grahamtoday on the banning of conservative books. Somehow conservative books, once looked upon as big sellers by publishers have fell out of favor mostly because of the liberal thought police's push for censorship.

Note from Jennifer Graham: The death of Rush Limbaugh, the growth of Newsmax and charges of censorship by Amazon and other book sellers are among the forces shaking up conservative media companies. In this three-part series, the Deseret News examines the challenges facing radio, television and book publishing, and how those challenges might affect the companies and you: the reader, listener and viewer. Missouri Sen. Josh Hawley lost a book deal. "Harry Potter" creator J.K. Rowling lost fans. And now, even as a prospective merger of two large publishing houses in the U.S. is rattling the industry, Amazon is deleting content it deems offensive from the world's largest platform for book sales. That last sentence is why I wrote this book. Amazon thinks it rules the world.

Can conservative authors still continue to speak freely and sell books? Not without finding another CreateSpace when Amazon censors books even long after they are published. Publishers such as Lets Go Publish! says that we must change the way we do business in a culture newly cognizant of the power to "cancel" people with supposedly unpopular opinions. I say supposedly because Amazon is a bully but it is not the majority thinker in the country.

Here is an important opinion by David Bernstein. Read closely please: We can't let conditions directly determine what we publish, but the fact is, with every book, there is always fear that the book is going to be pulled. I had one about Hydroxychloroquine pulled over a year after Amazon began selling it. All Amazon authors feel very vulnerable. We need another platform besides Amazon. David Bernstein is a publisher of Bombardier Books, a conservative imprint of Post Hill Press. He says that conservative fears were realized this month when the book "When Harry Became Sally: Responding to the Transgender Moment," by Catholic scholar Ryan T. Anderson,

vanished from the Amazon website three years after it was published. No, how about that? Amazon does whatever the _--_-- it wants. There ought to be a law!

Here is a statement I wrote to Amazon when a book was blocked earlier in 2020/2021.

I now have 15 blocked books.

Regarding 15 blocked / censored books

You know that I wrote what is in this book regardless of what facts are on the Internet. When an author writes a book based on facts, he or she does research to gain the facts. If the facts are not gained from the Internet, they are gained from books, periodicals and other material often found in libraries. The facts are the facts regardless. When Amazon content reviewers say the facts are readily available on the Internet that is a meaningless argument. They are also available in libraries and other sources. Of course. Some facts become universally known and are available in current newspapers and in many sources on the Internet.

It seems Amazon is looking for any excuse to terminate an account or they are suggesting that books based on facts are not OK for Amazon to print because the facts are available? That would mean that there should not be a literary category called non-fiction. Yet, many books are non-fiction. All but several of my trove of over 290 books are non-fiction.

Why would somebody buy a book if it is non-fiction and the facts are on the Internet or in a library someplace. Well, in most cases it is the author. It is how a given author such as myself presents the facts.

I received a BS in Data Processing and an MBA in Accounting and Finance plus I attended one month of internal IBM education classes for the 23 years in which I was employed. As a faculty member of Kings College, Misericordia University and Marywood University, I wrote a great number of books from researching various sources

including libraries, the Internet, the daily news programs radio & TV etc.

Eventually information becomes commonplace so that authors do not cite their sources as it is common place. Such is the case with the Democrat and the Republic conventions. They were fully televised and most news sources wrote about them without citations because the knowledge was commonplace. Such is the case with my books about the convention. Facts are facts. Yet, Amazon censored my books about the convention.

I have been a faculty member part time and full time and so I am accustomed to teaching. An author teaches when he or she writes a book. Two books about the Civil war for example would be fact based but the books would be different because of the way the author teaches the subject matter. With the same facts, one book would be a light read and the other would be heavy perhaps. Yet, the facts are the same. The author makes the difference and that is why some authors are successful and others are not.

The first book I wrote was in 1984, published by Ballinger, a division of Harper Collins. I then wrote a series of books for John Wiley & Sons. All were tech books in the beginning all non-fiction fact based. My books outsold others and some outsold mine on the same topic. The author makes a difference with the same facts. I have written books for 29th Street Press and MC Press, and Midrange Computing and others. I know what I am doing. People buy my books because they like my presentation style of the facts some which are cited in the books and others which are common knowledge.

It began to take longer to find a publisher or an author's agent than it took for me to write a book so I decided to use my own little company Lets Go Publish! as an independent publisher. I used another of my companies, BookHawkers.com to market these books. Then I heard about CreateSpace which was a great fit and I stopped marketing my own books and CreateSpace printed them. I was not looking for a new publisher that would interfere with my topic selection as Amazon now chooses to do. Without having changed my contract with CreateSpace.

Since 2020, Amazon blocked (censored) at least fifteen of my books. They are still censored. That makes my writing time unproductive. Additionally, Amazon does not reimburse me for the ISBN that was used on each of the books. ISBN's cost money. On September 15, Amazon terminated my account because the content reviewers said facts in my book about student debt were freely available on the Internet. As noted above, this is a meaningless statement because nobody owns facts. They are simply facts. Amazon blocked / censored books in reverse sequence follow:

- 291 The Colt Raised by Goats This book was prepared to load at the time I learned my acct was terminated.
- 290 Should We Cancel Student Debt ??? Americans owe \$1.7 trillion in student debt What should the Biden Administration do about it?
- 287 Hydroxychloroquine Much Maligned Super Drug Many swear by it. Others say it is pure hokum, but does it work?
- 257 FTC Case: LetsGoPublish.com v Amazon Fourth Edition
- 256 FTC Case: LetsGoPublish.com v Amazon Third Edition
- 255 FTC Case: LetsGoPublish.com v Amazon Second Edition
- 250 What America Loses if Trump Loses
- 244 2020 RNC Convention Full Speech Transcripts
- 245 The 2020 Republican Convention Speeches Blocked by Amazon
- 236 The Constitution V The Virus
- 234 Reopen America Now
- 230 When Will America Reopen for Business
- 229 Hydroxychloroquine: The Game Changer-- This book sold several hundred before being censored
- 224 CORONAVIRUS: the Cause & the Cure
- 153 Great Moments in Philadelphia Eagles Football

I never had a problem with Amazon before mid-2020. Fifteen books in just a little bit over one year tells an Amazon story of which Jeff Bezos should not be proud I have a feeling it is because somebody has me pegged as a conservative and Amazon is taking it out on my business by harassing me.

Now, with a book in the middle of this time range *The 2020 Republican Convention Speeches*, which I stripped out 87 transcribed speeches to please Amazon bringing the book from 322 pages to 102, Amazon

continued to block an unprecedented eighth book in the year 2020. Now the total is up to 15. Shame on Amazon.

I regret to say that I have been forced to contract with a lawyer because if you will pardon my frankness in the spirit of 2021, you will not get away with denying me my free speech rights and my rights as the publisher of my books. Amazon is not the publisher. Your job is simply to print, market & distribute my books. I have no contract with Amazon. My agreement was with CreateSpace.

I am a conservative and that's why Amazon is playing games with me

At the time Amazon terminated my account, I had just finished my 291st book. I am the most published non-fiction book author in America. I have over 290 books sold by Amazon and you have stopped treating your loyal customers well.

amazon.com/author/brianwkelly

To repeat, I am the most published non-fiction author in America and this is how you treat me. It is not good business. Why me?

Brian W. Kelly

Reference Information – No plagiarism

This is a notice I put in certain books such as the Notre Dame book called the Great Story of Notre Dame Football. It shows my disdain for plagiarism.

References

I learned how to write creatively in Grade School at St. Boniface in Wilkes-Barre. Way back when, I even enjoyed reading some of my own stuff.

At Meyers High School and King's College and Wilkes-University, I learned how to research, write bibliographies and footnote every non-original thought I might have had. I learned to hate *ibid*, and *op. cit.*, and I hated assuring that I had all citations written down in the proper

sequence. Having to pay attention to details took my desire to write creatively and diminished it with busy work.

I know it is necessary for the world to stop plagiarism so authors and publishers can get paid properly, but for an honest writer, it sure is annoying. I wrote many proposals while with IBM and whenever I needed to cite something, I cited it in place, because my readers, IT Managers, could care less about tracing the vagaries of citations. I always hated to use stilted footnotes, or produce a lengthy, perfectly formatted bibliography. I bet most bibliographies are flawed because even the experts on such drivel do not like the tedium.

I wrote 275 books before a particular Notre Dame book and I also wrote several hundred articles published by many magazines and newspapers. I only cite when an idea is not mine or when I am quoting, and again, I choose to cite in place, and the reader does not have to trace strange numbers through strange footnotes and back to bibliography elements that may not be readily accessible or available.

Yet, I would be kidding you, if in a book about the great story of Notre Dame Football, I tried to bluff my way into trying to make you think that I knew everything before I began to write anything in this book. I spent as much time researching as writing. I might even call myself an expert of sorts now for all the facts that I have uncovered.

Without any pain on your part you can read this book from cover to cover to enjoy stories about the many great events in Notre Dame Football.

This book is not intended for historians but it does teach a lot of history. It is for regular people of all levels of intelligence. It is for people that want to have a fun read, who like smiling when Notre Dame Football is the topic. It is for people who love Notre Dame and perhaps for some ND haters who want some more facts.

There are lots and lots of facts in this book. This book is not for sticklers about the mundane aspects of writing that often cause creative writers to lay bricks or paint houses instead. It is for everyday people like you and I who enjoy Notre Dame because it is Notre Dame and who enjoy football because it is football. It is that simple.

When Notre Dame plays a team and wins or loses, that is a historical fact, but to discover such facts, it does not require fundamental or basic research. The University itself copyrights its material but only so it can say "no" if somebody else's creativity affects Notre Dame negatively. Even Notre Dame does not own well-known facts that are readily available about legacies such as Knute Rockne, Frank Leahy and championship seasons.

The championships and the coaches are well known and well defined, even though many, who may never have cared, think that Pat O'Brien and Knute Rockne are one and the same. Sometimes these same folks might even get Ronald Reagan mixed up with the real "Gipper," *George Gipp*. Some might even think the Gipper is Rockne himself if nobody took the time to tell them otherwise. So what? As the author of this book, I care but it is a sports book. I used a judicious approach to assure that I was not throwing the bull when I was presenting facts.

Nonetheless, this is not a book about heavy math algorithms, or potential advances to the internal combustion engine, or space travel, or the eight elements necessary to find a cure for cancer. So, I refuse to treat this book 100% seriously. If you find a fault, I will fix it. This is a book about sports and sports legends and stories about sporting events that have been recorded seven million times already someplace else. Though I tried for sure to get it all right and I used the work of others to assure so, I bet I made a mistake or two.

What is my remedy for the *harm* if I have made a mistake? I did not write this book to harm anybody. If I did not write this book, would the *harmed individuals* from the book be unharmed. So, at the very least, I can *unpublish* those parts of the book. If any reader is harmed, let me know, and I will do whatever must be done for all to be OK.

If somehow, I did not cite a fact that a person owns or a quote somebody once spoke first, it surely was not my intention. If you find any such instances in this work, I will do my best to cite in place before the next printing or take the offensive fact or quote out of the book completely at your pleasure. Just let me know. This book is built for fun, not to create anybody angst.

I change this a bit each different sports book.

Chapter 8 Is Big Tech the Enforcement Arm of the Democrat Party?

Congress fumbles through antitrust hearing with big tech CEOs

It sure looks like Big Tech is the Enforcement Arm of the Democrat Party. Many Republicans think that it is obvious that something is going on in terms of monopoly power regarding major tech companies such as Facebook, Google and of course the subject of this book, Amazon. Even former President Trump was doing his best squawking about Big Tech (not kind to Trump) less than a year ago when he was president. Trump had made remarks in an interview with CNBC's "Squawk Box".

The question everybody who knows there is a problem in fairness is asking if Facebook, Google and Amazon are too big now and should be broken up. There is no doubt that they have discriminated against Trump and many other Republicans. Heck, they are discriminating against me simply because I am a conservative Democrat.

Republicans are correct that Democrats are colluding with Big Tech and are not trying to create fairness in the social media marketplace. I hear no Democrats complaining about Amazon censoring. Why? Why not?

Why is this important? Big Techs' platforms are the spot that many Americans trust for the truth but there is no truth as they censor conservative thought. You may not think of Amazon as being a big censor but we showed in this book how small independent publishing companies such as Lets Go Publish! Are being censored right and left and often the censoring leads to a loss of their Amazon account and all of their due royalties.

Big Tech is not delivering the real news. They censor real news. For the most part, they get fake news from Democrat media outlets. Big Tech does not censor Democrat fake news because of their collusion with the Democrats. They are on the same team. Amazon hires former Democrat officials and they still have their liberal Marxist baggage and so does Amazon. The people are left with erroneous perceptions because they do not deliver the truth.

The right remedy is potential antitrust actions against companies such as Amazon, who do their best to slant the news against conservatives. Democrats are on Amazon's team so they are not supporting the people on this one. Monopolies are alive for a while and then in a fair system are broken up by the government agencies charged with taking down companies that violate anti-trust laws. Democrats have a newly established love affair with Big Tech and Big Tech gets favors from the Biden government. Big Tech, including big behemoth Amazon will do anything they can to protect this seedy relationship.

The real collusion can be seen by examining the relationship of Democrats and these huge tech companies, because they are always against conservative thinking and for whatever reason they permit bad stories about Republicans but never censor Democrats.

It is well known that there is not a free and fair press today. The press is made up mostly of Marxist oriented liberals and progressives. The liberal / progressive / Marxist columnists don't report the truth. For example, they opined that Trump may have won in his government impeachment battle but they claimed that right after January 6, when they were trying to end his term, that he was already facing a stranger, more wide-ranging, and deeply 21st-century form of public punishment.

Their claim had some truth but it was not the public, it was the Democrat leaders pushing the bad information about conservatives. Their claim was that then President Trump had been canceled by corporate America. Even corporate America selfishly aligns itself with the liberals when it helps their bottom lines.

The Democrat position is that several major pro-liberal companies—including some of the largest tech corporations and sports organizations in the world on their own, effectively silenced, censored, and removed the president and his “Stop the Steal” followers from their marketplaces. This is stretching the truth at best. Actually some of this happened with Democrat urgings. So, some is true but it surely, was not a fair process to censor the president of the United States simply because he is a Republican.

Facebook, Snapchat, and Twitter for no apparent legal reason censored the president’s social-media accounts. Apple, Google, and Amazon then stopped hosting Parler, a Twitter-like facility which had picked up the hosting of the former President as a client. Parler is a social-media alternative to Twitter that gained popularity among Trump supporters because it was a means for him to reach them and vice versa. But, the Democrats ordered Big Tech to shut Trump down and Big Tech always does the bidding of the Democrats. Apple shut down Parler. Think of that next time you buy an iPhone. Yes it is unfair.

Even the Professional Golfers Association (PGA) cut ties with Trump’s National Golf Course in New Jersey. Stripe even stopped processing payments for the Trump-campaign website. Reddit banned the Donald Trump subreddit account.

Moreover, Twitch disabled a streaming Trump channel and Shopify terminated stores affiliated with the former President. It is a consortium of Democrats and Big Tech that are out to hurt conservative thought and prevent the former president from reaching people who might vote for him again. There ought to be a law. Independent authors dependent on Amazon are being censored when their thoughts wander off the Marxist reservation.

YouTube is another a big techie owned by a huge techie, Google. It announced that it was removing all channels that post videos questioning the outcome of the election. How does that help the truth?

Who would ask them to do that? Democrat Leaders of course, are the perpetrators no doubt about it. Even TikTok and Pinterest are removing posts with hashtags like #stormthecapitol and #StoptheSteal. So much for Free Speech. While they are at it, they are canceling the statue of Thomas Jefferson.

Hard to believe folks but the New York City Public Design Commission voted unanimously this week to move a controversial 188-year-old statue of Thomas Jefferson from the City Council chambers at City Hall to where? I'll take it. I love Jefferson.

He wrote most of the Declaration of Independence in 1776 and he was also a mentor to James Madison, a driving force behind the 1787 Constitutional Convention for the US Constitution. Where would we be without Jefferson? Maybe Jeff Bezos would be running America.

Meanwhile, several normal non media companies, including the chemical corporation Dow, announced that they will not donate money to anyone who objected to the certification of the presidential vote. Well, maybe those inclined to think in a conservative way should not do business with anybody who wants to usurp the American Election system by not providing a fair source of information. I know that by censoring me, Amazon is censoring truth.

Conservatives are doing quiet boycotts and Big Tech is lying about being in league with the Democrats rather than giving up half of the country as clients. As expected, Google, Facebook and Twitter have come under increasing scrutiny from conservatives who claim that the platforms discriminate against them and their politics. Amazon is quietly doing its best to earn as much money as possible regardless of whether it hurts the country or not.

The companies have in recent months taken steps to crack down on hate speech and white supremacist content, adding to previous efforts to limit the spread of misinformation. This is all fake crap. White Supremacist rhetoric is a Democrat propaganda notion that is not

taking hold among most Americans. Liberal Marxist white guys seem to be their most ardent believers. That says something.

The Big Tech Oligarchs such as Jeff Bezos and Mark Zuckerberg are playing dirty with conservatives. Besides them, there was a time when Google and Twitter embedded employees with the Trump campaign at one time to help staffers better utilize the platforms. No more.

Those analyzing the 2020 election suggest that the Big Tech censorship hurt but they believe the Trump vote far exceeded the Biden vote and only because of major fraud from Dominion Voting machines and cheating on mail-in ballot counting did Biden get so many votes. There was in essence a fake vote count

The media who Big Tech competes against are surprisingly supportive of Big Tech. For example, MEET THE PRESS, a liberal progressive news outlet says that The Republican Party continues to empower Trump's election falsehoods. No evidence ever is presented but a lot of hard-core Democrats believe the fake news.

With the Democrat Party gaining favors from Big Tech big time all the time, they are reluctant to crack down on the censorship and unfair practices against conservatives. Heck, it helps them. Why would Democrats try to stop it. They need to be out of office post haste for the country to bounce back.

There was a time in Trump's presidency when the Department of Justice, the Federal Trade Commission and Congress were gearing up for antitrust scrutiny of big tech. But, now, with what appears to be an alliance of the Biden Democrat machine with Big Tech, those days of talk of a break-up of Big Tech have long passed.

Even China lined up against the Republicans. Many see the Biden Family Payoffs through Hunter as discovered on the Laptop as a reason why Biden is so pro-China. When he was in control, the former president discussed Huawei, a Chinese telecom company. The Trump government added them to a list of businesses that pose a national security risk, effectively banning Huawei from doing business with U.S. companies unless approved by the Commerce Department. Biden is reestablishing trade with such companies but for some reason, he is holding the line so far on Huawei. We'll see if he doesn't give in to the squeeze.

National experts are urging Biden to continue to ban Huawei but are concerned Biden has a major affinity with China. This causes concern for American Security. Meanwhile the telecom giant Huawei hired Tony Podesta a long time Democrat operative and has initiated a charm campaign to entice the Biden Administration to be more accommodating toward the company. Watch out. From past history with Hunter, it may work.

The experts suggest that to safeguard American national security, the Biden administration must not take the bait. Will Biden listen? On almost everything else Biden has made the wrong decision. Hopefully on Huawei, he will not falter.

Amazon and Big Tech cozy up to Biden camp with cash and connections. Amazon, Alphabet's Google and Microsoft are still among the top five contributors to Joe Biden's candidate campaign committee in the 2020 cycle.

With a framed Joe Biden poster in the background, Amazon.com Inc's Jay Carney (is that name familiar? – Think Obama) made no secret of his long history with the presidential candidate while speaking at a virtual policy roundtable during August 2020's Democratic party convention.

Carney, a former member of the Obama staff (Press Secretary) , is Amazon's public policy and communications chief. He touted the hundreds of thousands of jobs his company has created and joined Microsoft Corp's President Brad Smith as one of two senior tech executives to have a public role at the convention - hinting at Amazon's potential influence on a Biden administration when the Democrat won the White House. He won and Carney is in!

Amazon appears to have taken an early lead making in-roads with the Biden camp, according to data gathered by Reuters from OpenSecrets and campaign finance records, along with interviews with over a dozen stakeholders including anti-monopoly groups, lobbyists, congressional aides, competitors and lawmakers.

Joining Amazon on the donation team are Alphabet's Google and Microsoft among the top five contributors to Joe Biden's candidate campaign committee. I would not say that the fix is in but the fix is in!

Chapter 9 Tell Me About Non-Fiction Books!

You may recall that I had fifteen books blocked, which is Amazon's word for censored. The last book they censored was in mid-September 2021 right before they canceled me and took away all of my rights on Amazon. I write mostly non-fiction books and Amazon said that the facts that were in my book were freely available on the Internet. Of course, facts are facts and I would expect them to be there as sure as George Washington was the first President. Right!

I have done research since then and learned that other independent publishers and writers say Amazon tried the freely available on the Internet trick on them and that it has nothing to do with whether there is a problem or not. Amazon can get rid of any author simply by finding a fact such as George Washington was the first president in a book and then block the book even if the author cites where they found the fact.

It is just an Amazon trick to pare down the number of writers in their writing stable. Anyway, I wrote this mini chapter to discuss the difference between fiction and non-fiction. You see it is not as easy to get rid of a novelist on Amazon because they write about things in their minds, not things that are facts on the Internet. You'll see what I mean in this chapter.

What does non-fiction mean?

Nonfiction is simple. It is anything that is not fiction. It includes any works based on fact or events of the real world. The overall purpose of fiction is to entertain. Nonfiction, even if it is entertaining, aims to inform. Writers of nonfiction works, whether books or essay, want to report on what they know or what is really happening.

Most of us already know that fiction books are mostly made-up stories. They are also called novels. They can certainly have elements of truth in them. However, they don't claim to be true other than facetiously. They do not claim to be factual accounts of a person or event. Nonfiction books, on the other hand, do claim to be truthful. If not truthful per se, non-fiction books can also feature an author's opinion.

To refine my point, we can say that fiction is fabricated and based on the author's imagination. There does not have to be a single fact in a fiction story. Short stories, novels, myths, legends, and fairy tales are all considered fiction. It is true that the settings for the story, certain plot points, and even characters in fiction are sometimes based on real-life events or people, writers use such things more or less as jumping off points for their stories.

The opinion essay (also called a commentary) is a form of creative nonfiction writing. Sometimes non-fiction books are written as a continuum of opinion essays with some fact-based essays sprinkled in. The opinion essay or commentary allows you to do this. You do not have to prove your point conclusively, or state the other half of the argument (no requirement to be fair), but you must present a logical argument, which is based on evidence, facts, and reasons.

Amazon likes to think they are the final word on whether something can be printed or not. Yet, if you ask authors why they picked Amazon, it was because of their tools and that they serve as a printer and a marketer and a distributor for the independent author's work.

Nobody signs up with Amazon to get free copyediting services. Likewise nobody signs up so that the book they labored over will be rejected by an entity that assumes all power. Authors over the years have had enough experience with manuscript rejections by John Wiley & Sons, Harper Collins, etc., and other mainline / mainstream publishers that they did not pick Amazon for blocking or censoring or anything that they can easily get from a mainline publisher. . Here are the top 5 publishing companies. Notice, Amazon is not listed:

Big 5 Trade Publishers

1. Penguin Random House. Annual revenue: \$3.3 billion.
2. Hachette Livre. Annual revenue: \$2.7 billion.
3. HarperCollins. Annual revenue: \$1.5 billion.
4. Macmillan Publishers. Annual revenue: \$1.4 billion.
5. Simon & Schuster. Annual revenue: \$830 million.

That's why companies like the one I own, Lets Go Publish! became publishers in the first place. We either do our own copyediting or we contract. When Amazon gets our manuscript, it is to print, not to evaluate. It is certainly not to reject or "block." This is an assumed power of Amazon's that in reality they theoretically do not have. Yet, they have the power that the person holding the gun has which gives them all the power they need.

And so to have Amazon reject a manuscript because they think it does not meet their standards makes no sense. Amazon's standards do not count in an independent publisher's business life. We are in fact, our own publishers. That's why collectively we are known as independent publishers. Amazon has taken a power they were never granted. This needs to be corrected.

Chapter 10 Why This Book? Why My Books?

Surprise! Surprise!

After writing almost 300 books which were printed and distributed mostly by Amazon over the years, I could not believe the email they sent me blocking my first book in 2020. They said that my new book titled, *Coronavirus: the Cause & the Cure* would not be offered for sale. You see, I thought I was the publisher with my company Lets Go Publish! owning the copyright to the title.

Amazon however, thought they had the right to deny the printing of my books. I never knew that. They made a judgment based on the title, that Amazon only would determine which books about the Coronavirus could be printed and distributed (offered for sale) on Amazon.com.

Here is the email they sent me. There was little explanation and no hope offered as you can see.

Hello,

We are contacting you regarding the following book(s):

Title: Coronavirus: the Cause & the Cure :

Sub-title: Many solutions—but which ones will work?

by Brian W. Kelly

(AUTHOR) (ID: PRI-CVEAP1JHVPK)

Due to the rapidly changing nature of information around the COVID-19 virus, we are referring customers to official sources for health information about the virus. As a result we are not offering your book for sale.

Amazon reserves the right to determine what content we offer according to our content guidelines.

You can find our content guidelines on the KDP website:
<https://kdp.amazon.com/help/topic/G200672390>

Amazon KDP

I asked to become one of the official sources for the book. I was not aware that there were subjects which I was prohibited by Amazon from writing about. I sent this email: I had never granted my printer / marketer/ and distributor the rights to determine my content or determine what books I could publish or not publish. I was the publisher.

Date: Sat, 18 Apr 2020 14:30:51 -0400
To: Kindle Direct Publishing <kindlecontent-review@amazon.com>
From: "Brian W. Kelly" <bkelly@ptd.net>
Subject: Re: Alert from Amazon KDP Content Review

I read your guidelines.

My book is current as of 4/16/2020 and it is not in violation of your content guidelines.

It took a lot of work to put this book out and there are other books out on the subject but none that highlight the cure for the coronavirus, which is the main aspect of my book.

Tell me to whom I should send this book to make it one of the official books.

Amazon is selling a number of books on COVID-19 but none that offer a cure.

My book is non-fiction but it is also opinion. But it is not fiction!

I had previously had another title blocked a few days before this and I had another one titled Reopen America blocked. One was for Internet information freely available on the Kansas City Chiefs and the other one was because I was not an official Coronavirus source. Eventually, The KC book was printed.

So, I sent Amazon another email on 4/18/2020 as follows:

CORONAVIRUS The Cause & the Cure
Great Moments in Kansas City Chiefs Football

Description of issue / inquiry:

I just submitted my 223rd, 224th and 225th paperback books. Why are my books being blocked all of a sudden?

I write non-fiction books and therefore the facts would be the same that I cite as the same facts that are cited in other books. Facts are facts. Do you no longer accept non-fiction books?

Why do you not respond to my emails. Is there a manager I can speak with. Please provide a phone number. With the Coronavirus, I have a lot of time to write but I don't want to be wasting my time on matters such as my books being blocked for unjustified reasons. Please help me. I have enjoyed my time with Amazon and would prefer to stay with Amazon.

I don't know what to do.

Thank you.

Amazon's Response was a put off to delay the process.

Hello Brian,

I understand you have a question as to why your titles are being blocked.

This issue requires input from another team. I've forwarded your concerns accordingly and you will receive a reply from this team within two business days.

Thanks for your comprehension.

Regards,

Jean-Pierre W.

I wrote back in disbelief

I reviewed your guidelines and I reviewed the books available

This book is non-fiction but it is my opinion.

Nobody has a book out with my opinion on how to restart America

I am not describing the virus as you can see. Instead, I am offering my opinion as to how government officials can restart the US economy in a way different from any other.

Please read my book

I have written 225 books, mostly published on Amazon and the amount of time you gave my book indicated you did not read it to know it is non-fiction but it is my opinion.

Must I put opinion on the cover?

Are opinion books illegitimate for some reason.

Please unblock my book. I have a right to earn my royalty on this unique book.

At this point I had three books blocked

Was it because I write conservative books? I did not know to whom to appeal.

Here are other emails about the subject. One I sent to Jeff Bezos, Amazon's owner.

Date: Sat, 18 Apr 2020 19:00:06 -0400

To: jeff@amazon.com

From: "Brian W. Kelly" <bkelly@ptd.net>

Subject: I think Amazon is censoring my books on the Coronavirus

Cc: Kindle Direct Publishing <kindlecontent-review@amazon.com>

Hi Mr. Bezos,

Your company sent me a couple emails recently about two of my new books of which I am very proud.

- 1. CORONAVIRUS: The Cause and the Cure.*
- 2. Reopen America Now!*

These books are non-fiction with my opinion of the cause and the cure and how to reopen America sprinkled in. The turnaround on my publishing submission seemed like fifteen minutes. I saw on my bookshelf that the book I had just submitted was blocked from publishing for arbitrary and capricious reasons at best.

I sent a note to a writer for wired magazine, wired.com. louise_matsakis@wired.com. She had written an article about complaints from small independent authors such as myself about being treated unfairly. I asked her to check out my stuff so that she

could add it to her research and offer that there is nothing wrong with my manuscript. It is fact and opinion. There is no fiction involved. I have yet to receive her response and I am not sure if i will get one.

I then sent the note to her and a cover note to Rush Limbaugh. I think he has the same opinions as I on the material in both books so I was hoping that he would check into this and help me. Maybe Rush will publish my books. I am very disappointed that Amazon wants a play in my content and is censoring it without reading it.

*I spoke with a number of people today and finally I decided to write you. You own Amazon and I suspect you want good people to like your company. I am a good person and you should be glad that I picked your company to print most of my books after say book #30. I have written and published 225 books as of today.
amazon.com/author/brianwkelly.*

I figured I would have to get your corporate address and send you a note via snail mail even though I wanted to forward to you the notes in which I already explained my predicament. Then I thought let me look up Jeff Bezos and to my surprise I found this:

Customers can write to Jeff Bezos using the jeff@amazon.com email address. Amazon CEO Jeff Bezos still personally reads customer-complaint emails sent to him, even though he doesn't reply to many of them, he said during an onstage interview Friday. So, I decided to write to you at this email address. I hope you will read this and maybe read my books on your system and you will know that I am for real and very legitimate and that you will agree that it is unfair for your people to block my opportunity to have a highly successful book on Amazon.

If you need additional contact information, please ask and I will

send you what you need.

Here are the emails that I sent today and the email that I received from Amazon blocking one of the two books that have been blocked in the last several days:

I sent this note to Rush Limbaugh today

Date: Sat, 18 Apr 2020 16:51:21 -0400

To: elrushbo@eibnet.us

From: "Brian W. Kelly" <bkelly@ptd.net>

From: "Brian W. Kelly" <bkelly@ptd.net>

Subject: Would you please check out two of my books on

Coronavirus? I looked up blocked books from Amazon and I found your article. It was nicely written and I have more information to give you. Amazon has been arbitrary and capricious in dealing with me and their action seems like outright censoring. I have no idea why?

I had several hundred books accepted on Amazon before my bad luck with the Coronavirus books the past week.

In the last two days, Amazon has rejected and blocked two books about COVID that I submitted. One is titled CORONAVIRUS The Cause & the Cure. The cure is my opinion shared by others. The other book is Reopen America Now! Which is my opinion after thought and research about the best way to open up America from the shutdown.

The one is a derivative of the other and so I was able to make the changes over a one day period, add a new ISBN and submit for publishing.

I have published about 225 books on CreateSpace and then when Amazon bought them out I began to use their Kindle Publishing Unit.

I get the feeling Kindle's staff did not even read my books as there is nothing wrong with them. They are not scientific but they do represent some opinions which I reference in the book. I wonder if this is censoring because they give me no reason other than they can and it their right to block my books if they feel they want to.

Amazon has given me an author page at

amazon.com/author/brianwkelly. I sell about a couple hundred dollars' worth of books every month and a lot more around the

holidays. My gross for December was about \$1900.00 which is real money. Sales are down with the virus this year but I thought these two books would help me gain new readership.

My daughter told me I should write a book about the coronavirus. I am a proponent of a cure and a prophylaxis called chloroquine and its derivative hydroxychloroquine. Nobody has written a book about that nor a book about the simplest way to reopen America safely.

I thought this was America where big companies could not stop small companies from being successful.

I got a negative response from Kindle fifteen minutes after submitting the book. Unfair!

Amazon chose not to respond to the emails. Instead they sent an email with the same denial / rejection/ block

=====

Chapter 11 The Circular Route to Success

What I am saying is that I figured out another way to get around Amazon's prohibitions about my book.

It never dawned on me that Amazon might just not like that I am a conservative Democrat and Amazon is doggedly liberal progressive. Amazon does not think like normal businesses and so normal customers of their services must suck up to their every whim or be punished even to the termination of their business arrangement. Yes, Amazon is so big it can cut its nose off to spit its face. David Stone wrote a piece I read a year or so ago in August. He titled it "Banned by Amazon after 8 years and 300 books."

Here is a synopsis of it, Written By David Stone

After some back-and-forth emails with Amazon KDP Account Review, I have been informed that my account termination will not be reversed. (They won't say why.)

Let this be a warning to all Amazon KDP publishers, your account is never safe. Not even if Amazon sends you multiple emails telling you that its fine to publish a book.

Your account can be terminated even if there are hundreds of other near identical books available on the store. Even if those

books have been online for years.

As an independent publisher you have no rights. No protections. No recourse.

Amazon can, at any point, for almost any reason, destroy your career as self-published author.

They will also keep your outstanding royalties.

Amazon reviewers made their decisions so quickly that I was convinced that they were not even looking at the content but instead were making the evaluation based on the title and the cover.. I figured Amazon wanted to use liberal sources not conservative sources for books that clearly discussed the issue of the Coronavirus. But even they were not brave enough to say that. Even the bully could not dare tell the truth. They did not ever respond to my request for being an official source of information.

Since I was convinced they were simply blocking me because I was a conservative, I figured if I muted the title somewhat, even if I called the book Blank Title, I could sneak it past the reviewers. I had to change a few thing but basically I submitted the *Coronavirus The Cause & the Cure* book almost exactly as the manuscript was originally written. I made a few small additions as well as an opening paragraph about hydroxychloroquine. The original book had enough about hydroxychloroquine that a new title might suffice. I planned to test my theory by resubmitting the book with the minor changes and a rework of the title.

I also changed the front matter to match the new title. Basically, this is the paragraph that I added:

Does Hydroxychloroquine work? It seems that 2020 so far has been a nightmare that won't end. When it seems like it is over, the end point gets stretched out—often past the point of tolerance.

The next modified paragraph was in Chapter 1 the beginning chapter of the book:

An international poll of more than 6,000 doctors released Thursday found that the antimalarial drug hydroxychloroquine was the most highly rated treatment for the novel coronavirus.

As you can see, it did not take much to trick the reviewers because their review was not legitimate. With the new title Hydroxychloroquine, I had already faked them out. I used another ISBN which cost me about \$10.00 and I submitted the book again with the new title and a new cover. Amazon accepted it.

I thought they would but I admit I did not think it would be this easy. It proved beyond a doubt that there was another reason than content that had caused them to block my book. I submit that it was ideology. I am a conservative. Amazon does not like conservatives to exercise free speech.

Here is the email I received with no hassle after changing the cover and the beginning of the book (shown on the first page of this chapter) to accommodate the new title. I had duped them and it was not hard. Since their approval, before I wrote this paragraph I had sold more over 300 copies and there have been no returns. So, why doesn't Amazon want to make money on my books?

Chapter 12 293 Books Mostly Printed by Amazon

In the year 2020, when Amazon went into gear on its mission to censor my books, I had submitted 21 books for the year by mid-September. For publishing with Amazon just this year. My next book in this year if it were accepted would have been my 22nd for the year and my 246th book. Most of my books are written by me and are printed and marketed as Amazon Books. Now, in September 2021, with Amazon's terminating my account this September, my book total was up to 290 submissions to Amazon and now in late October, my total is still 290 submissions to Amazon but I have 293 books in my catalog in total.

To help the reader understand that I had a long-time relationship with Amazon and had published many books and articles before signing up with CreateSpace I decided to create a file that contained a short description of each of my 293 books. I used a four line description for each of my books but sometimes I needed more. I decided to show the reader all of the books in my catalog, even those Amazon has decided to block / censor. The books are listed below and are numbered in Reverse order from #293 to #1.

Here is a list as of October 26, 2021 of the books that Brian (W) Kelly, at 73-years of age, had released so far. Unfortunately, I am struggling with Amazon as I write this paragraph. I have appealed Amazon's termination and am trying to have my account reactivated after Amazon decided to terminate it on September 15, 2021.

Why did they terminate my account. The early part of this book explains that in detail and explains how this left me with no source of income. But, to be short as I repeat, in essence it is because I used some facts from the Internet – well known facts in my modified book. No second chances. Amazon canceled me even though the book itself was not new. It was a refresh.

We'd all love you to find one of my books that you may like; read its description and then click to buy it on Amazon Prime. Many of my books were also available on Barnes & Noble and other sites. Amazon enables other booksellers to sell books that it distributes. The price is the same for new books as I understand it regardless of from whom you source your favorite Brian Kelly book. If you buy from other than Amazon itself, I make about 40% less but it is worth it for the exposure.

You can't find any of my recent books now because Amazon has all of my books in a censored state. Sorry, this is not what I want. Amazon has all my books censored right now—even those sold by Barnes & Noble after they terminated my account. So, I have been canceled by Amazon Big Tech. I have appealed but it is up to Amazon and my only recourse after the appeal if it is denied is to take them to a court that can solve equity disputes.

Every now and then, Amazon decides to censor one of my books about such topics that are taboo such as COVID-19. Ask Jeff Bezos why? Jeff has almost all the money in the world except for what Elon Musk and Bill Gates have. Boss Bezos has decided some of Brian's books on the Coronavirus and other topics would be better preempted by books that he favors. If you know Jeff, ask him why? I do not think I ever gave him the power to do that as I self-publish. I use Amazon to print and distribute my books and never asked for anything else.

Ask Jeff Bezos to release the censored books. It will be win-win. When the URL below in the list is the same for a few books, it is because Amazon decided not to publish one of them. I don't know why.

Here are Brian Kelly's 293 books—at least most of them.

Lets Go Publish! is pleased to have Brian W. Kelly under exclusive contract. Kelly is the most published non-fiction book author in the entire world. Two Hundred ninety three books-- All written by a native of Wilkes-Barre, Pennsylvania. Just two of Brian's books are categorized as fictional

My Red Hat Keeps Me on the Ground!
Cross Country with the Parents!

Any one of these books would make a great addition to your personal library. I bet you'd like it! They also make great Birthday and Christmas and just plain nice party gifts—especially the College and Pro Sports books.

When Brian is reinstated, you may order any and all of Brian's books at amazon.com/author/brianwkelly. You'll especially love the two children's books above and others in the below list. Plus the new one will be available someplace other than Amazon when I finish the burden of fighting Amazon. The name of the new book before this one is *The Colt Raised by Goats!* I loved writing it.

Most of the following introductory material is also available on www.letsGOPublish.com

The following is written by Brian P. Kelly, Brian W. Kelly's Editor in Chief.

Hi Folks.

Just a few months ago, Brian Kelly finished his Two-Hundred sixtieth book. 259 is a book about Alexa and how to make your own musical paradise with her. His prior two books are about a scandal in Wilkes-Barre Area's School Board that has affected the people. Not bad for his short life so far. Before the How to Write your 1st Book and Publish it Using Amazon KDP, Brian wrote Merry Christmas to Wilkes-Barre PA: "50 Ways" for Mayor George C. Brown to Create a Better City. Brian is always writing.

Brian recently created a book series on your favorite pro football teams—Super Bowl and National Championships. His newest six books are about the Great Stories in College Football Teams and before that he wrote four books about the Tampa Bay Buccaneers and their fantasy 2020 season with Tom Brady et al. This was preceded with a series on College Football Championship Seasons. Before going back to sports books, Brian’s most recent effort had been a book about saving the high schools in his home town from the school board’s wrecking ball.

This book about the local school board is in two parts and both parts are controversial for the local bad guys but the people love it. Part I is titled The Corruption in the Wilkes-Barre Area School District. Part II is titled Chronicle of Inept Governance & Corrective Actions. Both are listed below as separate titles.

Note: Brian’s books are not orderable now while his dispute with Amazon remains unresolved. Amazon prints the books for Barnes & Noble and others so none are available for the time being.

Most of Brian’s Lets Go Publish! books are now available on Amazon, Barnes & Noble, and Kindle. Some are available for free download on LetsGoPublish.com. A Kindle download for any book is much less expensive. Brian set the price on many of his recent Kindle offerings substantially lower than the paperback versions. so more people can enjoy them. Since Kelly signed up for the match program, some books are actually free on Kindle when you buy the hard copy (paperback) from Amazon. Whatever is easier for you.

Book titles in this document are presented in last published to first published sequence. Newer books are available on Amazon and Kindle as well as Barnes & Noble and other fine book sellers. Again, feel free to try amazon.com/author/brianwkelly for a complete list of Brian’s books available on Amazon and Kindle.

From this link, [when it is reactivated] you will see the book cover and read its description. If you like a book that is in our archived area (those with early publication numbers) and you can’t find how to order it, give us a call or send us a note and we’ll see if we can find it for you. We have an ample supply of older books not originally published on Amazon. We sell them over the phone.

Brian still cannot believe he has written so much in his life, and he thanks God that he is still feeling well.

Almost all of Brian’s books are first run but some are enhancements of Classics such as “The Land of Fair Play.” Others are great reading for parents to lull their children to sleep at night. Lets Go Publish!, the publisher of most of these works, once used a local printer and so when he began to use Amazon, Kelly sometimes changed the shape of the books from Lets Go Publish standards of the day to meet the better 6” X 9” printing scheme, which Amazon likes to use.

When inside of each of the books that were uploaded in the 2016 era, Brian gave them the once over for spelling and anachronisms—especially the tech books. So, these books have been re-issued under Amazon and thus you may see them repeated on the list below. Unless you want Brian's original thinking on a matter, always choose the most current book title. Again, send a note if you want an archived book.

In December 2017, Lets Go Publish! and Brian Kelly went through all of his books and we found that Brian had actually published more books than he had originally listed. At one time, he was producing books so quickly that he lost his count. Most of the books that had changed sizes when modified were re-released with different ISBNs. ISBN officials always want major changes to be represented by a new ISBN number. For the publishing industry, this constitutes a new book. Here is the current list of Brian Kelly's books which include originals and some re-dos. Thank you for enjoying Lets Go Publish! books. We really do appreciate your business.

Thank you for visiting the Lets Go Publish! Site.

The books are in reverse # of chronology of when written.

Our recent major effort which has just been completed was to place the book URL as another line in the short book description. We have done this to all of our books shown below except those to which the URL has not yet been assigned. Where you see the full URL which includes the ISBN, you can take the link to Amazon and read the online book description directly from this document. As you reach the bottom of the list, you will see that an original book was not necessarily published on Amazon and so we show a URL to access the most current version of the book that in fact was published by Lets Go Publish using Amazon facilities from CreateSpace or Kindle Publishing. Very recent books are published by Kindle Direct Publishing (KDP) as CreateSpace, our original Amazon-owned printer, has been taken over by KDP—Amazon-Kindle.

Here is a list as of October 21, 2021 of the books that Brian (W) Kelly, at 73-years of age, has released so far. Since his account has been terminated by Amazon, his books are not back on sale yet.

We'd all love you to find the book you like; read its description and then click to buy it on Amazon Prime. Many books are also available on Barnes & Noble and other sites. The price is the same for new books as I understand it regardless of from whom you source your favorite Brian Kelly book. Have a great life! The best

Brian is currently negotiating with Amazon to have his books go on sale again.

In reverse order of writing / publishing

293 Canceled!

Story of the canceling of your author / publisher from his account with Amazon.

Chapter 13 Amazon Evaluation Factors

Amazon has guidelines which they use as a yardstick to measure the worth of author submissions. Ask yourself, “Who gave Amazon this right?” I know I did not. It was not the authors. This is not appropriate as authors who are independent publishers did not pick Amazon to be an evaluator and in fact were attracted to Amazon because the company at the time offered itself as a friend of independent publishers. Amazon piggybacked on the great reputation of its predecessor, CreateSpace, which never conducted caustic nasty reviews.

Its business plan seemed to coincide with the idea that Amazon’s mission was to help make those who had previously signed up with CreateSpace or who had begun with Kindle Books and who had become immensely successful writing non paperback books.

In my own experience which as of 10/26/2021 had produced 293 book manuscripts. With more than three hundred book sales in the three months prior to my account being cancelled on September 15, 2021, I had been pleased with what Amazon offered in terms of getting books printed, marketed, and distributed.

It has been a two-way street for Amazon because as I poured through my records on Amazon, for the last three months, there have been zero returns. In other words, there has been no rework. No returns also means that customers who purchase my books are satisfied and have not been prompted to return them.

Despite this fact, a measure of customer satisfaction for sure, in 2020 by September, Amazon chose to block, i.e. censor the printing of eight out of my twenty-two books up to that date. I do not ever recall being solicited by CreateSpace having signed up for a force beyond my power that would impose itself between my work and my success. It reminds me of a saying from my youth. “Who died and left you boss?” In my case, who died and left Amazon boss? Nobody. Amazon is not entitled to the power over content into which they impose themselves.

Who knows how many have died but if there is one who died because of Amazon’s ruthless rules and regulations, it is one too many. Ask the family of Billy Foister, a 48-year-old Amazon warehouse worker, who died after a heart attack at work at Amazon.

Billy’s brother is “plum upset” at how his brother was treated. He should not have died. According to his brother, he was told by an Amazon human resources representative that Billy had lain on the floor for 20 minutes before receiving treatment because the packages had to get through. “After the incident, everyone was forced to go back to work.” The Foisters are not the only victims of Amazon callousness. Wherever you turn in an Amazon facility, there is a story like Billy’s. If you take on Amazon you can expect to be canceled. Billy Foister died because Amazon was a bad boss.

Think of how long it takes to write a book. When my censored total was eight books and not fifteen, two of the blocked books, which were sports books, were over 400 pages each. I had invested a lot of time in them. Four others were COVID fallout from an unwarranted censoring of all my COVID-19 books, and two were free speech violations because Amazon thinks that convention speeches that are freely available on the Internet as facts, commonly available facts, with a Brian W. Kelly presentation style were not worthy of normal Kelly

readers and they felt they had a right to censor them. Your author politely contests this assertion.

Would you have signed up for a non-publishing house to print your books if you knew they withheld for themselves the arbitrary and capricious power to deny 8/21 of a year's book writing production. Who can make a living when almost 1 of every 2 books is blocked from printing out of the blue, by an unfair organization using illiterate reviewers who do not understand the differences between fiction and non-fiction.

If the Philadelphia Eagles for example, won the Super Bowl several years ago and yours truly as an author wrote that fact in my book about the Eagles, Amazon would take the fact that somebody else had reported the fact that the Eagles were Super Bowl Champions as reported in other media forms and on the Internet as proof that I was not the author of my book titled Great Moments in Philadelphia Eagles Football. Likewise for the Kansas City Chiefs, this year's Super Bowl Champions. If I quoted the US census as 328.2 million, this fact would also be available someplace else. Nonetheless it is a publicly available fact. Besides Amazon not having authority to block a book from its customer, Amazon's content reviewers are not competent.

Does a book that uses such facts as a small percentage of its book content be worthy of censorship on Amazon? Of course not. Facts are facts. Yet, the Amazon reviewers do not know the rules for fiction v non-fiction and the authors/ independent publishers are paying for Amazon's hubris and incompetence.

The only reason Amazon gets away with it is because of restraint of trade as they have become a monopoly. They exercise power without authority as bullies because of their monopoly. I would typically not care about that but when eight books are censored out of 22 submitted for printing because Amazon does not like my conservative ideology, I have reason to complain and seek relief from my government.

So let's talk about some of the reasons Amazon rejects books.

First of all the four COVID books were because without giving me a test or anything, Amazon determined that my first and second and

third and fourth book about COVID were illegitimate because I had not shown my credentials to Amazon reviewers. But, then again I was not asked for them and Amazon reviewers knew nothing about COVID and I have proof they did not even read my books. I was able to resubmit my first COVID book with a different title and Amazon itself has sold more than 300 of the replacement book, titled Hydroxychloroquine. Think about that.

The other biggie that Amazon reviewers attack is that anything one did not originally write, even though it were cited, or it was common knowledge, Amazon claimed an innate right to deny the printing and distribution of such a work. Yet, no author in their right mind would give away any of the rights to their works to a company who was simply contracted to print, market, and distribute the author's manuscript.

Amazon was hired as merely a book printer and binder, distributor, and marketer, yet it gave to itself the authority to censor books. It had and has no such authority. As an aside, Amazon's censoring is based on a non-professional's speculation for how the public would perceive author's content. Yet, the verdict was already in for if the public were upset with Lets Go Publish! books there would be returns and there are none.

The plain fact is that common knowledge does not need to be cited. Common knowledge needs no permissions. Common knowledge includes facts that are known by a lot of people and can be found in many sources. For example, you do not need to cite the following: Abraham Lincoln was the 16th President of the United States. But, you can bet there are hundreds of places on the Internet and in libraries where this fact is recorded.

So what? If it is in one of my books can Amazon say that such facts are freely available on the Internet and to assure quality of Amazon books, we cannot print a book that has such facts within its pages. Intrinsically we know that such a conclusion is "Bull!"

In last two 2020 books that were blocked for example, these September 2020 offerings were written about the RNC speeches that had been

approved to be given to the public on all broadcast media. In that case, a book such as mine, which broadcasts as RNC speech gains fair use of such material since its printing in my book makes the speech even more public. The author was not writing something for pay.

Thus another media accepting the publicly given speech, helps the speech author and the RNC or DNC etc. by broadcasting the facts they wanted to portray in hard copy media in addition to the Internet and the public air ways.

There are many ways copyright issues may arise during campaign season but rebroadcasting speeches intended for the public is not one of them. I am convinced Amazon submission reviewers attend no classes to determine what can be printed and what cannot. I ask Amazon to prove me wrong. Amazon things it is above the fray and has innate powers granted by nobody other than itself ad the bully in charge.

New media and new technologies provide candidates and citizens with new means and platforms for communication. At the same time, they present some additional considerations for the use of copyrighted materials. Before using a copyrighted work, individuals who deliver such speeches should consider how their use of the work may encroach on the exclusive rights of others and how copyright law, particularly the statutory exception of fair use, may be relied on as an important safety valve for free speech and political discourse.

Who would give a speech and then say they do not want any discourse about it even if it helps the cause for the writing of the speech. Thus permission for use of RNC or unaltered DNC speeches is not required.

For a long time, authors and others have been claiming they have been bullied into submission by Amazon. In an article for example, from December 28, 2011, titled, *“Let's Count All the Ways Amazon's a Big Bully*, the authors lead sentence gives a major insight into Rebecca Greenfield's opinion of Amazon the nasty Bully:

“An accessories company has sued the Internet giant for alleged sabotage, making it the latest in a series of little guys who are calling

the retail giant a bully.” Add Lets Go Publish! Publishers and Brian W. Kelly, your humble author to that list, please.

<https://www.theatlantic.com/business/archive/2011/12/lets-count-all-ways-amazons-big-bully/333771/>

M-Edge claims that it had negotiated to give Amazon a 15 percent cut of all sales in November 2009 during the course of a 3-year contract. Two months later, Amazon wanted 35 percent cut and threatened to removed M-Edge's offerings from the site if it didn't comply, forcing the company, with 90 percent of its profits coming from Amazon.com sales, to pay \$6.5 million in fees.

"This case presented a classic example of unlawful corporate bullying," writes the suit. "M-Edge developed a very successful product line: personal electronic device jackets with multiple features for the Kindle and other e-readers. Nasty Amazon malefactors thereafter repeatedly sought to hijack the product through threats, deceit, interference with M-Edge's customer relationships, and patent infringement."

Amazon is a nasty company with a lot of power and the government should begin to tame this company before it is more powerful than the government itself. On May 28, 2014, for example, Paul Constant wrote about Gawker's Tom Scocca who called for an Amazon boycott. Scocca cited the behemoth's omnidirectional "ruthlessness" and, as he put it "Amazon." He was talking about Amazon's apparent attempt to "extort" financial concessions from a major publisher.

Another scribe at another time, Jack Shafer at Reuters wrote about the pain and heartbreak of "closing his personal Amazon account." His personal reason for getting out of Amazon was very personal. He said he "thinks Amazon's snotty corporate attitude is embarrassing its customers. He used these words:

"I take it personally that the company doesn't think it owes me even a half-baked explanation for why I can't buy some books from it." Amazon is a bully and it does not care who it bullies. Eventually customers and clients walk away from bullies or they punch them in the nose."

Reading about Amazon once they've hurt you or your business, the Internet is a treasure trove of bad bully stories. One day when the US gets a real Congress that represents the people of the country in a way the founders expected, Amazon will be broken up along with Google, Twitter, and Facebook. They have all gotten too powerful in their cravings to make a buck and control all the thought in the country.

Here is another great quote from Paul Constant

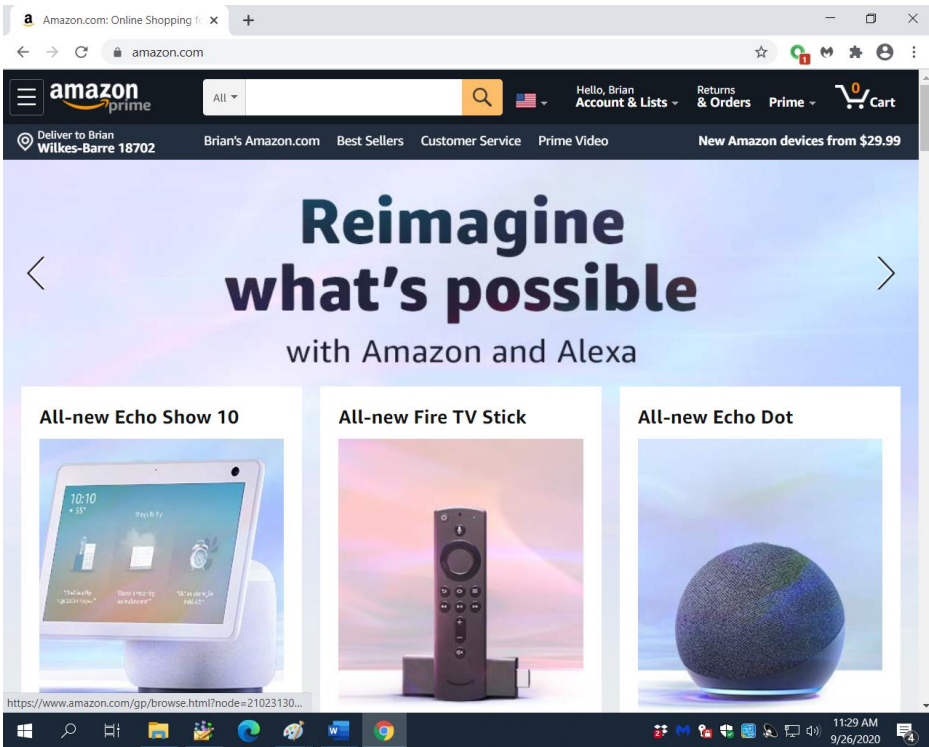

<https://www.thestranger.com/seattle/its-time-to-turn-your-back-on-amazon/Content?oid=19708679>.

When he started Amazon in 1994, according to Constant, Jeff Bezos's personal traits—cheapness, a libertarian loathing of taxes and government intrusion, a lack of sentimentality, a mistrust of the media—proved to be the perfect foundation for a burgeoning corporate culture. Times have changed.

Twenty years later, the company he founded is a caricature of those early, hungry days, and that culture is starting to leak out into the world. Somehow, this is the future we live in:

Yes, Amazon lovers, that means that the largest bookseller in the United States is a transparency-hating libertarian corporation that doesn't think about art except as units to be moved. Their goal is to put their competition—authors, publishers, retailers—out of business, and Bezos designed Amazon to be as relentless as possible in pursuing that mission.

(Bezos originally wanted to name Amazon "Relentless.com," before some sane friends talked him out of it. Nonetheless, to this day, if you type "relentless.com" into a web browser, you'll land on Amazon's home page.) Check it out. Notice there is not a mention of [relentless.com](https://www.relentless.com). You can see my search results below:

Here is some more stuff from 2018:

An article titled “Trolls and Bullies, in the Kindle Author Graveyard” tells a similar story

It was penned on September 15, 2018 by Robert C. Worstell. There was one comment provided on the Internet.

Here is the beginning of a post on Robert Worstell's site:

Would you believe me if I said I had proof of Amazon KDP being a bully? How about that they are trolls as well?

Well, it happened to me like this: I had a book up which got a DMCA complaint that wouldn't resolve. You see, you can use DMCA to complain about someone else's content and never have to give that person a copy of your complaint – so they have to take their content down, or in Amazon's case, they block it and you can't do anything about it.

The long and short is that someone at Kindle got a hair up and went to suspend my account over it. I answered right away and pointed out that it was because they left the book in question on their site and it could still be found by the DMCA trolls.

But I got the dirty end of that stick.

The next day, someone else at Kindle reversed it, but I was still guilty as accused. So, as usual, they put their boilerplate threats at the bottom of the email.

Why does Kindle put threats at the bottom of every email?

The answer – "they are bullies." KDP has around 60% of the market and they don't have to take your book if they don't want to. And if you try to publish public domain works, they can be downright hateful about it.

Chapter 14 Amazon Blocked 8th Book in 2020

Amazon Censors Alex Berenson's Booklet Pointing Out Face Mask Ineffectiveness

Amazon does not care if it is right. It has set itself up as the boss. Well known commentator Alex Berenson has had his problems with the Giant Amazon and their penchant to prevent his books from being published. He writes:

“CENSORED AGAIN,” After being published. And I told the @amazon KDP team I was putting out another booklet so their automated review wouldn't do this. Here we go again.”

Amazon originally claimed that it would remove the book, “Unreported Truths about COVID-19 and Lockdowns: Part 3: Masks” for violating the company's content guidelines but did not specify which rules were allegedly broken. Amazon censored the third installment of former New York Times reporter Alex Berenson's booklet on the ineffectiveness of face masks during the COVID-19 pandemic on Tuesday. They are wrong so often because as Berenson

found out, they are incompetent but they set themselves up as the one truth finder—the major bully in the publishing industry.

I wish I could just talk to Amazon and make all this crap go away. Every day I evaluate whether I should jump out of the pan and into the fire. For example, if I were to go through the new hoops to align my printing and distribution with Ingram, what would happen to the business I already have. Amazon knows one really has to hate them, and I am definitely getting close, to leave them and sacrifice time and investment and knowledge to switch to another company.

The fact that in 2021, they terminated me is causing me great angst and it is moving me into a departure from Amazon but my departing and the seizure of my business by Amazon must cost these bullies something—something like a lot.

Eight blocks / censored books out of 21 in a given year (2020) should be enough. Would Amazon close down my account and would that mean my monthly income would go to zero? I did not know a year ago when I wrote that last paragraph that they really would do that? . Now I do know. Amazon will do anything, including the outrageous to prove that as a bully with its assumed rights, it runs the publishing world and accepts no dissenters.

A year ago, I did not know how bad Amazon was but on Oct 26, 2021, today, after they have had my account closed since September 15, 2021, I now know how nasty they are. They would prefer the death of my account over fairness. They would prefer that I never earn another dime on my 290 books. Jeff Bezos has no idea what it means to have to work for a living.

I did not know what would happen and I chose not to test it but Amazon caught up with me. I had used facts freely available on the Internet and not being aware they were shutting me down, apparently I did not respond to their threat in the five days they permitted so I had to be terminated.

As I have noted in this book Amazon's various entities that send their Emails beginning with the words Amazon have sent me over 9,488 emails so I admit I was not looking for an email from the company

when they sent me a small notice that my account had been terminated. I did not learn about it until the next time I had to go out to my account.

I am a one man shop who produces revenue continually for Amazon. Why do they hate me so much? One answer, because we are from two ideologies and Amazon has all the cards as the bully in charge and with that power they can actually take your ball and take it to their home with them. Sorry, we're Amazon, p-a-lease!.

I chose to prefer that Amazon become cordial and promise to tether their reviewers and give long-term authors and independent publishers a pass so we do not have to run through all the hell hoops again. Amazon did not like that idea if they ever considered it.

I have two sons who are lawyers but I would prefer that they conduct their own practices rather than “help” me even though I believe my sons can own a part of Amazon if I ask them for help. I did not ask Amazon to stop my earnings potential. They took it upon themselves to shut down a one-man shop. How brave of them. How cavalier for sure.

I did not ask them to treat the most published non-fiction author in America as if he was trying to convince Amazon to publish a book.

Self- pride is a major motivator and I thank God that I can make a living somehow in another field even if I no longer publish. But, publishing is recreation for me except when I tangle with Amazon “reviewers” who cannot differentiate fiction rules from non-fiction or who think they have a right to prevent authors from publishing on different topics such as COVID-19, the Coronavirus.

I finally decided to fight back against Amazon.

I know from having lawyers in the family and from having issues in which I needed attorneys to offer guidance and take a case to court. You have to try to solve the problem without going to court in order for the court to have more empathy for your case.

So, I decided to go back to my email evidence and present where I am with my latest book scheduled for blocking in a few days.

When I last pleaded my case with Amazon, I thought it might move them. I am impatient when I think I am being wronged. So, I have not heard back from the case I put together to send to Amazon, hoping that I could turn around this issue without a winner but permitting my eight books to be unblocked and having Amazon promise to treat me better.

I do not know whether that is possible but I did it.

So, now in the next chapter, I will take the last three emails that I have written in my battle over the eighth block and having combined them, I will print them below in this book. Please note that the most current email is at the beginning and the oldest is at the end.

I hope you will agree that Amazon was not fair and that they should be fair to me and all other Amazon writers and clients.

Here we go as presented in the last chapter

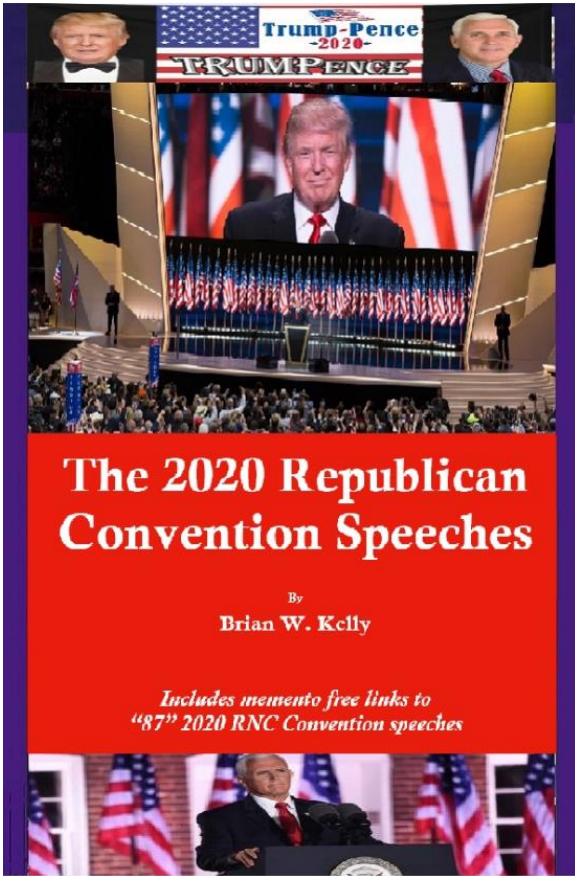

Chapter 15 Amazon Blocked Two RNC Books

Can anybody think of a good reason?

Amazon Restarted Blocking

The RNC Convention was in 2020. As a conservative thinker, who happens to be registered as a Democrat, I watched the convention speeches attentively. I found 87 speeches that were given by various conservatives on behalf of the Donald Trump presidency. I dressed them up a bit and provided some attribution and I presented them in a book, which I titled 2020 RNC Convention Full Speech Transcripts: Memento of the 87 best convention speeches ever given. Guess what happened when I submitted them to Amazon for printing? Did you say they censored them? How did you know?

Before I submitted the book to Amazon, I had spoken with some Republican principals who assured me it was OK to print them under fair use policy in a book as it would give the Party additional

Convention coverage of material they wanted well known. In other words, there was no plagiarism involved.

When I submitted the material, it took Amazon a while to tell me the book was live. In fact it took forever because they never did. Instead, to my surprise, they argued with me about fair use and eventually blocked

the book because it was “widely available on the Internet.” But it was not. My book had my presentation style. I won one blocking argument with Amazon and never had luck since. You don’t think it has anything to do with free speech and the fact that Amazon is liberal progressive Marxist in its corporate ideology.

When I saw the book blocked I gave up as only once have I been able to unblock a book. Sometimes to get a different reviewer in the past, I would change the edition # or change the title a little and put it out with a different ISBN. Amazon reviewers are not consistent and changing the ISBN would often be all I had to do to get past the stodgy unrelenting blocking & censoring team known as the Content Review Folks.

This time, I decided to take a different tactic. I deleted all the speeches from the book and released it at 102 pages with my own perspective instead of the speeches. It looked just like the second book. (see the last page) There should have been no issue but I must have gotten the same reviewer who began to hassle me that this was just copied from the Internet. I explained that it was not but they asked me to prove that I wrote it. Tell me how I was supposed to do that.

This book went through its five day period before Amazon dutifully censored it. It sure was tough dealing with Amazon. Tougher even yet today in October 2021 as I live through their account termination. They won't sell books of mine approved years ago. They won't sell any of my 290 books and they have no way to get me my files so I can ask another printer to use the material I built.

I decided to give the first book away as a 322 page pdf by providing a link in the second book which, by the way was titled: The 2020 Republican Convention—Speeches: Includes memento free Link to “87” 2020 RNC Convention speeches.

I thought I would find another source to print this book and offer it as an eBook. An author should not have to go through this much pain when they own their own publishing company. C'est la vie!

To show the fight I put forth with Amazon before considering taking Amazon to court in 2020 and a year before writing this book to tell the world about their business practices, I engaged them with a lot of emails. As of today, they have not responded. Eventually they wore me out.

The emails I show are as sent with the most recent being the first and the original email being the last. What would you do if you were me. Here is the fight I had put up before writing a book a year later titled and before asking my sons who are lawyers to represent me and of course, before sending this story to the FTC for unfair business practices. Write me at PO Box 621 Wilkes-Barre, PA 18911 if you have any ideas. Feel free to request a PDF of these books for your own web site and you may distribute them for no charge.

The book below as one of four versions of a book I wrote to send to the FTC. They FTC responded but offered little help. At least I got my say in four books. Amazon censored books 2, 3, and 4. If Amazon opens up my account again, you will be able to order this from them.

252 FTC Case: LetsGoPublish.com v Amazon

This big bully censored nine books by the most published non-fiction author

Lets Go Publish! An American Publisher

Subject: Re: Your Amazon.com Kindle Inquiry

Bcc: brian

I am at a loss after my further explanation of yesterday that you have yet to clear this book in question for publishing even as your five-day deadline is like a clock ticking. You have never approved one of my books when the five day clock began ticking. In fact all it means to me is the book will be blocked / censored in five days so don't bother trying to convince Amazon otherwise. Your process is a sham and a shame.

[I guess I could have been more conciliatory but I was angered that my work was going up in smoke. It takes a long time to write a book and prepare it for publishing.]

Here is another story that is true that I did not tell you yesterday when I made my last plea to not block this book.

As I listened to Rush Limbaugh this afternoon, I was reminded of the action I took in frustration to prove to myself that you did not truly examine the content of the book titled Coronavirus: The Cause & the Cure, which was blocked even though the content was not objectionable.

How do I know it was not objectionable and that the review process on that book and others is a sham?

Because I resubmitted it with a new name and I sold more of the retitled book than any other book I have ever published -- 157 copies as of September 2020 -- since you rejected the original title. Coronavirus: The Cause & the Cure.

I ask you to Check out the content of both books to prove my point. I resubmitted the book with the major change being the title. Instead of Coronavirus: The Cause & the Cure, I titled the new book

Hydroxychloroquine: The Game Changer. You always tell me that people are not satisfied when book information is readily available on the Internet. Yet, if I am a repeat defender with 8 books blocked by Amazon, consider that there have been no returns of any of my books in the last three months-- the most the report shows. So the people who buy my books keep them. Why, if not because I write conservative books did you block 8 of my books this year and to the best of my knowledge you blocked none in prior years.

Why has Amazon singled me out? I am the most published author of non-fiction works that currently prints its books through Amazon KDP and permits Amazon to market and distribute 290 books. Why do you treat me so poorly. When I changed the title of the book above about Corona, under the new title, I sold 157 copies with the latest copy being yesterday (September 2020).

One hundred fifty seven copies with no returns for a book that you had blocked. I admit I tricked the reviewers by resubmitting the same book with one new paragraph. Amazon has no inherent write to block my books as I hired you people simply to print, market, and distribute and I agreed to no more. I did not give you control of my company. You seized that from me on September 15.

Almost 100% of the pages in the blocked book were in the new book. This proves that there was no rhyme or reason for the blocking of my books other than you don't want to sell books that have a conservative slant. You violated my free speech and you stole my property by blocking my access to items that I owned.

I will be looking up which federal agency to plead my case to . It may be the FTC. You have treated me unfairly even though my books sell well with no returns for the last three months. Plus I am your most published non-fiction author with over 240 title [now 290 titles]. You have treated me unfairly and I am trying to make my case that you are wrong.

How many authors do you have who have written eight books in 2020 (last year. I wrote 21 books and out of the 21 books, you blocked eight of them in 2020. How can a person make a living when they have to write two books for one to count. I hope I have explained this well. Now, you can see why I am exploring other avenues for my books. But I do not want to change. I would prefer a promise that you will stop blocking / censoring my books.

I am not sure where to go but I have two sons who are lawyers and my daughter works as a paralegal. I am looking at the FTC. Perhaps you can tell me which agency you fear the most so I can know better to whom to submit my complaint.

I do know that the nation's consumer protection agency, the FTC takes complaints about businesses that don't make good on their promises or cheat people out of money. They share the public's complaints with law enforcement partners and use them to investigate fraud and eliminate unfair business practices. I think you have treated me unfairly. You should submit my responses to your supervisors. None of my books should be blocked.

Subject: Re: Your Amazon.com Kindle Inquiry

I have seen this response before. Then nothing happens and my book is blocked.

I do not believe Amazon reviewers understand the nature of non-fiction. Facts are facts. Commonly known facts are not cited. Each author brings a different presentation style and teaching style to their books. Facts always stay the same whether they are freely available on the Internet or in a library or not. Fiction books by definition are not fact based and so facts would not be available on the Internet or in a library etc.

You know that I wrote what is in this book regardless of what facts are

on the Internet. When an author writes a book based on facts, he or she does research to gain the facts. If the facts are not gained from the Internet, they are gained from books, periodicals and other material often found in libraries. The facts are the facts regardless. When you say the facts are readily available on the Internet that is a meaningless argument. They are also available in libraries and other sources.

Of course. Some facts become universally known and are available in current newspapers and in many sources on the Internet. Are you suggesting that books based on facts are not OK for Amazon to print because the facts are available? That would mean that there should not be a category called non-fiction. Yet, many books are non-fiction. All but several of my trove of over 240 books (now 290 books as of Sept 2021) are non-fiction. Why would somebody buy a book if it is non-fiction and the facts are on the Internet or in a library someplace. Well, in most cases it is the author. It is how a given author such as myself presents the facts.

I received a BS in Data Processing and an MBA in Accounting and Finance plus I attended one month of internal IBM education classes for the 23 years in which I was employed. As a faculty member of Kings College, Misericordia University and Marywood University, I wrote a great number of books from researching various sources including libraries, the Internet, the daily news programs radio & TV etc. Eventually information becomes commonplace so that authors do not cite their sources as it is common place. Such is the case with the Democrat and the Republic conventions. They were fully televised and most news sources wrote about them without citations because the knowledge was commonplace. Such is the case with my books about the convention. Facts are facts.

I have been a faculty member part time and full time and so I am accustomed to teaching. An author teaches when he or she writes a book. Two books about the Civil war for example would be fact based but the books would be different because of the way the author teaches the subject matter. With the same facts, one book would be a light read and the other would be heavy perhaps. Yet, the facts are the same. The author makes the difference and that is why some authors are successful and others are not.

The first book I wrote was in 1984, published by Ballinger, a division of Harper Collins. I then wrote a series of books for John Wiley & Sons. All were tech books in the beginning all non-fiction fact based. My books outsold others and some outsold mine on the same topic. The author makes a difference with the same facts. I have written books for 29th Street Press and MC Press, and Midrange Computing and others. I know what I am doing. People buy my books because they like my presentation style of the facts some which are cited in the books and others which are common knowledge.

It began to take longer to find an author or an author's agent than it took for me to write a book so I decided to use my company Lets Go Publish! as an independent publisher. I used another of my companies, BookHawkers.com to market these books. Then I heard about CreateSpace which was a great fit and I stopped marketing my own books and CreateSpace printed them.

I was not looking for a new publisher that would interfere with my topic selection as Amazon now chooses to do. And, so I am looking at Ingram and others and I am considering leaving Amazon and moving my Lets Go Publish titles with me. This year alone you have blocked at least eight of my books. They are still blocked. That makes my writing time unproductive. Additionally, Amazon does not reimburse me for my time or for the ISBN that was used on each of the books

- Great Moments in Philadelphia Eagles Football
- The Constitution V The Virus
- 2020 RNC Full Speech Transcripts
- When Will America Reopen For Business?
- Reopen America Now!
- Coronavirus: The Cause & the Cure
- Great Moments in Kansas City Chiefs Football

I never had a problem with Amazon before this year. Eight books blocked in one year tells an Amazon story of which Jeff Bezos should not be proud. I have a feeling it is because somebody has me pegged as a conservative and Amazon, a company aligned with the rest of big tech to thwart free speech is taking it out on my business.

Now, with this latest book which I stripped out 87 transcribed speeches to please you bringing the book from 322 pages to 102, you are preparing to block an unprecedented eighth book for this year. Shame on your company.

I regret to say that I am in the process of contracting with a law firm because if you will pardon my frankness in the spirit of 2020, you will not get away with denying me my eighth book this year. We will appear before a magistrate with two lawyers as planned and a friend of the court (*Amicus Curiae*) who often purchases my books and who enjoys them very much.

I am a conservative and that's why you are playing games with me

I have over 245 books sold by amazon [now 290] and you have stopped treating your loyal customers well.

amazon.com/author/brianwkelly

Having said that,

When I wrote to Amazon about one of my earlier book blocks, *Coronavirus: The Cause & the Cure* I found a link that told me if I took this email to Jeff Bezos, that more likely than not, Mr. Bezos would respond. But, I think he looked up the fact that I am a conservative and the billionaire Mr. Bezos decided that he did not have to step in as the company was operating against conservatives as planned.

My counsel told me that it does not matter that I am the most published non-fiction author in America. They said none of that matters to Amazon. It surely not good business to treat customers as Amazon does.

Hello,

During our review, we found that the following book(s) contains content for which you may not hold the necessary rights. Some or all of the content within your book(s) is freely available on the web. We need you to confirm your publishing rights before the book is made available on Amazon.

The 2020 Republican Convention--Speeches:
Includes memento free Link to [2020 RNC Convention speeches by Brian W Kelly \(AUTHOR\) \(ID: PRI-C9ESXBVMM0D\)](#)

We need to confirm one of the following: You are the copyright owner of the content that is freely available on the web.

The content found on the web is in the public domain In order to publish the book(s), please take the appropriate action below within 5 days:

Option 1:

Provide documentation and/or verification showing you hold publishing rights. Acceptable documentation may include:

A signed copy of the agreement between you and the author(s) or website owner(s)

An email from the domain of the web address where the content is found stating that they do not object to your use of the content If the website where the content is found includes email contact information, an email from the address listed on the website stating that they do not object to your use of the content If the author of the content has an official website, an email from the address listed on the author's official website indicating that they do not object to your edition

[Amazon did not tell me where they found the material in question]

Option 2:

Provide information for underlying public domain works. If your book(s) is based on a work(s) that is in the public domain, reply to this email and provide the following information for the public domain work(s):

Underlying work information:

1. All author names:
2. All author dates of death:
3. All initial publication dates:
4. All initial publication countries:
5. Website link(s) to confirm:

For more details on publishing public domain content, visit Help:
<https://kdp.amazon.com/help/topic/G200743940>

Please take action within 5 days or your book(s) will show as "Blocked" in your Bookshelf and you will be unable to offer it for sale on Amazon.

If you have questions or believe you've received this email in error, reply to this message. Thanks for using Amazon KDP.

Chapter 16 Amazon Uses Monopoly Power to Bully its Customers

Dealing with a monopoly like Amazon

Brian W. Kelly, your humble author is still the owner / operator of a one-man shop publishing company called Lets Go Publish! That description of course changed on September 15, 2021 when Amazon decided to terminate my account because I sent them a book for printing, marketing, and distribution that they claimed had content in it that was freely available on the Internet. With Amazon now in control of my account, I am prohibited from operating my business. Here is a picture of my home page [letsGOPublish.com](https://www.letsGOPublish.com):

The screenshot shows the homepage of 'letsGOPublish.com'. The browser address bar displays 'https://www.letsGOPublish.com'. The website header features the text 'LET'S GO PUBLISH!' in large, bold letters, with a pink and black color scheme. Below the header, there are several book covers, including 'AMERICANS! NEED NOT APPLY!', 'TAXATION WITHOUT REPRESENTATION', 'LET'S GO! The Business Language!', and 'TAKE THE TRAIN TO MYRTLE BEACH'. The main content area is divided into sections. On the left, there is a 'Main Menu' with links to 'Home', 'Great Moments NY Giants Press Release', 'LGP Books', 'LGP Technical (IBM i) Books', 'LGP Joomla! Books', 'Book Stores', and 'LGP on Joomla!'. In the center, there is a section titled 'Great IBM i Tech Books; Great Joomla! Books; and Great Patriotic Books' with a date '293 Brian W Kelly Books as of October 21, 2021'. On the right, there is a sidebar titled 'Patriotic & Tech Books' with a sub-section 'What's in the Books?' containing links to 'Link to Kelly Books at Amazon', 'Obama's Seven Deadly Sins', 'Taxation Without Representation', 'Healthcare Accountability', and 'Political Donations - Authors'. The Windows taskbar at the bottom shows the date as 10/23/2021 and the time as 10:45 AM.

As of September 15, 2021 Amazon locked all my files and will not permit any of the 290 books to be sold anymore. Today as I am coming close to finishing this book, it is October 27, and I do not know

what Amazon is doing with all my files. I do not think they are operating my account without my permission but I would not be surprised if they are doing just that. Please keep in mind that I never signed a contract with Amazon. I signed up with CreateSpace years ago and Amazon bought that company and did not ask me to sign anything including a contract. Consequently, I believe that Amazon's action of September 15 was an unlawful seizure of my business assets. I can no longer run my publishing business. I trusted Amazon or I would not have used their services.

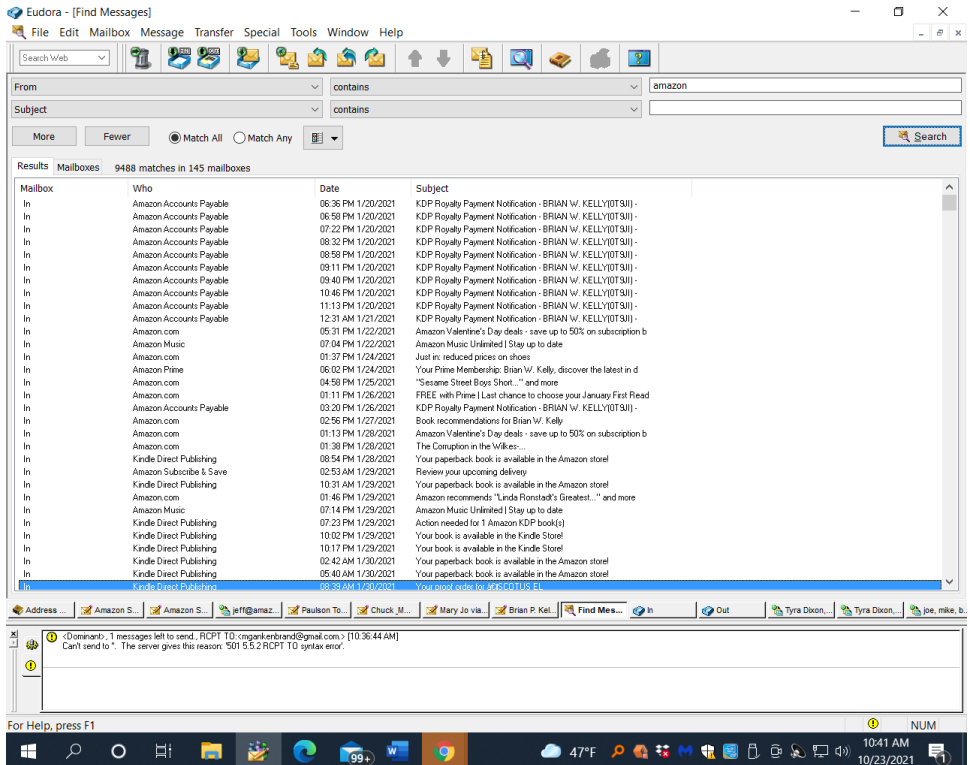

How did I get to be with Amazon in the first place? I hired a printer, marketer, and distributor named CreateSpace. since my company Lets Go Publish! is the publisher of all my works and those of others supported under my account. I was not seeking a company to review and verify my content. That is my job as a publisher.

Despite not having a legal obligation to comply with Amazon's huge library of changing rules and regulations, I have decided to properly appeal my termination. I have been advised by counsel that the natural adjudication time period for an appeal to Amazon is six to eight weeks. They said they would call the Amazon Legal Department hoping to expedite matters.

Since I do most of my business in the last three months of the year and Amazon knows this, they know that they are affecting my income stream in a very negative way but it does not seem to move them in any way.

My appeal was prepared for me with the help of a company called AmazonSellers.attorney. They expect to get my account reestablished within six to eight weeks. We'll see. Looks like I will miss the Christmas book selling season this year. In October, November, and December each year, my sales amount to several times the volume for the entire rest of the year. So, big behemoth monopoly big tech giant oligarch Amazon has applied a big hurt to my income for 2021. It sure seems that Amazon does not care at all about that. I am just one of their customers. And they truly believe that they control their customers.

I learned that I was terminated by accident. I had just finished a new book and was uploading it or hoped to when I got a *terminated 404* message instead of my sign on screen. As you can see below, I get a lot of emails from Amazon—nine thousand four hundred eighty-eight (9,488) as of today, October 23, 2021. and they all seem important.

So, it was September 27 when I realized I was terminated. Amazon canceled me. Whatever grace period Amazon had given me had passed. I was unaware for twelve days that I had any problem with Amazon. They sent me a termination email and that was that. They never called me or sent me an overnight mail or anything to inform me that all of the work I had done over the years was inaccessible because I had broken on of their many rules. Surely Amazon did not go through what a normal company would to assure I was notified.

On Sept 27 or 28 I went back through all of my emails and found the letter they had sent informing me of my irreversible plight and that I was o-u-t. There was no opportunity advising me to appeal. I tried by

responding and of course with Amazon, I was destined to fail. I did fail because amazon said that my sin violated Amazon rules and regulations.

After considering options, at 73 years old having been writing books since 1984, I did not want to start over by republishing all of my past 38-years-worth of books—290 had been sold by Amazon until the termination in September 2021. So, I found a group of lawyers who made their money taking bad faith cases against Amazon. Their name is AmazonSellers.Attorney.

After several discussions with them, I contracted with them to help me resolve the matter and get my account reinstated and have most of my blocked (censored) books put back on the marketplace. These lawyers and consultants worked with me to compose a short list of demands.

As advised, I sent the list to jeff@amazon.com on Monday October 18. I was told it would be a six-week to 8 week period on average for Amazon to reach its decision and hopefully I will get my account back and Amazon will continue to sell my 290 book titles in paperback form and in Kindle form as was the case before September 15, 2021. That means there are 580 books in question considering both forms under which I sell my titles.

Here is the note I sent to Mr. Jassy, the CEO of Amazon.

 Eudora - [jeff@amazon.com, 10:01 AM 10/19/2021, KDP Escalation]

Subject: KDP Escalation
Cc:
Bcc:
Attached:

Dear Mr. Jassy,

I am writing to you to escalate my KDP appeal as I requested a review by a KDP Team Leader and never received a response.

My KDP account was terminated on the erroneous grounds that I allegedly submitted titles containing content freely available on the web. I am one of the most published non-fiction book authors in America. At the time you terminated my account, I had just finished my 291st book. I had 290 books sold by Amazon.

As a non-fiction writer, I include a lot of facts in the books, some of which can admittedly be found on the web, as any writer starts their research by gathering information from different websites when starting to write a book on any subject. However, although the basic facts are available on the web, my work is original and is not available anywhere else but in my book.

However, I understand Amazons concerns and, to resolve the issue, I will permanently unpublish and remove the title in question from my catalog and will never again publish it on Amazon. The plan of action below ensures that no issues will arise against any of the titles in my catalog.

Root causes of policy violations use of available facts in non-fiction work

- The root cause of the policy violations in this matter is that I used facts available on the web and incorporated those facts into my non-fiction book, **Should We cancel Student Debt ???: Americans owe \$1.7 trillion in student debt What should the Biden Administration do about it; ASIN: B09DW7DQSR.**
- I understand that there is an article in the New York Times dated September 10, 2021, with a title clearly similar to my work, but other than that all other information included in the book is from my own research on this issue and does not plagiarize any other works available online.
- I take full responsibility for using the title without clearly changing it to reflect the scope of my work, which is clearly more thorough than the article under the same title.
- My KDP account is very important to me, and I would never intentionally copy anyone's work.

Please review my account and this plan of action and reinstate my account.

I am also requesting reinstatement of the following titles in reverse chronological sequence:

- 287 Hydroxychloroquine Much Maligned Super Drug Many swear by it. Others say it is pure hokum but does it work? ISBN [978-1-951562-72-4](#)
- 250 What America Loses if Trump Loses ISBN [978-1-951562-35-9](#)
- 244 2020 RNC Convention Full Speech Transcripts ISBN [978-1-951562-28-1](#)
- 245 The 2020 Repub. Convention Speeches Short Version [978-1-951562-31-1](#)
- 236 The Constitution V The Virus ISBN [978-1-951562-09-0](#)
- 234 Reopen America Now ISBN [978-1-951562-10-6](#)
- 230 When Will America Reopen for Business ISBN [978-1-951562-15-1](#)
- 229 Hydroxychloroquine: The Game Changer-- ISBN [978-1-951562-14-4](#) This book sold several hundred copies before being blocked
- 224 CORONAVIRUS: the Cause & the Cure ISBN [978-1-951562-09-0](#)
- 153 Great Moments in Philadelphia Eagles Football ISBN [978-1-947402-36-2](#)

Actions Taken to Resolve Issue

- To resolve the complaint, I am unpublishing this book from my catalog and will never again publish it on Amazon.
- I have made sure that all my titles are compliant with good publishing policies and copyright law such as no plagiarism.
- To address the issues raised, I have carefully read and understand KDPs Terms of Service and Content Guidelines.

Steps taken to prevent violations in the future

I have formulated and implemented the following plan of action in order to ensure that I do not violate sound policies in the future.

- I will not submit another work to Amazon for publishing.
- I request my past censored / blocked books other than the root cause book that I have unpublished reactivated as all of them comply with sound publishing policies and have been thoroughly checked by your content reviewers multiple times.
- I will monitor customer complaints and reviews on any titles, as a quality control measure, to provide a good customer experience. Any titles that appear to create a poor customer experience will be withdrawn from our inventory.

As noted, the way for our two organizations to avoid conflict in the future is to repeat, I will not publish another book with Amazon. I will not update a book on Amazon. This should resolve any concern Amazon may have for the type of books I write as no new books of

mine will be marketed by Amazon. It would also resolve the problem of my using facts available on the Internet within my books as no more books will be published by me through Amazon

I am pleased to end publishing any new works with KDP. I am interested only in those portions of your business that sell my books from now on with no modifications. I fully understand that I must learn from this incident and prevent it from ever happening in the future by not publishing any newer books with Amazon. Please reinstate my account.

Thank you for your consideration,

Brian Kelly

What is Amazon's idea of a customer partnership

When I signed up with CreateSpace, Amazon's predecessor company, ten years or so ago, I was looking for three specific things.

1. A company that would print my books on demand one at a time
2. A company that would market my books through an existing on-line channel.
3. A company that would distribute my books to my customers one book at a time for an agreed upon price per book.

CreateSpace supplied all three services and did a great job for me and many other clients / customers.

Then Amazon bought CreateSpace and things began to change. CreateSpace used to be a print-on-demand service for self-publishing authors such as my company Lets Go Publish!. As POD services went, it was pretty good. CreateSpace made it easy for me to create paperback versions of books and even provided expanded distribution and printed proofs. This made CreateSpace a very popular choice among authors. I was very pleased with their service.

Then, in August 2018, Amazon shuttered CreateSpace merging its services into Kindle Direct Publishing (KDP), Amazon's answer to the POD marketplace. Things did not improve. Amazon botched the rollout of the merger but cocky Amazon did not admit its failings and proceeded with an inferior system to support its many authors / independent publishers. .

I certainly learned an important lesson as did other independent authors when Amazon proudly rang the death knell for CreateSpace. First of all the transition was not seamless. With Amazon's resources it could have been. There were more bumps on the road than pavement. They included delayed royalty payments, problems using the KDP website, subtitles accepted on CreateSpace rejected by KDP, a requirement to list on Amazon to get extended distribution, KDP copies that did not look as good as those printed on CreateSpace, and the replacement of CreateSpace's outstanding customer-oriented customer service with Amazon's stifling rules and regulations but this was not all of the bad news for those forced into Amazon.

Publishing a single book does not lend itself to mass production. CreateSpace had dealt well with this phenomenon but Amazon struggled as it wanted to force fit a new methodology where it did not belong. That was a problem for what Amazon envisioned when it bought the company Book Surge and renamed it CreateSpace.

Amazon had already dramatically changed the way books were sold. New technology had transformed the publishing landscape, and a rapidly growing number of authors were using it to self-publish. By offering print-on-demand services through CreateSpace Amazon planned to tap a new revenue stream and provide a new load of titles for its digital bookshelves. Amazon was not into printing books but loved the Kindle E-book model. Authors and readers still preferred hardcopy and this was a problem for Amazon.

Moreover, CreateSpace was into successful "partnerships" with its authors. So, not all authors who wanted to use CreateSpace had fully edited or designed manuscripts. The result was some embarrassingly bad books. As authors learned the importance of professional editing and book design to their book's bottom line, they got whatever help they needed from CreateSpace. This innovative company offered

authors editing and design. CreateSpace was literally a one-stop shopping center for authors

Not everything works for everybody but it sure and heck worked well for me. Like many others, the system worked fine for me. But some authors did not get it. CreateSpace outsourced both author services like editing and design along with its customer service and technical support to meet the flood of authors who flocked to the service, but the results were not always as designed. For me, it was perfect., however.

As CreateSpace grew in popularity, there were more less capable authors joining regularly demanding perfection without learning the ropes. You could read the online posts of those who did not get it as they expressed dissatisfaction with the quality of both author and technical services. Many of the complaints focused on the inability of the authors to get in touch with a person who could or would help them. Part of the problem was growth and another part of the problem was customer perception. I had no problem with CreateSpace.

I caught on very quickly after my friend Paul Harkins, an independent technical book author, suggested that I move my publishing business to CreateSpace. He was very pleased and told me why I should change.

Some authors with little knowledge of word processing, graphic design, etc. wanted one-on-one contact with a real person. Its absence shouldn't have been surprising with a business designed to publish books in huge volume with what was essentially a production line process that was impersonal by its very nature.

Amazon gave up on CreateSpace as their purchased company was gaining customers and market share. The payoff in profits was not happening quickly enough for Amazon. When Amazon took over everything, there was a noticeable downgrading of service and capabilities to satisfy Amazon's quick need for profits. Authors could feel it almost immediately.

Amazon cut off the services that made CreateSpace unique. For example, they discontinued CreateSpace's editing and design services in April 2018. Then, in August 2018, Amazon shuttered CreateSpace

merging its services into KDP. When they did that authors had fewer choices in cover creator designs and though quietly at first, Amazon began to assert its harsh rules and regulations. My business did not seem to change until I wrote a book that for ideological purposes, Amazon did not like. Amazon began to impose its bully philosophy of customer relationship on the marketplace. Others noticed before me. My first encounter with the nasty Amazon was in 2020. For example, I cannot recall anybody being canceled by CreateSpace.

The Internet is bursting inside out with stories about poor customer experiences with Amazon. Customers do not like being bullied. So why do customers put up with Amazon. Well, in my case, it was the easier alternative than switching printers, marketers, and distributors.

Summing up these experiences what has Amazon achieved in terms of customer satisfaction. Well, they have turned me from a happy (even delighted customer in the past) into a dissatisfied customer. I am dissatisfied enough to share my experience with the world. Will I continue to buy from Amazon? Yes, but reluctantly. Like many Amazon customers, I will seek better options and when a better option comes along, I will take it.

In my experience as a writer / publisher, Amazon forced a transition on me and other customers from book printer, marketer, and distributor to partner. But I was not looking for a partner. I am my own publisher and I was not looking for a hoop to go through to get permission from Amazon to print a book that hitherto, I would simply get printed at a print shop such as Bertelsmann Printery (Offset Paperback) or Steuben Press.

Ironically, Amazon does not really want a partnership anyway. But providing a service to customers, which the customer needs in order to complete their product experience, by printing, marketing, and distributing books, Amazon has value to its clients / customers.

However, Amazon does not want to be an equal in my business, Lets Go Publish!. It sets itself up to be the big partner which by definition makes the customer the little partner. Amazon is the last partner any person in their right mind would choose. The Amazon company can do a lot better if it chose to be a real helpful partner, but that is not

what they want. They want to be the boss even though none of their sweat and blood was used to build their customers' businesses..

Let's define a customer partnership so you can see what I mean

Customer partnership defined

A customer partnership can be looked upon as a shared journey to create a future for both parties that is better than either could have developed alone. In my case, having just been canceled by Amazon after they took control of major assets such as my book files / manuscripts. I would have been much better off without Amazon as a partner ever.

Most businesses have respect for customers because there is no income if there is no customer. Amazon figures out how much you need them and operates like it owns its customers and bosses them around with self-serving Amazon rules and regulations that ought to be against the law. In my case, I will have to go to court to determine if Amazon and Lets Go Publish has a contractual relationship. I agreed to use CreateSpace but never signed any deal with Amazon so that determination may be in the future depending on whether Amazon agrees to my offer shown earlier in this chapter.

It is me, in this case, serving as the customer . I am supposed to influence every aspect of Amazon's business and it is Amazon, the service providing business's job to keep me happy. Your business is the foundation of your organization's success. Management consultants preach that especially in today's turbulent times of rapid and chaotic change, no force is more grounding and stabilizing than a solid partnership with customers. Of course Amazon's idea of fair is them as the bully and their customers as the servants putting the customer on the poor end of the stick.

The term customer partnership from most expert's way of thinking is not in its legal definition which might have co-ownership as an attribute but rather in the sense that the partners share the mutual benefits, profits and losses of both companies. It is because of the

partner relationship. A one way partnership which Amazon prefers creates resentment and it gets sour really quickly and does not work for the long haul. Why bother with such a relationship.

They say that in every successful relationship such as a marriage each party has something to offer. Each party brings something to the table. One party does not dominate. If there is just one passionate party in a relationship it is unrequited love and it is destined to fall apart.

Moreover, a customer partnership is more than "putting customers first", or finding mutually satisfactory solutions to shared problems, or a dedication to excellence in every sale or service encounter. It also requires commitment to forging long-term relationships that create synergies of knowledge, security, and adaptability for both parties. Amazon unfortunately for its customer base does not even have a clue as to what those terms mean. Amazon is the master of the one way partnership and so far it seems like it is a winning strategy for them, but they'll have their comeuppance.

Amazon's focus is clearly on reducing/containing the costs associated with customer interactions. It is not based on delivering good customer service, nor on enabling/facilitating a great customer experience. It is based on Amazon gaining all the benefits and the customer getting anything leftover that Amazon does not happen to need.

Reminder: Amazon Treats Its Employees Like Guano

On February 22, 2017, William Turner minced no words when he described how Amazon treats its employees. Let me carry this one step further as I am not an Amazon employee but I know about them. I am a customer, which may be a worse deal. Why? It is simply because Amazon treats its customers, at least those of us that provide manuscripts for Amazon's book printing and eBook businesses, like it treats its employees.

The title of this section folks is Amazon Treats Its Employees Like Guano. Guano of course is bat fecal waste. William Turner did not

use bat feces to describe how Amazon treats employees; he used a word that in German would be translated as **Scheiße**. It is often hot and steamy and is rarely consumed by humans. I think you know what I am saying without getting too repugnant.

Turner suggests that “Amazon is getting a lot of good press today for a smart marketing move it pulled: offering a “thank you” discount code to its customers based on some stupid corporate reputation poll. But, here’s something to consider: Amazon treats its massive army of laborers like garbage.”

“If you ask the average person what they think of Amazon, the response will most likely be positive. After all, it is a convenient service to quickly purchase whatever your heart desires. But few will consider the human cost associated with fast shipping times and low, low prices.”

“Amazon, like most tech companies, is skilled at getting stories about whatever bullsh*t it decides to feed the press. Amazon would very much prefer to have reporters writing some drivel about a discount code than reminding people that its tens of thousands of engineers and warehouse workers are !@#%&ing miserable. How do I know they’re miserable? Because as the testimony wherever you find it attests to, Amazon has told every writer who’s bothered to ask for years. Gawker, May 2014 -“I Do Not Know One Person Who Is Happy at Amazon”

Say it ain’t so Joe. Amazon can’t say it ain’t so ‘cause it is worse than what anybody can say. . On its blog site a year ago, an inquisitive customer wrote: “Is your company really just a scam? No real business treats their customers so poorly. As an Amazon customer, I can say that if it is a scam, their scams have major consequences. No love is lost on Amazon.

When you are canceled (terminated as I have been) and Amazon, which lured you into uploading 290 books decides not to sell your product in their on-line catalog any more, that may be a scam in somebody’s book. In mine, it is just bad business and as a customer, it hurts me and my bottom line. Actually with no books sold, it eliminates all profits and all sales. I’d be happy to swear that Amazon

is about as bad as it gets with customers but what I have been reading it has contests among managers to see who can fire the most employees.

I know about customer service, having worked for IBM for over 23-years. IBM was always attacked by the government for being a monopoly. Yet, as an employee, the company gave us strict orders to not mess with the customer relationship. IBM even had a policy on unhooking. What this meant that if a potential or existing IBM customer ordered a computer system (often costing from 100,000 to several million dollars), IBM sales personnel could not call on that customer to talk him or her out of the sale. In fact, we could not call on that potential client again until the system was delivered and set up.” That is customer service.

Asked on August 10, 2020

Is your company really just a scam? No real business treats their customers so poorly

After having eight books blocked in 2020, Amazon content reviewers were at me again near the end of May 2021. In this instance, this was the only time Amazon actually reactivated a book it had previously blocked

Here are the emails leading up to that.
It started somewhere in the second week of May 2021

Subject: Alert from Amazon’s Content Review Team Case #04976222

Date: Wed, 12 May 2021 17:56:03 +0000 Feedback-ID: 1.us-east-Hello,

We’ve reviewed the information you provided and have decided to block these books from being sold on Amazon. The books closely match content that is freely available on the web and we are not confident that you hold exclusive publishing rights. This type of content can create a poor customer experience, and is not accepted.

As a result, we will not be making the following book(s) available for sale on Amazon:

"The Great Story of Alabama Football: From the first college football game to Alabama's Last TD under coach Nick Saban" ID: 41543560

Please be advised that you must hold exclusive publishing rights for books that closely match content that is freely available on the web. As a reminder, since publishing books with content that is freely available on the web and we are not confident that you hold exclusive publishing rights is against our guidelines, we may suspend or terminate accounts that repeatedly try to do so. For any questions, please reply to this email.

The content guidelines applicable to all KDP publishers can be found here: <https://kdp.amazon.com/self-publishing/help?topicId=A2TOZW0SV7IR1U>

Best regards,
Amazon KDP

Katherine Andrea
Amazon Content Review Team

I had sent them this message as a reply earlier. Please read what I said. How can I argue with a fact being a fact?

-----Previous Message-----

I had sent this as a reply
Dear sir or madam,

The book that you cite is non-fiction.
As such, all facts are available on the Internet for free but they are not in the format in which I have created this book.

For example a well-known fact is that Columbus discovered America. Somebody must have said that on the Internet I suppose

I can say it also

But when I write a few paragraphs of original material surrounding it, it makes it my writing even though it is fact.

Novels are easy to verify as you either wrote it or not
But non-fiction books, which I typically write by definition are fact based or they would be fiction.

Wherever I use a quote or a short set of paragraphs from another source to amplify one of my thoughts, I put a URL in place or a reference. See the chapter in my book in the front matter before the table of contents which I call References to show my compliance with plagiarism laws.

Thank you.

I figured out why you had a problem with this submission. I had submitted this from a hardcopy version and noticed that for some reason I had wiped out the title except for the first letter. So I resubmitted it. When I did this, you blocked the book. There was no reason to block a book because of a typo

So, I resubmitted the book without a link to the hardcopy as I thought that the book may have mistakenly been submitted under the one letter title and I know that titles cannot be changed. But for the life of me I do not understand how my 279th book with Amazon would be blocked when it is not plagiarized. I wrote it using available facts in books, Internet, magazines and other sources. Most of the information is common knowledge but the way I present it is unique.

Thank you

Please advise.

Eventually, this book passed muster – no apologies from Amazon. See below email:

From: Kindle Content Review <kindle-content-review+5003n00002SRSGBAA5@kdp-support.amazon.com>

Hello,

The following book(s) you recently submitted have been reviewed and were successfully passed:

The Great Story of Alabama Football: From the first college football game to Alabama's last TD under coach Nick Saban
41543560

We incorrectly suppressed your book(s) and apologize for the inconvenience this caused.

The book(s) will soon be published on Amazon. Please allow up to 48 hours for the book(s) to become available in the Amazon Store.

We look forward to offering your book to millions of Amazon customers and wish you the best of luck in promoting and selling your work!

Thanks for using Amazon KDP

Walter
Amazon Content Review Team

I had sent this before the unblocking

-----Previous Message-----

Dear Charles W. of the Kindle Content Review Team

OK

C'est la vie!

Thanks you for a rare response.

I believe you are wrong but I do appreciate your giving me the opportunity to tell the world why Amazon is a bully to its authors in many ways like the rest of the big Tech Oligarchs in America. Jeff Bezos and Amazon are no better than the rest.

You must do as instructed and since it affects me in more ways than one, including my ability to make a living, I must do what I can to make sure bullies like Amazon get their day before the American people.

I admire your team sticking to its guns but you are wrong I regret to say. I had hoped you would resolve this more fairly. What would you offer me as a caveat in order to insure that a non-fiction book that I might write in the future can pass your muster?

After all, I just wrote my 281st book published by Lets Go Publish!--most of which are printed by Amazon as part of a contract I think I may have agreed to with CreateSpace a long time ago..

As I told you in our last correspondence because of your intransigence, and your not understanding how non-fiction differs from fiction (novel) I will be submitting a complaint to the FTC as I had suggested in our last email conversation. Nothing matters to a big bully like Amazon so I expected that your five day cooling down offer which I agreed to was just a ruse since you did not even wait the five days to declare my sports book offered to be published as an eBook titled The Great Story of Alabama Football was censored via this email from you. Shame on Amazon.

Too bad you could not decide to have played fairly instead.

Thanks for coming close to explaining why. Had you offered a real reason, I might have accepted it but since I knew there was no real reason for my book being blocked / censored, I knew that you would

decide to say we blocked it because we had already said we would. Thanks a lot Amazon. Your organization is a bully organization and Jeff Bezos is a bully for sure. He could buy and sell me but he chooses to be a poor manager instead. The world expects more from its leaders than crap like that.

Hopefully you will hear from the FTC forthwith.

Would you like me to send you the complaint before you hear from the FTC.

There's always tomorrow!

Tell Jeff, that he can reach me at bkelly@kellyconsulting.com.

Thank you for your response.

I will be presenting my case to the FTC within the next few days.

Here is another example of blocked book from summer 2021.

There were days that I received more than ten emails from Amazon about books and other matters. As I showed in a picture earlier in this chapter, Amazon has sent me 9,488 emails. In the past several years. If I did nothing but look for Amazon emails every day, I would be a busy guy. Since I had submitted a new book in August titled: *HYDROXYCHLOROQUINE: Much-Maligned-Super Drug : From the author of the best-selling book—Hydroxychloroquine*, I was paying attention to emails from Amazon hoping they found no objections to this book.

But, of course they did find fault. At this time, my rejections were becoming more numerous and I began to have reason to believe that Big Tech Behemoth Amazon was in league with Democrats and Liberal Progressive and they knew I had complained to the FTC, writing four versions of a book to the FTC about Amazon's unfair treatment. Amazon made a conscious decision to harass me by censoring my free speech rights as an American.

It was a logical conclusion since after all, I had gone years without any books being blocked /censored and I had just about zero returns—the true measure of whether the public liked my books or not. Amazon’s emails to me about content seemed that they were concerned about the public perception of my books having facts in them that were also on the Web.

This was an Amazon ruse as all non-fiction books have some facts that are also on the Internet such as George Washington was the first president. Yet, on my monthly statements where they charge back sales to my account for returns, there were none. Would returns not be a better measure of my reader’s satisfaction level than an Amazon content reviewer’s opinion that a fact on the Web as presented in one of my books would be met with customer anger and cause them to return many of my books—which did not happen.

I would bet that since Amazon is not known to be a first-rate employer and employees have often been quoted on the web and in magazines as hating Amazon.

As discussed in this book, Amazon has firing quotas for managers to assure employee turnover is high. Knowing the company does not like conservative positions which are well known at Amazon, a content reviewer would get kudos for giving a writer of conservative material a haircut on content reviews. Censoring a book would surely bring more kudos to an Amazon’s beleaguered employee afraid he or she would be fired any day while living in a culture of fear. And intimidation.

Amazon content reviewers are hired on the cheap and are not the best at their trade. In the event that this matter goes to court, I will ask Amazon to show me the education level and the number of non-fiction books written by the reviewers because they do not seem to understand much about common sense.

I am 73 years old and have been writing professionally for years. I was an honor student at EL Meyers High School in the National Honor Society. I graduated cum laude #29 out of 395 from King’s College with a BS in Data Processing and a minor in Accounting/Business administration. I received an MBA in Accounting and Finance Summa Cum Laude from Wilkes University. I was awarded thirteen

Systems Engineering Symposia in 23 years with the IBM Corporation. I was a recognized Regional Technology Specialist and was promoted to Senior Systems Engineer in record time.

At IBM I wrote books and many business proposals about IBM's most sophisticated computer systems. I have been writing for a long time--. My tech books from the 1980's were still hot sellers on Amazon before my account termination. I have also written hundreds of articles for technical and political magazines.

Let me say that based on what I know about writing professionally, I am not at all impressed with the capabilities of Amazon's content reviewers who do not seem to understand a non-fiction book from a novel. But they do know how to enforce Amazon's anti-free-speech policies and they know how to harass a writer for submitting conservative content.

The last thing I wanted when I signed with CreateSpace, Amazon's predecessor, was to spend half of my time defending my work to low-intelligence, semi incompetent content reviewers in order to keep my account with Amazon. I am happy to never submit another manuscript to Amazon but those that are in my catalog, I am not inclined to redo so I expect Amazon to continue to sell and distribute them as they have all been approved for sale using the Amazon method, regardless of how flawed it may be.

When Amazon censors a book they give a writer no clue as to the specific reason. I have asked Amazon to point out the areas in books that they find objectionable and the request goes to deaf ears. They use generalities to damn content. I cut out over 200 pages in a book in 2020 about the RNC conventions. It went from over 300 pages to 102 and Amazon still found fault with it. Why? Because it was about the Republican convention. Why else? Amazon knew it could not tell me that it was because I had no free speech even though I am the publisher of my own books. Amazon is simply a printer, marketer, and distributor. They need no talent to do their jobs.

My point is that if a company had an author with 290 books successfully on the market and something was wrong with the 291st. would a company valuing the talented author not work with them just

a little to help them find out what would make the book permissible to publish. Of course a company interested in profits would do exactly that. Can Amazon be so caught up in ideology that they would give up an ounce of profit in order to reap a pound of ideology. Of course they would and have.

A blogger asked a question on the Internet about Amazon. Why is Amazon hated? The answer he gave was the following: “A major reason consumers hate Amazon is that they are increasing the chances of small and locally owned businesses shutting down. Consumers are particularly concerned about independent bookstores being run out of business due to Amazon's large foot in the door of the book industry.” Amen!

Amazon is a spiteful company with a take your ball and go home attitude. The book blocked in summer 2021 as noted above was *HYDROXYCHLOROQUINE: Much-Maligned-Super Drug : From the author of the best-selling book—Hydroxychloroquine.*

Amazon's rationale for blocking / censoring the book was that the information in the book was not mine but freely available on the Internet. I argued not true that in fact Amazon had sold over 300 copies of the predecessor book titled Hydroxychloroquine (The Game Changer) and the content in that book had been approved about two years hence. :

It was my 229th book and it needed refreshing.

229 Hydroxychloroquine: The Game Changer

A solution—but can it work?

Lets Go Publish! An American Publisher

[https://www.amazon.com/dp/1951562143censored by Amazon](https://www.amazon.com/dp/1951562143censored%20by%20Amazon)

[Free Download copy: Click on ..](#)

So, I gave it a face lift, gave it a new ISBN and released it with the title HYDROXYCHLOROQUINE: Much-Maligned-Super Drug : From the author of the best-selling book—Hydroxychloroquine. Amazon was looking for proof they said that I owned the content in the new book. They had been selling the based on book for several years successfully with no returns. I had written that book so it should have

been proof that the derivative was my book also since the original had already passed the test and sold over 300 Amazon copies.

Instead of agreeing that I owned the content that they thought was freely available on the Internet, Amazon, wanting to stifle my free speech, took the low road. They sent me a note that book#229 was being blocked censored because its content was available on the Web. So they went back years and declared my based on book was bad so the new one had to be bad. I don't think so. This shows the anti-conservative bias. Liberal Progressives had blackballed hydroxychloroquine and I had to be published for exercising my free speech.

To test my theory, I took the new book and changed the cover and released a book that by title seemed to be against Hydroxychloroquine.
288 Hydroxychloroquine Worthless! Worthless! Worthless!
 Do they swear by it? Do they say it is pure hokum?
 Lets Go Publish! An American Publisher
<https://www.amazon.com/dp/1951562739>

The https: above is how Amazon marketed this new book which had the same exact contents as HYDROXYCHLOROQUINE: Much-Maligned-Super Drug : From the author of the best-selling book—Hydroxychloroquine

I am not kidding. When they got rid of my account on September 15, Amazon was promoting the newer book titled Hydroxychloroquine Worthless! Worthless! Worthless!

That proves my case that if it is something conservatives like, it gets censored. If not, as in the Worthless! Worthless! Worthless! Subtitle, it is permitted even though the content is the same – exactly. I can show you the emails involved but it is not fun reading.

Appendix A Miscellaneous Amazon Emails

I will leave the emails in this book in this appendix without refining them very much other than for readability in case I need to include them in a court brief at a later time.

Hello,

Thanks for your message regarding the following book(s):

HYDROXYCHLOROQUINE: Much-Maligned-Super Drug : From the author of the best-selling book--Hydroxychloroquine: the Game Changer

Brian W Kelly (AUTHOR) ID: PRI-JWM48KNB167

We've reviewed the information you provided. Based on our review, we're unable to confirm that you hold the necessary publishing rights. The content closely matches content that is freely available on the web and we are not confident that you are the copyright owner. This type of content can create a poor customer experience, and is not accepted.

The information you provided is insufficient because of the following concerns: Documentation has not been provided to confirm you are the original author of the content

In order to publish the book(s), please reply to this email within 10 days and provide us with further documentation and/or verification confirming that you hold rights to the content. Otherwise, the book(s) will be unavailable for sale on Amazon.

For more details about KDPs copyright guidelines, visit Help:

<https://kdp.amazon.com/help/topic/G200672400>

If you have questions or believe you've received this email in error, reply to this message.

Thanks for your cooperation,

The bottom line of what you have told me is

We've reviewed the information you provided. Based on our review, we're unable to confirm that you hold the necessary publishing rights.

Actually the fact that most of this material has already been published on Amazon in the form of the predecessor book to this is proof that I am the owner of the material as I received the royalties from Amazon as proof that this material was mine. Surely Amazon would not have paid me for plagiarized material.

You said that the content closely matches content that is freely available on the web and we are not confident that you are the copyright owner.

This type of content can create a poor customer experience, and is not accepted.

Dear Content Reviewer. Are you sure that the material was not taken from the book which was my best seller for the last two years. How do you determine who posted the material first? You paid me for the books sold. Is that not enough proof.

Your records on this book are not correct perhaps that is why you do not trust them to verify that I own the book content. Look at your ad below. It says that the book has been purchased twice and the last purchase was July 9, 2020. This is not accurate. My current book tally from Amazon shows that I sold 12 books in July 2021. Here is the proof. Why do you report just two books sold on your web Amazon went on to block the revised version of Hydroxychloroquine The Game changer and then went back and blocked the book that had

sold hundreds of copies before I revised it. Why? Because they are Amazon and could do so. Because of monopolistic market dominance.

Going through my junk mail, I found this

The interactions from Spephania Fallas came about because I had emailed jeff@amazon.com and these were follow-ups. I was having so many emails back and forth with Amazon at the time, that I had a tough time telling whether they were granting me permission for printing or blocking a book.

Hello,

We are writing to you regarding the following book(s):

[No book title given]

B087PKKT29
1951562143

I found the book title by taking the number and doing a google search

[Hydroxychloroquine: The Game Changer by Brian W Kelly ...](#)

<https://www.discoverbooks.com> > 1951562143

Buy a cheap copy of Hydroxychloroquine: The Game Changer by Brian W Kelly 1951562143 9781951562144 - A gently used book at a great low price.

Amazon had already sold hundreds of this book. Because I had referenced this book trying to justify the last blocked book, I did not tune into this because it was being evaluated. I wonder how often Amazon goes way back to a hot selling book and blocks it?

During a quality assurance review of your catalog, we found content (text and/or images) that is widely available on the web. You can do an online search for the content inside your books to discover which sites are offering the content for free. Copyright is important to us – we want to make sure that no author or other copyright holder has their work claimed and sold by anyone else.

As a result, the book(s) have been removed from sale from Amazon. If you wish to publish this content, please make updates to the books

above and all similar books in your catalog and notify us with the following:

1. The URLs for all websites where this content is published
2. An explanation as to why the content is available online

If the books are in the public domain, please confirm this and include the information you used to make this determination. We may request additional information to confirm the public domain status.

For additional information, you can reference our Guide to Kindle Content Quality:

<https://kdp.amazon.com/help?topicId=A1MMQ0JHRBEINX>

As a reminder, since publishing books with content (text and/or images) that are widely available on the web are against our guidelines, we may suspend or terminate accounts that repeatedly try to do so. For any questions, please reply to this e-mail.

We appreciate your understanding.

Best regards,

Amazon KDP
Giany
Amazon Content Review Team

I did not get this in a timely fashion as it was in junk mail because I receive many emails from Amazon(9844) and Amazon Prime etc. soliciting my business.

Does Amazon routinely do this audit?

Does a conservative topic – hydroxychloroquine trigger a review

Amazon monopoly at work – No free speech

Thanks Jose

If you folks decide that this book does not meet your criteria, it can't be because the book is already on the Internet.

Nobody has returned any of my books.

People like my books and it is because I write them and they are my thinking.

Jose, Tell me how to prove that I wrote a book. My books are non-fiction. Just about everything I write has information about the facts in the book that are on the Internet

Yesterday, for example, Miguel Cabrera hit his 500th home run? That is a fact. If I write a book about Miguel Cabrera am I not able to use some facts because on day two there are stories of this achievement already on the Internet. Not only that but the fact that Cabrera won the Triple Crown and he was the back to back MVP award winner back in 2012.

Plus he was the first Venezuelan to hit 500 homers. Would I not be able to say that last night's 500th home run was his 2.955th hit of his career and that he might even make 3000 hits as a milestone before the end of the year.. Tell me how I could use those facts if they are on the Internet and I decide to write a book about Miguel Cabrera. All of my books are fact based. The facts about which people want to read are all on the Internet.

Amazon would be better off advising writers such as I who only write non-fiction to not write books. Amazon should accept no non-fiction books because a fact is by definition un-original. Also because when I cite a fact, somebody else may have cited the fact already even in different words .

In fact, Jose, if I write a book and publish it on the Internet or somebody does a review of it, their review about the facts in my book may make it seem that they own the facts and I was not the first to write about it. If they get their facts from me, the fact that they publish on the Internet -- how do you know who wrote the facts first.

You would disqualify my book if I wrote a follow-on simply because somebody else wrote about the same topic and used the facts in my book to make his points. Tell me how to prove that I included almost verbatim seven of the ten chapters in a prior book if simply saying I did is not enough. There are only three chapters of original work in the

book you blocked and they are opinion chapters on points I wanted to make that I missed in my first book.

I wrote Hydroxychloroquine The Game Changer two years ago and based this current book on that book. It sold over 300 copies on Amazon so why wouldn't somebody have used some of the same facts as I.

I really do not know how to prove I wrote anything if you won't take my word.

Do other writers have to go through all these gyrations to print a second update to one of their books?

Why me?

How do I prove what you want if you won't accept my word?

Thank you for letting me say my piece.

Account Suspension

In my attempts to prove that the material in Hydroxychloroquine – much maligned Super Drug was original I cited that the book was an update to one in which Amazon sold over 300 copies. It was titled, Hydroxychloroquine: The Game Changer. I thought Amazon would see that the material in the updated book had already been OK's by content reviews or it would not have been for sale for two years. Instead of approving the update, Amazon decided to censor the book that had already sold 300 copies. Why would they do this. I would say they decided to violate my free speech by having written about a taboo liberal / progressive topic – namely discredited therapeutics (Hydroxychloroquine) and after suspending my account, they blocked it when I submitted my next book titled

Should We Cancel Student Debt ??? Subtitled Americans owe \$1.7Trillion in student debt. What should the Biden Administration do about it?

This book was also an update to an already approved book but Biden's name in the title must have triggered the Amazon thought police into declaring this illegal thought.

They blocked it and terminated my account on September 15, 2021. The following emails amplify this information.

 Hello,

We have temporarily suspended your KDP account because you submitted titles which contain content that is freely available on the web. We don't accept content that is freely available on the web unless you are the exclusive copyright owner of that content. You can see the violations reflected in the following title(s):

Hydroxychloroquine: The Game Changer - ASIN: B087PKKT29

Before we can reinstate your account, we need you to do the following:

1. Reply to this message with the following declaration: I confirm that I will remove any content for which I do not have the exclusive publishing rights and that I will adhere to all terms in the Content Guidelines when submitting new content; and

2. Review your catalog and remove any titles that do not comply with the Content Guidelines or for which you do not have the necessary publishing rights

Until we receive a response from you regarding this issue, your account will remain blocked.

As a reminder, violations of our Content Guidelines may negatively impact your account status and you may also lose access to optional KDP services.

If you have questions or believe you've received this email in error, reply to this message.

Regards,
Amazon KDP

Hello,
Thank you for your email concerning the status of your account.

After reviewing your response, we have reinstated your account and we will once again accept your titles for possible publication.

Please be advised that all of your submissions must comply with our Content Guidelines for publishing on Amazon:
<https://kdp.amazon.com/help/topic/G200672390>

Upon reinstatement of your account, you must review your catalog and remove any other titles currently available for sale on Amazon that do not comply with the KDP Content Guidelines.

Please note that your future submissions may be subject to additional review prior to being published. This may result in a delay in publishing.

Please be aware, violations of our content guidelines may result in the suspension or termination of your KDP account.

If you have questions or believe you've received this email in error, reply to this message. Regards,

Amazon KDP

HYDROXYCHLOROQUINE: Much-Maligned-Super Drug
by Brian W Kelly-PRI-JWM48KNB167

It's taking longer than usual to resolve this and I'm very sorry about the delay.

We'll contact you with more information by the end of the day

Thanks for your continued patience.

Another Account termination

I did not see this until September 27, 2021 because Amazon had been flooding my email and I expected no important actions since my suspension.

I went back and found this but was unaware because of the 9,488 other emails Amazon had sent me cluttering my email. .

Subject: Your Amazon KDP Account
Date: Wed, 15 Sep 2021 15:02:16 +0000
Feedback-ID: 1.us-east-1.iFP1zcxNx7Rg2OgZ5SP2efQPG1igLVEOmZdPgvxewuE=:AmazonSES

Hello,

We are terminating your account effective immediately because you submitted titles containing content that is freely available on the web, which is a violation of our Content Guidelines.

You can see the violations reflected in the following title(s):

Should We cancel Student Debt ????: Americans owe \$1.7 trillion in student debt What should the Biden Administration do about i ;
ASIN:B09DW7DQSR

As part of the termination process:

- We will close your account
 - You'll receive any unpaid royalties you have earned
 - You'll no longer have access to your accounts. This includes, editing your titles, viewing your reports and accessing any other information within your account
 - All of your published titles will be removed from sale on Amazon
- Additionally, as per our Terms and Conditions, you aren't allowed to open any new KDP accounts.

You can find our Terms and Conditions, here:

<https://kdp.amazon.com/terms-and-conditions>

If you have questions, please reply to this message.

Regards,

The beginning of this book has additional perspectives on my account termination

ThankYou IBM! This book explains how IBM was beaten in the computer marketplace by neophytes

[Amazon.com/author/brianwkelly](https://www.amazon.com/author/brianwkelly)

Brian W. Kelly has written 290 books including this book.

Thanks again for buying this one.

A former IBM Systems Engineer, Brian W. Kelly served as an Assistant Professor in the Business Information Technology (BIT) program at Marywood University. He also served as a contributing technical IT industry magazines, including "The Four Hundred and Four Hundred Guru," published by IT Jungle. He is the author of 293 books in many literary and sports areas. Brian was a 2010 candidate for the US Congress and in 2015 for Mayor from his home town.

This big bully blocked 15 books before the end of 2021 by the most published non-fiction author in America.

Everybody knows that your business will be severely punished if you decide to mess with Amazon, even if you are 100% right. 15 of my books since 2020 were censored because of the same reason this next guy was blocked: I THINK what I "did wrong" was to use what they consider "widely available facts" which are a lot of facts about the topic I was writing about. The creativity I add comes from the presentation not the facts. Here is an analogy I got on the Internet:

IF YOU WRITE ABOUT THE MONA LISA YOU WILL ALSO NEED WIDELY AVAILABLE PICTURES BECAUSE THOSE ARE THE ONLY ONES AVAILABLE AT ALL!!! THE LOUVRE WILL NOT ALLOW YOU TO TAKE YOUR OWN PICTURES, THUS NO BOOKS ABOUT THE MONA LISA????

They terminated my account and kept my files and no longer sell my books. I contested this and threatened to sue. But, Amazon chose not to respond and all of my books are censored now. See what happens when you complain to the largest tech oligarch. I am now canceled by Amazon
